### Table of contents

<b>Basic statistics of Denmark, 2014</b> .....	7
<b>Executive summary</b> .....	9
High living standards but slow growth .....	10
New structural reforms to improve the balance between inclusiveness and work incentives needed .....	10
Current monetary conditions call for more action in prudential policy .....	10
<b>Assessment and recommendations</b> .....	13
Economic prospects have improved recently .....	18
Monetary conditions are very accommodative .....	22
Fiscal policy is sustainable but could let automatic stabilisers work more freely ..	27
Balancing inclusiveness, work incentives and sustainability in an ageing society ...	28
Cost effective policies to manage environmental pressures .....	40
Bibliography .....	42
<b>Annex. Progress in structural reforms</b> .....	47

### Thematic chapters

<b>Chapter 1. Macroeconomic and financial risks</b> .....	55
Eliminating debt bias towards housing requires policy change .....	56
Household indebtedness increases consumption volatility .....	64
Debt is high, but affordable .....	66
Risks in the financial sector should be addressed now .....	69
Resource misallocation and increasing inequalities undermine inclusive growth ...	79
Bibliography .....	82
<b>Chapter 2. Getting the incentives right in an ageing society</b> .....	85
Addressing barriers to employment for benefit recipients .....	87
Easing expenditure pressures on social institutions .....	104
Bibliography .....	120

### Boxes

1. Areas for reviving productivity growth .....	17
2. Shocks that might affect economic performance .....	21
3. The Flexicurity labour market model .....	30
4. Recent reforms of social institutions .....	32
1.1. Covered bonds at the heart of the Danish financial system .....	72
1.2. Scope for improving the crisis management and resolution regime .....	74
2.1. Recent reforms of social institutions .....	89

2.2. The Danish unemployment insurance benefit system .....	93
2.3. Recent legislative changes for immigration and asylum seekers .....	97
2.4. Impact of immigration on public finances in Denmark .....	101
2.5. Assessing the impact of reforms on potential growth and labour force .....	106
2.6. The Danish pension system: main features and reforms .....	107
Recommendations to sustain effective social institutions .....	119

## Tables

1. Macroeconomic indicators and projection .....	18
2. Spending projections on health care and long term care .....	39
2.1. Projections for labour supply of the Danish government, OECD and European Commission .....	106
2.2. The range of healthcare and long-term care spending projections is large ...	112

## Figures

1. Denmark scores well in OECD's Better Life Index .....	14
2. GDP growth has been weak though other measures paint a better picture ...	15
3. Lagging productivity growth .....	16
4. Recent macroeconomic developments .....	19
5. Current account at a historical high .....	20
6. Danish and Swiss central banks' foreign reserves .....	20
7. Potential macro-financial vulnerabilities have diminished .....	21
8. Housing market is volatile and poses a risk .....	22
9. Household indebtedness is high and decreasing only marginally .....	23
10. The financial sector is well capitalised .....	26
11. Property taxation does not fluctuate with house prices .....	27
12. Inequality is low but has risen .....	28
13. Social spending is high and has increased .....	29
14. The core elements of the <i>flexicurity</i> model .....	30
15. <i>Flexicurity</i> supports high turnover rates and low structural unemployment ...	31
16. The number of social assistance recipients has risen since the crisis .....	33
17. Scope for increasing employment is particularly high among immigrants ...	34
18. Inequality between foreign-born and native-born is high .....	36
19. Substantial employment gap between native and foreign origin youth .....	37
20. Emissions are low and renewables play an important role .....	41
21. Other sustainability issues remain .....	42
1.1. Housing market is volatile and poses a risk .....	57
1.2. Housing expenditures in OECD countries .....	58
1.3. Taylor rule estimated interest rates .....	60
1.4. Private rental market across OECD countries .....	61
1.5. Property taxation does not fluctuate with house prices .....	63
1.6. Gross household debt to income ratio .....	65
1.7. Household assets and liabilities .....	67
1.8. Lending to households by type of loans .....	68
1.9. Distribution of the gross debt across income deciles .....	69
1.10. Potential macro-financial vulnerabilities have diminished .....	70
1.11. Financial sector assets as a % of GDP .....	70
1.12. The financial sector is well capitalised .....	73

1.13. Non-performing loans .....	75
1.14. Short-term policy and lending rates .....	78
1.15. Pension funds returns and assets allocation .....	79
1.16. Simulated effect of a larger financial sector on household disposable income ..	80
1.17. Capital income has contributed to the increase in inequality .....	81
1.18. Residential mobility is high .....	81
2.1. Social spending and inactivity have increased over the past decade .....	87
2.2. Social institutions account for a large share of public spending .....	88
2.3. Number of social assistance recipients has risen since the crisis .....	91
2.4. Scope for increasing employment is particularly high among immigrants ...	92
2.5. Generous social assistance is combined with relatively high effective taxation	95
2.6. Denmark receives less asylum seekers than Nordic neighbours .....	98
2.7. Inequality between foreign-born and native-born is high .....	99
2.8. Employment gap persists across generations and has widened .....	100
2.9. Employment rates of migrants improve with time .....	103
2.10. Structural reforms to help cope with ageing according to national projections ..	105
2.11. Gross pension levels and replacement rates are high .....	107
2.12. The pension reforms has already an impact on employment rates of older workers .....	108
2.13. Pension savings of low-income earners are heavily taxed .....	109
2.14. Spending on health and long-term care is high .....	112
2.15. Large efficiency gains are possible in the healthcare and the long-term care sectors .....	113
2.16. Spending on health prevention is largely unchanged .....	116
2.17. The retail market for pharmaceuticals is more concentrated than in most OECD countries .....	117
2.18. Co-payments are quite low in the healthcare and the long-term care sectors ...	118
