<b>Basic statistics of Spain, 2015</b> .....	8
<b>Executive summary</b> .....	9
The recovery is underway but making growth more inclusive remains a challenge .....	10
Fostering innovative business investment is crucial to unlock productivity growth .....	10
Reducing unemployment and improving job quality can make growth more inclusive .....	10
<b>Assessment and recommendations</b> .....	13
The economic recovery is set to continue at a healthy pace .....	17
Bolstering the financial sector to raise credit growth .....	22
Fiscal policy .....	26
Making growth more inclusive by reducing unemployment and improving job quality .....	33
Improving medium-term sustainable growth .....	42
Bibliography .....	51
<b>Annex. Progress in main structural reforms</b> .....	55

### Thematic chapters

<b>Chapter 1. Reforms for more and better quality jobs in Spain</b> .....	61
Spain faces challenges to develop more and better quality jobs .....	64
Ensuring adequate support for the most vulnerable .....	68
Improving the effectiveness of active labour market policies to get more people into jobs .....	77
Strengthening skills .....	83
Supporting more and better quality jobs .....	91
<i>Policy recommendations for more and better quality jobs in Spain</i> .....	94
Bibliography .....	95
<b>Chapter 2. Fostering innovative business investment in Spain</b> .....	99
Poor business investment allocation is hampering productivity growth .....	100
Financing innovative investments .....	110
Raising the expected returns on innovative investment .....	121
<i>Main recommendations on boosting innovative investment</i> .....	130
Bibliography .....	131

## Boxes

1. Overview of Spain's most recent reforms . . . . .	14
2. Medium-term uncertainties about the Spanish economy's growth prospects . . .	20
1.1. What does the evidence say about the impact of the 2012 Labour Market Reform? . . . . .	63
1.2. The structure of responsibilities at different government levels in Spain . . . . .	74
1.3. Digitisation and new technologies are transforming the way public employment services operate. . . . .	79
1.4. Better engaging firms in providing apprenticeships: The case of Australia. . . . .	89

## Tables

1. Macroeconomic indicators and projections . . . . .	19
2. Fiscal indicators . . . . .	26
3. Past OECD recommendations on fiscal policy . . . . .	27
4. Past OECD recommendations on labour market policies . . . . .	38
5. Past OECD recommendations on education policies. . . . .	39
6. Past OECD recommendations on improving the business climate and boosting productivity . . . . .	42
7. Past OECD recommendations on environmental sustainability . . . . .	51
1.1. Labour market indicators . . . . .	64

## Figures

1. How's life in Spain? . . . . .	16
2. Economic developments . . . . .	18
3. Public investment is low . . . . .	19
4. Evolution of macro-financial vulnerabilities since 2007 . . . . .	20
5. Macroeconomic and financial vulnerabilities . . . . .	21
6. External developments . . . . .	22
7. Banking sector indicators are still below par . . . . .	23
8. There is scope for reducing operating expenses in the Spanish banking system . . . . .	24
9. Non-performing loans (NPLs) are falling, but are still high . . . . .	24
10. Credit flows have stabilised and lending rates are declining. . . . .	25
11. Illustrative public debt paths . . . . .	27
12. Spain's pension outlook. . . . .	29
13. The tax structure is tilted towards labour taxes . . . . .	30
14. The yield of the value-added tax is relatively low . . . . .	31
15. There is room to make the Spanish tax system more environmentally friendly . . . . .	32
16. Temporary employment remains high . . . . .	34
17. Income inequality and poverty increased during the crisis. . . . .	35
18. Taxation and transfers reduce inequality in household disposable income . . . . .	36
19. The transfer system can do more to relieve poverty. . . . .	37
20. Spending on active labour market programmes per unemployed workers is low in Spain. . . . .	38
21. The proportion of low performer adults is high in Spain . . . . .	39
22. Early school-leaving rates are high . . . . .	40

23. Tertiary education attainment in young generations is close to the OECD average.....	41
24. Productivity is low .....	43
25. Innovative investment is low .....	44
26. Doing business has become easier, but there is scope for improvement .....	45
27. Productivity in professional services is low .....	46
28. Entry barriers to professional services are high.....	47
29. Green growth indicators: Spain .....	50
30. Water stress is one of the highest among OECD countries .....	51
1.1. Unemployment remains very high .....	65
1.2. The Spanish labour market remains characterised by its duality.....	66
1.3. Labour market insecurity, among the highest in the OECD.....	67
1.4. Unemployment risk, particularly high among the less well-educated .....	68
1.5. Low average earnings in Spain .....	69
1.6. Productivity and labour earnings are weak in the vast majority of Spanish firms .....	69
1.7. Firms' skill requirements are low in Spain .....	70
1.8. The quality of the working environment is low and job strain is high in Spain..	71
1.9. Work autonomy and learning opportunities are scarce in Spain .....	71
1.10. Income inequality increased during the crisis.....	72
1.11. Poverty increased during the crisis .....	73
1.12. Poverty risks are high for families with children or with unemployed family members .....	73
1.13. Transfers benefit mostly the top incomes .....	74
1.14. Income support for jobless households is weak .....	75
1.15. Financial incentives to return to work are low at low earning levels.....	76
1.16. Active labour market policies are concentrated in employment incentives .....	78
1.17. Job search requirements for the unemployed are low by international standards.....	82
1.18. Job-search monitoring is low .....	83
1.19. The proportion of low performer adults is high in Spain.....	84
1.20. School performance is low on average with large regional disparities .....	85
1.21. Early school-leaving rates are high .....	86
1.22. Most of the vocational training is school-based .....	87
1.23. Involvement of companies providing dual VET is low .....	88
1.24. Foundation skills are low on average .....	90
1.25. Tax wedge is high due to high employer social security contributions .....	91
1.26. The share of companies applying salary freezes and reductions is low .....	94
2.1. Spain's growth potential has declined .....	100
2.2. Spanish productivity growth is low .....	101
2.3. Total investment remains below pre-crisis level, but non-residential private investment has recovered.....	102
2.4. Investment and capital stock per worker .....	103
2.5. Capital allocation to ICT matters for productivity.....	104
2.6. The efficiency of capital allocation deteriorated in the boom .....	104
2.7. The rise of the zombie firms .....	105
2.8. Impact of zombie firms on non-zombie firm performance .....	105

2.9. Investment in intangibles is too low .....	106
2.10. Investment in knowledge-based capital (KBC) pays higher returns .....	107
2.11. Capital is not flowing to innovative firms. ....	108
2.12. Intangible investment and early-stage venture capital .....	109
2.13. Corporate non-financial sector debt has declined from high levels.....	110
2.14. Differences in interest rates on new loans between small and large companies are decreasing .....	111
2.15. New lending is weak and mainly driven by small banks .....	112
2.16. The importance of small firms in overall employment and productivity .....	113
2.17. The Spanish guarantee schemes are underdeveloped .....	114
2.18. IPO activity has been strong recently .....	115
2.19. Financial markets and productivity growth .....	118
2.20. Venture capital investment .....	118
2.21. Business R&D and multifactor productivity growth .....	119
2.22. Tax subsidy rates on R&D expenditures .....	120
2.23. Foreign direct investment (FDI) .....	123
2.24. FDI and corporate income tax rates. ....	124
2.25. Productivity in professional services is low .....	126
2.26. OECD indicator of barriers to entry due to environmental policies (BEEP) .....	129

<b>Basic statistics of China, 2015</b> .....	8
<b>Executive summary</b> .....	9
Managing the gradual slowdown .....	10
Boosting corporate dynamism and performance .....	10
Ensuring inclusive growth by enhancing opportunities .....	10
<b>Assessment and recommendations</b> .....	13
Moderating growth .....	16
Monetary policy is juggling two objectives: supporting growth and containing risks .....	21
Mounting risks in the financial sector .....	24
Loosening fiscal policy, tax reforms and inter-governmental fiscal relations .....	27
Rebalancing growth .....	31
Boosting corporate performance and entrepreneurship .....	37
Improving well-being and economic prospects by making growth more inclusive .....	46
Greening growth .....	54
Bibliography .....	56

### Thematic chapters

<b>Chapter 1. Boosting firm dynamism and performance</b> .....	61
Coping with excess capacity in selected sectors .....	62
Strengthening the role of innovation and entrepreneurship as drivers of growth .....	64
Building a more robust corporate governance framework .....	77
Taking the state-owned enterprises to market .....	84
<i>Recommendations to boost firm dynamism and performance</i> .....	92
Bibliography .....	94
<b>Chapter 2. Sharing the benefits of growth by providing opportunities to all</b> .....	97
Introduction .....	98
Redistributing through the tax and transfer system .....	101
Helping low-paid workers improve their productivity and appropriate the rewards .....	113
Improving the health system to enhance living standards .....	121
Extending the working lives of the elderly and caring for them in retirement .....	126
<i>Recommendations for sharing the benefits of growth by providing opportunities to all</i> ..	128
Bibliography .....	129

## Boxes

1. Key vulnerabilities .....	21
2. Past recommendations on monetary and financial policies and actions taken ..	27
3. Revenue and spending assignments across government levels .....	29
4. Past recommendations for fiscal reform and actions taken .....	31
5. The evolution of China's foreign trade and FDI patterns .....	35
6. The Belt and Road Initiative .....	38
7. Past recommendations on greening growth and actions taken .....	56
1.1. Policy targets for science, technology and innovation development in China ...	65
1.2. Made in China 2025 and Internet Plus .....	66
1.3. Where is R&D money coming from and who spends it? .....	68
1.4. Where are angels investing? .....	75
1.5. China's Bankruptcy Law .....	76
1.6. Tradable or not tradable? .....	83
1.7. The SOE universe .....	85
1.8. How are centrally-owned SOEs managed and their top executives appointed? ..	88
1.9. Where are the recent reforms headed? .....	91
2.1. Variation in China's Minimum Income Living Standard .....	107
2.2. The impoverished households in five Chinese administrative regions .....	109
2.3. China's migrant workers and hukou system .....	118

## Tables

1. Macroeconomic indicators and projections .....	17
2. Belt and Road in numbers .....	38
1.1. Capacity reduction in coal and steel is limited .....	63
1.2. Targets for the 13th Science, Technology and Innovation Five Year New Plan ...	65
1.3. The top 20 SOEs according to the Fortune 500 ranking are mostly central SOEs .....	85
2.1. Poverty rates vary greatly across areas .....	110
2.2. The impoverished in most regions spent more of their income on health and housing .....	111
2.3. Migrant workers have limited access to public services in their destination city .....	118

## Figures

1. Trend growth is moderating but convergence proceeds .....	15
2. The economy is undergoing a number of transitions .....	16
3. The slowdown in growth and investment has been geographically uneven .....	18
4. High liquidity has fuelled a housing boom .....	18
5. Vacancy rates are high in some areas .....	19
6. Trade has slowed but the goods surplus has increased .....	20
7. Deflationary pressures are subsiding .....	21
8. The share of lending at the benchmark rate has fallen .....	22
9. Trend exchange rate appreciation has ceased .....	23
10. The domestic bond market has developed rapidly .....	23
11. Corporate debt is particularly high .....	24
12. Problem loans are on the rise .....	25

13. The tax reform reduced sub-national revenues, prompting sub-national governments to draw on other sources. ....	28
14. Some sub-national governments rely heavily on land-related revenue. ....	28
15. Fiscal revenue is mostly collected by the central government but mostly spent at county level. ....	30
16. The saving rate is still very high. ....	32
17. Capital accumulation still drives growth, though the efficiency of investment is falling. ....	33
18. High-tech goods imports are rising fast. ....	34
19. The evolution of the trade structure reflects rebalancing. ....	35
20. Technological upgrading and on-shoring are gaining momentum while FDI, especially in manufacturing, loses importance. ....	36
21. Services imports are growing rapidly. ....	37
22. Labour productivity has caught up fast. ....	39
23. China has become a major R&D power, but the share of researchers is low. ....	40
24. Barriers to entrepreneurship are falling rapidly. ....	41
25. Insolvency procedures lag behind major OECD economies. ....	42
26. Ownership concentration has declined somewhat. ....	43
27. State-owned firms led debt accumulation and debt is high in some industries plagued by overcapacity. ....	45
28. Income inequality has declined. ....	47
29. The income share of the poorest people has been falling in rural areas. ....	48
30. Redistribution by the tax-and-transfer system is very limited. ....	49
31. The minimum living standard varies significantly across provinces. ....	49
32. Socioeconomic factors have a large influence on Chinese PISA scores. ....	50
33. Minimum wages are low compared with OECD countries. ....	51
34. The employment share in agriculture is higher for women. ....	52
35. Out-of-pocket health costs for the insured are high. ....	53
36. Ample room for improvement in greening growth. ....	55
1.1. China has become a major R&D power, but the share of researchers is low. ....	67
1.2. Firms are key suppliers and spenders of R&D funds. ....	68
1.3. China leads in some aspects of innovation and lags in others. ....	69
1.4. Innovation outcomes are not on par with R&D spending by the business sector. ....	69
1.5. Patent use varies considerably across provinces. ....	70
1.6. New products make up a substantial part of revenue in some high-tech industries. ....	71
1.7. Barriers to entrepreneurship are falling rapidly. ....	74
1.8. The number of listed firms and market capitalisation in China are on the rise. ....	77
1.9. Most listed firms have only the minimum legally required share of independent directors. ....	80
1.10. Ownership concentration has declined somewhat. ....	81
1.11. The proportion of non-tradable shares has been reduced but is still high. ....	83
1.12. Shareholding by executives is much more common among private firms. ....	84
1.13. State-owned firms led debt accumulation and debt is high in some industries plagued by overcapacity. ....	86

1.14. Profitability differs widely across SOE types .....	89
2.1. The share of the working age population is shrinking .....	98
2.2. Income inequality has declined .....	99
2.3. The income share of the poorest people is low and has been falling in rural areas .....	100
2.4. Redistribution by the tax and transfer system is very limited .....	101
2.5. The PIT allowance is very high .....	102
2.6. The coverage of the <i>dibao</i> programme has peaked in both urban and rural areas .....	104
2.7. The minimum living standard varies significantly across provinces .....	106
2.8. Minimum income standards vary greatly within provinces .....	107
2.9. Impoverished households spent more of their income on health and housing ..	110
2.10. Socioeconomic factors have a large influence on Chinese PISA scores .....	114
2.11. Minimum wages are low compared with OECD countries .....	116
2.12. A large share of migrant workers do not have labour contracts .....	119
2.13. The employment share in agriculture is higher for women .....	120
2.14. The availability of healthcare is much lower in rural areas .....	122
2.15. Out-of-pocket health costs for the insured are high .....	123
2.16. The retirement age remains low .....	127
