Basic statistics of Japan, 2015	9
Executive summary	11
Assessment and recommendations	15
Recent macroeconomic developments and short-term prospects	19
Removing barriers to labour participation in the context of population ageing...	31
Increasing productivity to promote inclusive growth	34
Putting the government debt ratio on a downward trend	48
References	63
Annex. Progress in structural reforms	67
Thematic chapters	
Chapter 1. Boosting productivity for inclusive growth	77
The common origins of the productivity and income inequality challenges	80
Improving exit and entry policies	83
Other policies to promote synergy between higher productivity and inclusive growth	95
Making the SME sector more dynamic	105
Breaking down labour market dualism	110
Human capital and skills	114
<i>Main policy recommendations for boosting productivity for inclusive growth</i>	117
References	118
Chapter 2. Ensuring fiscal sustainability in the context of a shrinking and ageing population	123
Japan's fiscal situation is not sustainable	126
Reconciling fiscal consolidation and inclusive growth	131
Policies to control social spending	135
Controlling spending by local governments	147
Increasing revenue while promoting inclusive growth	159
<i>Main policy recommendations to ensure fiscal sustainability in the context of a shrinking and ageing population</i>	167
References	168

Boxes

1. The structure of Japan's international trade	25
2. Potential costs and side effects associated with unconventional monetary easing	28
3. Green growth challenges	46
2.1. Economic and Fiscal Revitalization Action Program	128
2.2. Overview of local governments in Japan	147
2.3. Policies to cope with population decline and ageing	151

Tables

1. Abenomics has resulted in faster output growth and higher inflation	16
2. Ten key reforms in the Japan Revitalization Strategy	17
3. Macroeconomic indicators and projections	21
4. Key vulnerabilities	24
5. Japan's major trade partners in 2015	25
6. Commodity composition of Japan's international trade in 2015	25
7. A chronology of major monetary policy measures in Japan since 2013	27
8. Summary of the potential costs and side effects associated with Japan's monetary policy	31
9. Implementation of OECD recommendations to remove obstacles to labour force participation	32
10. Implementation of OECD recommendations to raise productivity	38
11. Implementation of OECD recommendations to achieve fiscal sustainability ...	50
12. Fiscal assumptions to calculate the required amount of consolidation	51
13. International comparison of healthcare shows room for cost savings in Japan ...	56
14. Raising the pensionable age leads to a large increase in the replacement rate ...	57
15. The ageing of public infrastructure poses challenges for local governments ...	60
1.1. Legal insolvency procedures in Japan	86
1.2. Personal insolvency regimes	88
1.3. Flows of R&D funds in 2014	102
1.4. Non-regular worker households suffer from a high poverty rate	112
1.5. Investment in Information and Communication Technology is low in small firms	116
2.1. Supplementary budgets launched in FY 2015-16	127
2.2. Fiscal assumptions to calculate the required amount of consolidation	129
2.3. Social security benefits and contributions	136
2.4. International comparisons show room for healthcare cost savings in Japan ...	138
2.5. Raising the pensionable age leads to a large increase in the replacement rate ...	145
2.6. The ageing of public infrastructure poses challenges for local governments ...	157
2.7. Japan's personal income tax base is subject to a range of deductions	162

Figures

1. Japan has faced low growth, rising government debt and deflation	18
2. How's life in Japan? A mixed picture	19
3. Key macroeconomic indicators	20
4. Consumer price inflation has fallen since 2014	22
5. The upward trend of the yen during 2016 has been reversed	22

6. The gap between the growth of productivity and real wages is large in Japan	23
7. The minimum wage in Japan is relatively low	23
8. Evolution of macro-financial vulnerabilities since 2007	24
9. Real exports by type of goods.	26
10. Quantitative and Qualitative Easing has sharply increased Japan's monetary base	27
11. Quantitative and Qualitative Easing has reduced interest rates across the yield curve	28
12. Asset price trends in Japan are improving	29
13. The Bank of Japan's holdings of domestic government bonds are high	30
14. Total working hours have declined as part-time employment has increased ..	32
15. Japan's population is declining and ageing	33
16. Increasing female employment can help limit the looming labour supply shortage.	34
17. Productivity growth has slowed in Japan, as in most OECD countries, since the 1980s	35
18. Relative poverty in Japan has risen to a high level	35
19. Productivity at Japanese firms has diverged significantly during the past few decades	36
20. Labour income inequality is positively correlated with productivity disparities between firms	37

1.22. The level of foreign direct investment in Japan remains low	106
1.23. Productivity in small firms in Japan is low relative to large firms	107
1.24. The productivity gap between manufacturing and non-manufacturing has widened sharply	107
1.25. Public credit guarantees for loans to small and medium-sized enterprises have fallen significantly	108
1.26. Credit guarantees for small and medium-sized enterprises in Japan are exceptionally high.	109
1.27. Non-regular employment is concentrated among women	111
1.28. The wage gap between regular and non-regular workers is large	112
1.29. Percentage of workers reporting a skill mismatch in 2011-12.	115
1.30. Japan is lagging in the share of firms with broadband connectivity	116
2.1. Japan's fiscal situation has deteriorated considerably over the past 20 years. . .	124

2.2. Rapid population ageing will create strong upward pressure on government spending in Japan	125
2.3. Long-run simulations of the government debt ratio	126
2.4. Government projections show it failing to meet its fiscal targets	127
2.5. Sustained fiscal consolidation is needed to reduce the government debt ratio	131
2.6. The impact of the social safety net on the working-age population is weak in Japan	132
2.7. The upward trend in public social spending in Japan is projected to continue...	133
2.8. The tax and transfer system redistributes income from the working-age to the elderly	134
2.9. Transfers and asset holdings support high levels of consumption among the elderly	135
2.10. Health spending in Japan increased rapidly due to ageing and more intensive care	137
2.11. The use of generic drugs in Japan is low	138
2.12. The elderly in Japan make frequent use of medical services	139
2.13. The higher the number of beds, the longer are hospital stays, leading to greater health spending	141
2.14. Long-term care expenditure has more than doubled in 14 years	142
2.15. Problems in Japan's pension system	144
2.16. The coverage of the Basic Livelihood Protection Program is rising	146
2.17. Subnational government revenue, expenditure and debt in Japan relative to the OECD	148
2.18. Local government expenditure is steady but its composition is changing	149
2.19. Differences in per capita spending is largely financed by central government transfers	150
2.20. Spending by municipalities is driven up by ageing and falling population density	150
2.21. The decline in Yubari's population is projected to continue	151
2.22. Yubari is paying more than half of its general revenue for debt redemption ...	152
2.23. Childcare capacity is limited in major urban areas	154
2.24. The fall in the number of school-age children allows scope for school consolidation	155
2.25. The public capital stock in Japan is exceptionally large	156
2.26. Government transfers to public hospitals have increased	158
2.27. Japan's taxes on goods and services, and personal income are relatively low ..	159
2.28. Social security contributions have risen significantly during the past 25 years	160
2.29. Japan's consumption tax is relatively low	161
2.30. Replacing income deductions with a tax credit lowers the burden on low-income households	164
2.31. Social security contributions pose heavy burdens on non-regular workers ...	165
2.32. The effective personal income tax rate on high earners is reduced by low rates on capital gains	166
2.33. Environmentally-related taxes in Japan are well below the OECD mean	167
