<b>Basic statistics of New Zealand, 2016</b> .....	8
<b>Abbreviations and acronyms</b> .....	9
<b>Executive summary</b> .....	11
<b>Assessment and recommendations</b> .....	15
New Zealand is enjoying a strong, broad-based economic expansion .....	19
Ensuring price and financial stability .....	25
Adjusting fiscal policy to enhance growth and prepare for future shocks and population ageing .....	31
Improving productivity in New Zealand's economy .....	34
Adapting to the changing labour market .....	43
Making growth more environmentally sustainable .....	62
Bibliography .....	67
<b>Annex. Progress in structural reform</b> .....	71

### Thematic chapters

<b>Chapter 1. Improving productivity in New Zealand's economy</b> .....	77
New Zealand's productivity performance in an international context .....	78
Factors contributing to New Zealand's poor productivity performance .....	84
Policy measures to facilitate global connections .....	88
Fostering competition and addressing policy barriers to agglomeration .....	99
Facilitating capital investment .....	107
Investment in innovation .....	111
<i>Recommendations to improve productivity in New Zealand's economy</i> .....	115
Bibliography .....	116
<b>Chapter 2. Adapting to the changing labour market</b> .....	123
The labour market implications of technical change .....	125
Adapting to technical change that favours high-skilled workers .....	140
<i>Recommendations to enhance adaptation to the changing labour market</i> .....	170
Bibliography .....	171

### Boxes

1. Macro-financial vulnerabilities .....	27
1.1. Cross-country comparison of business sector productivity .....	81
1.2. Industry-level comparison of labour productivity in New Zealand and Australia ..	83
1.3. New Zealand-Australia economic relations .....	98

1.4. The effects of weak competition on construction industry productivity . . . . .	100
2.1. Measuring qualifications, field-of-study and skills mismatches . . . . .	151
2.2. Skills mismatch, productivity and policies in New Zealand: Evidence from PIAAC . . . . .	161

## Tables

1. Macroeconomic indicators and projections . . . . .	21
2. Possible extreme shocks affecting the New Zealand economy . . . . .	25
3. Past OECD recommendations on price and financial stability . . . . .	30
4. Fiscal consolidation is set to continue . . . . .	33
5. Past OECD recommendations on policies to prepare for future shocks and population ageing . . . . .	34
6. Past OECD recommendations on improving productivity . . . . .	39
7. Levels and changes in occupational employment shares in New Zealand, 1991-2011 . . . . .	45
8. Impact of net migration on the skills of the population . . . . .	48
9. Earnings premiums for NZ workers by level of educational attainment . . . . .	48
10. Educational attainment by highest level of qualification . . . . .	48
11. Past OECD recommendations on adapting to the changing labour market . . . . .	54
12. Prevalence of field-of-study mismatch by field . . . . .	57
13. Past OECD recommendations on making growth more environmentally sustainable . . . . .	64
1.1. Industry composition of market sector productivity differences . . . . .	84
1.2. Key advantages and disadvantages of introducing a broad-based capital gains tax . . . . .	110
1.3. Relative strengths of tax incentives and grants to support business R&D . . . . .	114
2.1. Levels and changes in occupational employment shares in New Zealand, 1991-2011 . . . . .	127
2.2. Impact of net migration on the skills of the population . . . . .	132
2.3. Earnings premiums for NZ workers by level of educational attainment . . . . .	132
2.4. Education attainment by highest level of qualification . . . . .	133
2.5. Employment, unemployment and inactivity rates by educational attainment and age group . . . . .	133
2.6. Prevalence of field-of-study mismatch by field . . . . .	154
2.7. Mismatch and labour productivity in OECD countries: controlling for the overlap between the components of qualification and skills mismatch . . . . .	159
2.8. The effect of policy-related factors on skills mismatch . . . . .	161

## Figures

1. Inclusiveness and well-being . . . . .	17
2. Sources of real income differences across OECD countries, 2015 . . . . .	18
3. Breakdown of GDP per capita growth, 1995-2015 . . . . .	19
4. Factors driving the economic expansion . . . . .	20
5. Labour market developments . . . . .	22
6. Expected and actual inflation and interest rates . . . . .	23
7. External sector indicators . . . . .	24
8. House prices . . . . .	26

9. Evolution of macro-financial vulnerabilities since 2007 .....	27
10. House prices and population pressure .....	28
11. Household debt and bank market funding .....	30
12. Fiscal indicators .....	32
13. Labour productivity .....	35
14. Gross fixed non-residential capital formation. ....	36
15. Expenditure on research and development. ....	36
16. Inward direct investment stock. ....	37
17. Corporate income tax rates, 2016 .....	41
18. Direct and indirect funding of business R&D by governments .....	42
19. Firms collaborating on innovation with higher education or research institutions .....	43
20. Long-run broad occupational employment shares .....	44
21. Educational attainment gap between young and old, 2015. ....	46
22. Level of educational attainment of the young, 2015. ....	47
23. Firms facing skills shortages .....	49
24. Risk of job automation .....	50
25. Share of NZ workers with high automation potential by education attainment and income level .....	50
26. Information-processing skills .....	51
27. Proficiency in problem solving in technology-rich environments among adults .....	52
28. New Zealand's average PISA scores have fallen .....	52
29. Percentage of students at each proficiency level. ....	53
30. PISA performance in mathematics, 2015 .....	53
31. Influence of socio-economic background on PISA scores in mathematics. ....	54
32. Qualifications and field-of-study mismatch .....	56
33. Percentage of workers with literacy skills mismatch .....	59
34. Counterfactual productivity gains from reducing skills mismatch .....	60
35. Estimated gains to labour productivity from adopting best-practice policies to reduce skills mismatch. ....	61
36. Growth of nitrogen balances and milk production in New Zealand .....	63
37. Marine and terrestrial protected areas, selected OECD countries .....	65
38. Environmental indicators .....	66
1.1. GDP per capita and hourly labour productivity. ....	79
1.2. Labour productivity growth decomposition. ....	80
1.3. Gross fixed non-residential capital formation. ....	80
1.4. Productivity trends in the business sector .....	82
1.5. New Zealand labour productivity relative to Australia. ....	83
1.6. Average management quality score in the manufacturing and retail sectors. ....	86
1.7. Job creation by new firms and age composition of small businesses .....	86
1.8. Enterprise birth and death rates .....	87
1.9. Comparison of long-term real interest rates .....	88
1.10. Sources of finance .....	89
1.11. Expenditure on research and development. ....	90
1.12. Investment in knowledge-based capital, 2015. ....	90
1.13. Fixed broadband indicators .....	91

1.14. Mobile broadband indicators .....	92
1.15. Services trade restrictiveness index by sector .....	93
1.16. Global value chain participation, 2011 .....	94
1.17. Trade facilitation measures .....	95
1.18. Inward direct investment stock .....	96
1.19. Corporate income tax rates, 2016 .....	109
1.20. Collaboration by NZ researchers .....	112
1.21. Direct and indirect funding of business R&D by governments .....	113
2.1. Long-run broad occupational employment shares .....	126
2.2. Job polarization: employment growth of occupations by computer use in the United States .....	128
2.3. Educational attainment gap between young and old, 2015 .....	129
2.4. Level of educational attainment of the young, 2015 .....	130
2.5. Decomposition of tertiary education attainment by age group, 2015 .....	131
2.6. Firms facing skills shortages .....	134
2.7. Employment at high risk of automation .....	135
2.8. Risk of job automation .....	136
2.9. Share of NZ workers with high automation potential by education attainment and income level .....	137
2.10. Disability benefits .....	138
2.11. Employment rates of lone parents vs partnered mothers .....	139
2.12. Information-processing skills .....	142
2.13. Proficiency in problem solving in technology-rich environments among adults .....	143
2.14. Return to numeracy skills across PIAAC countries .....	143
2.15. The age profile of information-processing skills .....	144
2.16. Use of information-processing skills .....	145
2.17. High-performance work practices .....	146
2.18. New Zealand's average PISA scores have fallen .....	147
2.19. Percentage of students at each proficiency level .....	147
2.20. PISA performance in mathematics, 2015 .....	148
2.21. Influence of socio-economic background on PISA scores in mathematics .....	148
2.22. Qualifications and field-of-study mismatch .....	152
2.23. Overlap of over-qualification and field-of-study mismatch .....	153
2.24. Participation in formal/non-formal education .....	156
2.25. Percentage of workers with literacy skills mismatch .....	160
2.26. Counterfactual productivity gains from reducing skills mismatch .....	160
2.27. The probability of skills mismatch and policies .....	163
2.28. Estimated gains to labour productivity from adopting best practice policies to reduce skills mismatch .....	164
2.29. The notice period for individual dismissals in New Zealand is among the shortest .....	165
2.30. Disability policy in OECD countries .....	169
2.31. Effective tax rate for a sole parent moving to low-paid full-time work .....	170
