<b>Basic statistics of France, 2016</b> .....	8
<b>Executive summary</b> .....	9
<b>Assessment and recommendations</b> .....	13
The French economy has many strengths but also faces important challenges ..	14
Making taxes more favourable to employment and productivity while maintaining social protection .....	22
Strengthening productivity growth .....	34
Enhancing employment and access to high-quality jobs .....	39
Improving life in poor neighbourhoods .....	47
Bibliography .....	56
<b>Annex. Progress in structural reform</b> .....	61

### Thematic chapters

<b>Chapter 1. Promoting economic opportunities and well-being in poor neighbourhoods</b> .....	67
Poor neighbourhoods in France .....	69
The evidence for neighbourhood effects and policy implications .....	72
Promoting economic activity in poor neighbourhoods .....	73
Promoting employment in poor neighbourhoods .....	75
Providing children in poor neighbourhoods with greater skills .....	81
Housing and urban-renewal policies to improve living conditions .....	87
Prisons .....	94
Recommendations to improve life in poor neighbourhoods .....	95
Bibliography .....	96
<b>Chapter 2. Improving the efficiency of the health-care system</b> .....	103
Improving the governance of the health-care system .....	109
Improving prevention and the organisation of health-care provision .....	118
Containing pharmaceutical spending .....	130
Investing in prevention and adopting healthier lifestyles .....	135
Recommendations for improving the efficiency of the health-care system .....	141
Bibliography .....	142

## Boxes

1. Key features of the programme of the new government and a preliminary assessment .....	17
2. The benefits of competition in France .....	38
1.1. Priority education in France .....	81
1.2. Social housing in France .....	89
2.1. Future health and long-term care spending needs .....	105
2.2. Budgeting of public health spending and annual spending targets (ONDAM) ..	110
2.3. Hospital payments and the diagnosis-related group (DRG) system .....	128

## Tables

1. Macroeconomic indicators and projections .....	18
2. Events that could lead to major changes in the outlook .....	20
3. Composition of public spending by main component .....	23
4. Past OECD recommendations to reduce the weight of public spending and boost its efficiency .....	25
5. Past OECD recommendations for a tax system promoting sustainable growth ..	32
6. Past OECD recommendations for improving competition and the business environment .....	37
7. Past OECD recommendations for improving training .....	41
8. Past OECD recommendations to strengthen employment .....	44
9. Past OECD recommendations on housing .....	55
1.1. Schooling outcomes in urban policy neighbourhoods .....	71
2.1. Projected increase in public health spending in France, 2010-60 .....	105
2.2. Structure of financing of different medical goods and services, 2006-15 .....	114
2.3. Structure of health-care expenditures, 1995-2015 .....	120

## Figures

1. The average person has enviable well-being in France .....	14
2. France has many strengths .....	15
3. The country also faces many challenges .....	16
4. Macroeconomic indicators .....	19
5. Structure of trade in goods, 2016-17 .....	20
6. Without policy changes the debt-to-GDP ratio is set to increase further .....	21
7. The size of government is large .....	22
8. Average effective age of labour-market exit in 2014 .....	24
9. Health outcomes are good, but spending is high .....	26
10. Health outcomes and access to care are unequal .....	26
11. Spending on prevention is low .....	27
12. Spending on pharmaceuticals and prescriptions is high .....	28
13. Hospital admissions and spending on in-patient care are high .....	29
14. High corporate tax rates go along with low revenues .....	30
15. Taxes on labour remain high .....	30
16. Structure of tax revenues, 2015 .....	31
17. Taxes have limited effectiveness in reducing income inequality .....	31
18. VAT revenue shortfall due to tax breaks .....	32
19. Green growth indicators: France .....	33

20. TFP growth has slowed . . . . .	35
21. The use of employment contracts shorter than one month has risen steadily. . .	35
22. The share of adults with no knowledge of ICT is high . . . . .	36
23. Better management and labour relations would support technology adoption . .	36
24. Estimated gains to the level of labour productivity from policy reforms that reduce skills mismatch . . . . .	37
25. Communications prices have declined much faster in France than elsewhere . .	38
26. The lag in R&D investment is partly attributable to the productive structure . .	39
27. The minimum wage is high, 2015 . . . . .	40
28. Despite recent cuts in labour costs, employment in low-wage services sectors is relatively modest . . . . .	40
29. Access to apprenticeships and job-search assistance should improve . . . . .	41
30. Fixed-term contracts are widespread across all qualification levels and seldom lead to stable jobs . . . . .	43
31. Employment Protection Legislation appears to be restrictive overall . . . . .	44
32. Unionisation is weak, while coverage of collective agreements is pervasive . .	45
33. Lack of trust in trade unions and fear of reprisals hinder stronger unionisation. . .	46
34. Residents of poor neighbourhoods face various social handicaps . . . . .	47
35. Population structure in poor neighbourhoods, 2014. . . . .	47
36. Whatever their education, poor neighbourhoods' residents are more likely to be unemployed, 2014 . . . . .	48
37. More disadvantaged children still show weaker educational outcomes, 2015 . .	49
38. Pedagogical training and teacher teamwork are weak . . . . .	49
39. Joint teaching and adapting teaching to heterogeneous abilities are underdeveloped . . . . .	50
40. Grade repetition is high. . . . .	51
41. Housing tenure across households by income decile. . . . .	53
42. Price responsiveness of housing supply . . . . .	54
43. Increase in the prison population and overcrowding. . . . .	56
1.1. Poverty and social problems in France . . . . .	68
1.2. The concentration of income groups in neighbourhoods of OECD metropolitan areas. . . . .	69
1.3. Population structure and unemployment in poor neighbourhoods, 2014. . . . .	70
1.4. Inhabitants of poor neighbourhoods report more problems than others . . . . .	71
1.5. Skill test scores for adults are relatively poor, especially in the case of immigrants . . . . .	76
1.6. Participation rates in early-childhood education . . . . .	79
1.7. The minimum wage is high, 2015 . . . . .	80
1.8. Despite recent cuts in labour costs, employment in low-wage services sectors is relatively modest . . . . .	80
1.9. Teachers feel not well prepared in pedagogy, while access to continuing training is weak . . . . .	82
1.10. Teachers' involvement in teamwork is limited . . . . .	83
1.11. Joint teaching and adapting teaching to heterogeneous abilities are underdeveloped . . . . .	84
1.12. Grade repetition is high. . . . .	86

1.13. School segregation is significant, and outcomes in disadvantaged schools are weak .....	87
1.14. Social housing tenure and household expenditure on housing across OECD countries .....	88
1.15. Housing tenure across households by gross income decile .....	90
1.16. Price responsiveness of housing supply .....	90
1.17. Increase in prison population and overcrowding .....	95
1.18. Suicide rates in penal institutions in EU countries .....	95
2.1. Life expectancy and population ageing .....	104
2.2. Selected indicators of health-care quality .....	106
2.3. Health spending .....	107
2.4. Health disparities .....	108
2.5. The financing of health-care spending .....	109
2.6. Public health spending .....	111
2.7. Special scheme for long-term diseases (ALD), 2014 .....	112
2.8. The health system is redistributive .....	112
2.9. Access to complementary health insurance schemes .....	115
2.10. Access to complementary health insurance schemes by age groups .....	117
2.11. Health administrative spending is high .....	118
2.12. Selected indicators of prevention and co-ordination among health-care providers .....	121
2.13. Selected primary-care outcomes .....	123
2.14. Density of physicians and payments .....	124
2.15. The hospital sector, 2015 .....	127
2.16. Hospital use .....	129
2.17. Pharmaceutical consumption and prices .....	131
2.18. Retail sales of pharmaceuticals .....	132
2.19. Consumption of generics .....	133
2.20. Tobacco consumption .....	135
2.21. Alcohol consumption and prices .....	136
2.22. Prevalence of overweight individuals and food diet .....	137
2.23. Occupational risks .....	138
2.24. Sick days and days missed for occupational accidents and diseases .....	139
2.25. Urban air pollution .....	140

[Consulta en línea desde MEYSS](#)

<b>Basic statistics of Estonia, 2016</b> .....	8
<b>Executive summary</b> .....	9
<b>Assessment and recommendations</b> .....	13
Introduction.....	14
Growth is projected to gather pace.....	17
Fiscal and social policies could better sustain inclusive growth.....	24
Unleashing productive investment and export performance.....	35
Transitioning to a greener economy.....	50
Bibliography.....	54
<b>Annex. Progress in structural reform</b> .....	57

### Thematic chapters

<b>Chapter 1. Getting the most out of trade</b> .....	63
Estonia is well integrated in global trade.....	64
Policies can further deepen integration in global trade and boost productivity ...	72
Making trade work for all.....	84
<i>Recommendations for capitalising on trade</i> .....	91
Bibliography.....	92
<b>Chapter 2. Reviving productive investment</b> .....	95
Introduction.....	96
Moving towards more productive investment.....	97
Improving investment conditions.....	105
Addressing skill shortages.....	114
Improving infrastructure investment.....	118
Supporting green investment.....	123
<i>Recommendations to revive productive investment</i> .....	127
Bibliography.....	128

### Boxes

1. Draft budget plans.....	26
1.1. Estonia's specialisation.....	70
1.2. Higher productivity of exporters – Estonian firm-level data analysis.....	73
1.3. Building Estonia's brand name.....	83
1.4. Active labour market policies in Estonia.....	86

2.1. Fintech in Estonia . . . . .	112
2.2. Capacity utilisation in rail and ports . . . . .	121

## Tables

1. Macroeconomic indicators and projections . . . . .	17
2. Possible shocks to the Estonian economy . . . . .	24
3. Budgetary and fiscal reforms planned for 2018-20 . . . . .	26
4. Past recommendations for improving fiscal policy . . . . .	28
5. Breakdown of social spending . . . . .	30
6. Past recommendations for reducing poverty . . . . .	32
7. Past recommendations for improving business conditions . . . . .	50
8. Past recommendations for reducing CO <sub>2</sub> emissions and energy consumption . . . . .	53
1.1. Conditions of various labour immigration routes . . . . .	81
1.2. Breakdown of social spending . . . . .	90
2.1. Fintech providers of debt and equity funding in Estonia . . . . .	112

## Figures

1. Income convergence has slowed down . . . . .	14
2. Well-being can be improved . . . . .	15
3. Estonia lags behind in terms of income inequality and poverty . . . . .	16
4. Economic indicators . . . . .	18
5. Labour market conditions have tightened . . . . .	19
6. Unit labour costs have increased fast . . . . .	19
7. Investment has lost ground . . . . .	20
8. Skill shortages are a major obstacle to investment . . . . .	21
9. House prices are recovering . . . . .	21
10. The financial sector is well capitalised and profitable . . . . .	22
11. Macroeconomic vulnerabilities have diminished since 2007 . . . . .	23
12. Fiscal policy has been prudent . . . . .	25
13. Fiscal space is large . . . . .	27
14. Taxes on immovable property are among the lowest in the OECD . . . . .	28
15. High taxes on low wage earners are set to decrease . . . . .	29
16. Health outcomes vary strongly with socio-economic background . . . . .	31
17. The gender pay gap is high . . . . .	33
18. Gender stereotypes are pronounced . . . . .	34
19. Export orientation and gains in export market shares are comparable to peers . . . . .	35
20. Value added per worker embodied in foreign demand is low . . . . .	36
21. The business environment is favourable . . . . .	37
22. Credit recovery is low . . . . .	38
23. The insolvency regime is inefficient . . . . .	38
24. Employment and participation rates are high . . . . .	40
25. Labour migration is modest . . . . .	40
26. A large share of Estonians feels under-skilled . . . . .	41
27. Businesses are little involved in the provision of vocational education and training . . . . .	42
28. Participation in lifelong learning is good but low educated lag behind . . . . .	44
29. Estonia is a frontrunner in alternative finance but amounts are low . . . . .	45

30. The quality of infrastructure is average .....	46
31. The quality of logistics infrastructure is poor .....	46
32. Investment in intangible capital is well below OECD standards .....	48
33. Innovation capacity is low .....	48
34. Fixed broadband penetration and ICT use could improve .....	49
35. Green growth indicators .....	51
36. Energy consumption is high by international standards .....	53
1.1. Export orientation and gains in export market shares are comparable to peers .....	64
1.2. A snapshot of Estonian foreign trade .....	66
1.3. Unit labour costs have increased fast .....	67
1.4. Estonia is well integrated into global value chains and mostly as a service provider .....	68
1.5. Exporters could import more value added from abroad .....	69
1.6. Complexity of exported goods .....	70
1.7. Employment in exports of higher value added activities increased modestly ..	71
1.8. Domestic value added of exports remains limited though on a par with peer countries .....	72
1.9. Performance of export entrants .....	73
1.10. Scope to improve regulation affecting trade .....	75
1.11. Business-driven innovation and spending on R&D are low .....	76
1.12. Innovation activity is limited .....	77
1.13. Labour migration is modest .....	81
1.14. Annual quota were reached recently, while the number of highly skilled migrants is modest .....	82
1.15. Routine intensive jobs are at risk of automatisation .....	84
1.16. Some groups of population are consistently left behind .....	85
1.17. Businesses are little involved in the provision of vocational education and training .....	87
1.18. Spending on active labour market policies is low .....	89
1.19. The share of social benefits received by the poor is low and has declined ....	90
2.1. Low investment has curbed growth .....	96
2.2. Investment has lost ground .....	98
2.3. Investment intensity has declined in most sectors .....	98
2.4. FDI inflows have dropped and are mostly reinvested earnings .....	99
2.5. Intellectual property products account for a small share of total investment. ...	100
2.6. Fixed broadband penetration and ICT use could improve .....	100
2.7. Innovation capacity is low .....	101
2.8. Low demand and labour shortages are viewed as main obstacles to business growth .....	102
2.9. The GDP slowdown does not fully explain the recent drop in investment ....	103
2.10. Increasing savings have not been used to invest .....	103
2.11. Capital intensity remains well below the OECD average .....	105
2.12. The business environment is favourable .....	106
2.13. Credit recovery is low .....	107
2.14. The insolvency regime is inefficient .....	108
2.15. Firms mainly use internal funds to finance investment .....	110

2.16. A large share of firms does not apply for bank financing because of possible rejection .....	110
2.17. Estonia is a frontrunner in alternative finance but amounts are low .....	113
2.18. A large share of Estonians feels under-skilled .....	114
2.19. Parental leave is the lengthiest in the OECD .....	117
2.20. The quality of infrastructure is average .....	118
2.21. Investments in road and rail have been high .....	119
2.22. The quality of logistics infrastructure is poor .....	120
2.23. Freight flows have declined .....	121
2.24. The share of renewables in electricity is low .....	124

<b>Basic statistics of Latvia, 2016</b> .....	8
<b>Executive summary</b> .....	9
<b>Assessment and recommendations</b> .....	13
Income convergence may have resumed but growth needs to become more inclusive .....	14
Fiscal policy to support pressing structural and social policy priorities .....	27
Improving living standards requires boosting productivity and stronger integration in global value chains .....	35
Improving access to housing and health care is key for more inclusive growth. . .	47
Environmental outcomes are good .....	52
References .....	54
<b>Annex. Progress in structural reform</b> .....	59

### Thematic chapters

<b>Chapter 1. Moving up the global value chain</b> .....	67
Stronger integration into global value chains can boost growth and raise living standards .....	68
Policies that boost skills, innovation and resource allocation foster inclusive participation in GVCs .....	83
<i>Recommendations for moving up the global value chain</i> .....	97
Bibliography .....	98
<b>Chapter 2. Making the most of economic and social infrastructure</b> .....	101
Infrastructure and social policies can make the economy more open and inclusive .....	102
Making the most of the Riga metropolitan area .....	110
Lack of affordable housing hampers inclusive development .....	118
Policies to improve health outcomes and reduce health inequalities .....	121
Aligning energy policy with inclusive growth and environmental objectives .....	131
<i>Recommendations to make the most of economic and social infrastructure</i> .....	135
Bibliography .....	136

## Boxes

1.1. Moving up the global value chain .....	77
1.2. Comparative firm-level analysis on the effects of GVC participation .....	78
1.3. The determinants of participation in GVCs .....	81
2.1. Transport planning in Latvia .....	104
2.2. Defining the metropolitan area of Riga .....	110
2.3. General principles for fiscal equalisation across OECD .....	115
2.4. Five steps for effective metropolitan governance reform .....	117
2.5. Planned improvements in access to health care .....	124
2.6. The Tuscan Performance Evaluation Programme .....	128
2.7. The Diabetes programme for community pharmacy in Finland .....	130

## Tables

1. Macroeconomic indicators and projections .....	18
2. Low-probability shocks which could affect the Latvian economy .....	22
3. The Latvian banking sector is robust .....	26
4. Implementation of recommendations to improve public sector efficiency ...	28
5. Implementation of recommendations on the tax system .....	31
6. Implementation of recommendations on vocational education and training ...	40
1.1. Productivity is very low in many non-exporting firms .....	82
2.1. Snapshot of the Riga area .....	111

## Figures

1. Growth has resumed .....	14
2. Housing, health and income are weak and poverty is high .....	16
3. Income inequality is high .....	17
4. Wages are growing, inflation remains slow .....	19
5. Real investment has recovered recently and unemployment has fallen but remains high .....	19
6. Export performance is improving .....	20
7. The shares of most of the largest export destinations have declined .....	20
8. Exports are still concentrated in resource-intensive goods and transport services .....	21
9. Relative unit labour costs have risen .....	21
10. Emigration remains high .....	22
11. Poverty is high in regions with high unemployment rates .....	23
12. Income tax revenues per inhabitant vary strongly .....	23
13. Low-skilled and older workers face the highest risks of unemployment and poverty .....	24
14. Private debt is falling .....	24
15. Lending to the non-financial private sector is weak .....	25
16. House price increases have been aligned with income growth .....	26
17. The share of foreign deposits is large .....	27
18. Public debt can be kept low even with a higher deficit .....	29
19. Taxes on low labour incomes are high .....	31
20. The size of the informal economy is large .....	33
21. Tax revenues are low .....	33

22. Trust in the government is low .....	34
23. High operating costs depress the returns in the private pension system.....	35
24. Productivity growth has slowed.....	36
25. Exporting raises productivity, employment and wages of Latvian firms .....	36
26. Latvia has room to boost productivity through trade and FDI .....	37
27. Latvia's participation in global value chains lags behind peers .....	38
28. Latvia is drawing limited value-added from GVC participation .....	39
29. The knowledge intensity of exports is lower than in many advanced OECD economies .....	39
30. Under-skilling is frequent while over-skilling is rare in international comparison.....	40
31. Expenditure on active labour market policies is low .....	41
32. Research and development expenditure is among the lowest in the OECD ...	42
33. The recovery of debt from insolvent firms is low .....	44
34. Infrastructure still lags behind other countries in the region.....	45
35. Road accident mortality has fallen significantly but it is still high .....	46
36. Many households live in overcrowded housing .....	47
37. Few low-income households rent their homes.....	48
38. Government spending on housing support is low .....	49
39. High out-of-pocket payments limit access to health care .....	51
40. Green growth indicators: Latvia.....	53
1.1. Productivity growth has slowed.....	68
1.2. Latvia has room to boost productivity through trade and FDI .....	69
1.3. Exports are still concentrated in resource-intensive goods and transport services .....	69
1.4. Latvia's export products differ substantially from advanced OECD economies ..	70
1.5. FDI is concentrated in sectors with low knowledge-intensity .....	70
1.6. Participation in GVCs has improved, but it is mainly concentrated to traditional sectors .....	72
1.7. Latvia's use of imported inputs is relatively low and concentrated in low-tech industries .....	73
1.8. GVC participation sustains about one-third of employment in Latvia .....	74
1.9. Latvia is drawing little value-added from GVC participation .....	75
1.10. Value added is small in industries where larger employment is sustained by GVCs .....	76
1.11. The skill and knowledge intensities of GVC participation are modest .....	76
1.12. Value chain activities and associated value added in Latvia.....	77
1.13. Only a handful of Latvian firms export .....	80
1.14. Exporting firms are more productive, especially those participating in GVCs. ...	81
1.15. Exporting raises productivity, employment and wages of Latvian firms .....	83
1.16. Under-skilling is frequent while over-skilling is rare in international comparison.....	84
1.17. Participation in lifelong learning is low .....	86
1.18. Low educated employees face particularly large skills gaps.....	87
1.19. Latvia is not attracting highly educated immigrants .....	88
1.20. Research and development expenditure is among the lowest in the OECD ...	89
1.21. Business-driven innovation is low .....	90

1.22. Co-operation with higher education or research institutions in innovation is low .....	91
1.23. The recovery of debt from insolvent firms is low .....	93
1.24. The size of the informal economy is large .....	94
1.25. Trust in the government is low .....	95
1.26. Barriers to service trade are low overall .....	97
2.1. Infrastructure still lags behind other countries in the region .....	103
2.2. Poverty is high in regions with high unemployment rates .....	104
2.3. Average ship-turnaround times in days in Latvia are similar to competing ports. ....	105
2.4. Rail freight transport remains close to historic highs .....	106
2.5. Road accident mortality has fallen significantly but it is still high .....	108
2.6. Latvia and delimitations of the Riga metropolitan area. ....	110
2.7. GDP of the Riga metropolitan area is lower than in most similar-sized European metropolitan areas. ....	112
2.8. Population has declined in many municipalities but has grown in municipalities surrounding Riga. ....	113
2.9. Income tax revenues per inhabitant vary strongly .....	115
2.10. Few low-income households rent their homes .....	119
2.11. Life expectancy at birth in Latvia is low .....	121
2.12. The difference in life expectancy between Latvians with high and low educational attainment is large .....	122
2.13. Government health spending is low .....	123
2.14. High out-of-pocket payments limit access to health care .....	125
2.15. Access to care varies across regions in Latvia .....	126
2.16. The density of practicing medical doctors varies across regions .....	127
2.17. Cervical and breast cancer screening is not very common in Latvia .....	129
2.18. Fossil fuels still meet more than half of energy needs. ....	132
2.19. Greenhouse gas emissions have stopped falling. ....	133
2.20. Energy consumption in residential buildings is still high .....	134
