<b>Basic statistics of Ireland, 2016</b> .....	<b>8</b>
<b>Executive summary</b> .....	<b>9</b>
<b>Key Policy Insights</b> .....	<b>15</b>
Recent macroeconomic developments and short-term prospects .....	18
Solving the legacies of the crisis by buttressing the financial system and public finances .....	27
Addressing medium-term challenges for wellbeing .....	39
Bibliography .....	52
Annex - Progress in structural reform .....	55
Appendix – Estimating underlying housing demand .....	61
<b>Reforms for sustainable productivity growth</b> .....	<b>67</b>
Productivity among local firms has stagnated .....	68
Enhancing business dynamism .....	82
Enhancing the allocation of finance .....	96
Maximising knowledge spillovers to local firms .....	107
Bibliography .....	117

### Tables

Table 1. Macroeconomic indicators and projections .....	21
Table 2. Possible shocks to the Irish economy .....	24
Table 3. Past recommendations related to improving financial stability .....	31
Table 4. Share of total tax revenues by tax head, % .....	32
Table 5. Potential impact of structural reforms on GDP per capita after 10 years .....	35
Table 6. Illustrative fiscal impact of recommended reforms .....	38
Table 7. Past recommendation related to health spending .....	46
Table 8. Past recommendation related to improving access and affordability of childcare .....	51
Table 1.1. Estimating the foreign ownership productivity premium .....	80
Table 1.2. Estimating productivity spillovers .....	81
Table 1.3. Four alternative resolution mechanisms for personal insolvency in Ireland .....	95
Table 1.4. Financing sources used in Ireland more than in other euro area countries .....	97
Table 1.5. Funds that provide access to finance for small businesses in Ireland .....	104
Table 1.6. Managerial skills and dispersion across firms .....	113

### Figures

Figure 1. Many Irish firms believe they are negatively exposed to Brexit .....	16
Figure 2. Most businesses have experienced a decline in productivity .....	17
Figure 3. Growth in modified GNI has recently been weaker than GDP .....	18

Figure 4. Domestic demand has been solid .....	19
Figure 5. Export performance has been strong and the current account balance has improved.....	20
Figure 6. Property prices are rising strongly .....	22
Figure 7. Private sector indebtedness remains high .....	23
Figure 8. Macro-financial vulnerabilities remain high in some areas .....	24
Figure 9. There are disparities in sectoral impacts under the Brexit scenario .....	26
Figure 10. The size of banks has been reduced .....	27
Figure 11. The non-performing loan ratio remains high .....	28
Figure 12. The process of collateral repossession is slow .....	29
Figure 13. Tighter macro-prudential policy is not warranted at this stage.....	31
Figure 14. Public debt ratios have improved but remain high.....	34
Figure 15. The majority of potential VAT revenues remain uncollected.....	36
Figure 16. Wellbeing is high, but some aspects can be improved.....	39
Figure 17. The current level of housing supply is insufficient to meet future demand .....	40
Figure 18. Green growth indicators are mixed.....	43
Figure 19. Many Irish people are unsatisfied with the health system .....	44
Figure 20. There are lengthy waiting times for medical procedures .....	45
Figure 21. Labour utilisation remains low and differs across groups.....	47
Figure 22. High market income inequality is reduced by the tax and transfer system.....	48
Figure 23. Net replacement ratios are relatively high .....	49
Figure 24. The active labour market policy spending mix can be improved .....	50
Figure 25. Childcare subsidies will reduce the participation tax rate.....	51
Figure 1.1. A stylised depiction of the factors impacting the magnitude of productivity spillovers.....	68
Figure 1.2. Trend productivity growth has slowed.....	69
Figure 1.3. Most businesses have experienced a decline in productivity.....	70
Figure 1.4. Foreign-owned firms tend to be more productive.....	70
Figure 1.5. Wages are substantially higher in foreign firms.....	71
Figure 1.6. The share of SMEs adopting innovation strategies is high .....	72
Figure 1.7. Both the firm entry rate and exit rate are low in Ireland .....	73
Figure 1.8. Default rates are high for Irish SMEs .....	74
Figure 1.9. The efficiency of resource allocation is weaker for local firms .....	76
Figure 1.10. A decline in the efficiency of resource allocation has pulled down aggregate productivity.....	77
Figure 1.11. Foreign-owned firms are much less likely to source production inputs from Ireland .....	78
Figure 1.12. Disparities in the sourcing behaviour of foreign and local firms differ by sector.....	79
Figure 1.13. Regulatory barriers are low overall but some barriers to entrepreneurship exist.....	83
Figure 1.14. The cost of construction permits is high in Ireland.....	84
Figure 1.15. Electricity costs are high in Ireland.....	85
Figure 1.16. The costs in the legal services sector are high in Ireland.....	86
Figure 1.17. The investment share of government spending is low .....	88
Figure 1.18. Many Irish firms sell online .....	89
Figure 1.19. Capital productivity has declined sharply in Ireland.....	89
Figure 1.20. The insolvency regime for corporate restructuring is efficient .....	92
Figure 1.21. Reforms to bankruptcy law have reduced penalties for failed entrepreneurs .....	93
Figure 1.22. The importance of different types of finance varies across firms .....	96
Figure 1.23. Financing conditions for SMEs remain tight .....	98
Figure 1.24. The ratio of NPLs net of provisions to capital is high .....	99
Figure 1.25. Venture capital investment is higher than in most other OECD countries .....	101
Figure 1.26. Venture capital finance is concentrated in the middle-development stage in Ireland.....	101
Figure 1.27. The alternative stock exchange platform can be developed further.....	103

Figure 1.28. Funding through the Seed and Venture Capital Scheme is concentrated in certain sectors .....	105
Figure 1.29. Funding through the Microenterprise Loan Fund Scheme is diversified .....	106
Figure 1.30. Irish innovators are less likely to collaborate .....	109
Figure 1.31. Public support to business R&D has increased significantly over recent years .....	111
Figure 1.32. Irish R&D tax incentives are more beneficial for profitable firms .....	112
Figure 1.33. Lifelong learning participation is relatively low .....	113
Figure 1.34. Irish-owned companies in most sectors have reduced employee training .....	114
Figure 1.35. Wages are substantially lower in local firms .....	115
Figure A.1. Housing supply is currently lower than underlying demand .....	62
Figure A.2. Future household formation rates are uncertain .....	62
Figure A.3. The current level of housing supply is insufficient to meet future demand .....	63

### **Boxes**

Box 1. Modified GNI – A new indicator of underlying economic activity in Ireland .....	18
Box 2. Simulating the economic effects of an illustrative Brexit scenario .....	25
Box 3. Simulations of the potential impact of structural reforms .....	35
Box 4. Quantifying fiscal recommendations .....	38
Box 1.1. Productivity analysis using OECD MultiProd .....	75
Box 1.2. Estimating productivity spillovers from firm-level data .....	80
Box 1.3. Science Foundation Ireland research centres .....	110

March 2018

[Consulta en línea desde MEYSS](#)

<b>Basic statistics of Israel, 2016</b> .....	8
<b>Executive summary</b> .....	9
<b>Assessment and recommendations</b> .....	13
Maintaining solid increases in living standards and well-being in the longer term will be challenging .....	17
Improving social cohesion would promote sustainable growth .....	37
Bibliography .....	61
<b>Annex A.1. The simulated impact of increasing employment rates on poverty in typical families of the main Israeli communities</b> .....	67
<b>Annex A.2. Progress in structural reform</b> .....	73

### Thematic chapters

<b>Chapter 1. Improving the education system to enhance equity</b> .....	79
Large dispersion in skills contributes to inequalities .....	80
Making the education system more inclusive .....	83
Improving tertiary education to enhance social mobility .....	98
Improving the effectiveness of life-long learning .....	106
Recommendations to improve the education and training system to boost productivity and equity .....	110
Bibliography .....	111
<b>Chapter 2. Improving infrastructure to boost productivity and well-being</b> .....	115
The capacity and quality of current infrastructure need to be enhanced .....	116
Building more infrastructure and improving its efficiency will require reforms in several areas .....	129
Recommendations for promoting suitable and well-functioning infrastructure .....	150
Bibliography .....	152
<b>Annex A.2.1. The Management of Infrastructure for water supply in Israel</b> .....	157

### Boxes

1. Disparities in Israeli society .....	16
2. The high-tech sector: share and development in the Israeli economy .....	18
3. The economic impact of the natural gas discoveries .....	21
1.1. A more equal skills distribution will help to reduce wage inequalities .....	82

1.2. Economic Development Plan for the Arab Sector – Education .....	87
1.3. Funding of tertiary education in Israel .....	99

## Tables

1. Macroeconomic indicators and projections .....	20
2. Possible extreme shocks affecting the Israel economy .....	21
3. Past recommendations on improving the stability and efficiency of the financial system .....	25
4. Past recommendations on fiscal policy .....	29
5. Past recommendations on tax policy .....	30
6. Illustrative fiscal cost and financing of additional spending in the structural reform scenario .....	32
7. Past recommendations on housing policy .....	35
8. Past recommendations on labour market policies .....	40
9. Past recommendations on social policies .....	41
10. Past recommendations on education .....	47
11. Past recommendations on improving product market regulation and lowering trade protection .....	51
12. Past recommendations on infrastructure .....	57
13. Past recommendations on environmental policies .....	59
A.1.1. Gross earnings in 2015 .....	69
2.1. Fiscal consolidation during 1998-2007 .....	122
2.2. Number of airport service providers in selected OECD countries .....	146

## Figures

1. Israel's economy is performing strongly .....	14
2. Well-being outcomes are mixed .....	15
3. Inequality and poverty remain high .....	15
4. Education outcomes are poor for disadvantaged groups, whose share is growing .....	17
5. Exports of goods by market and commodity are fairly diversified .....	19
6. Competitiveness has been hit by exchange rate appreciation .....	19
7. Evolution of macro-financial vulnerabilities .....	22
8. Capital ratio and non-performing loans .....	22
9. Inflation developments according to the CPI .....	23
10. The labour market continues to tighten .....	23
11. Packages sent to Israel from abroad are rising rapidly .....	24
12. Inflation expectations are low in the short term but within the target range thereafter .....	24
13. Market interest rates have stabilised, but mortgage rates have risen somewhat ..	26
14. Banks' exposure to the housing sector is high, but housing credit has slowed. ..	26
15. The gap in GDP per capita with the OECD average could shrink further with ambitious reforms .....	27
16. Factors contributing to the gross debt-to-GDP decline between 1998 and 2016 ..	28
17. Primary civilian expenditure .....	29
18. Public debt sustainability would benefit from the enactment of further reforms ..	32
19. House prices are elevated and still rising .....	33

20. Household spending on housing has increased, but total household debt is low . . . . .	34
21. Housing supply has strengthened. . . . .	35
22. Investing in real estate picked up sharply after 2007 . . . . .	36
23. Participation rates have improved markedly, particularly for disadvantaged groups . . . . .	37
24. There is a high share of low-paid jobs in the labour market. . . . .	38
25. Spending on ALMPs, especially training programmes, is low . . . . .	39
26. The gender wage gap is pronounced. . . . .	40
27. Poverty rate before and after taxes and transfers . . . . .	41
28. The share of working poor is high and increasing . . . . .	42
29. Higher employment of Haredim and Israeli-Arabs may not be enough to lift them out of poverty. . . . .	43
30. Child poverty is high, while effort to overcome it is low . . . . .	44
31. High inequalities are related to differences in skills . . . . .	45
32. Education financing remains low, especially at secondary level . . . . .	46
33. Poorer students, Haredi and Israeli-Arab students are less likely to enrol in tertiary education . . . . .	49
34. Israel's business environment remains less favourable than in other OECD countries. . . . .	50
35. The productivity penalty of small firm size is fairly high in Israel. . . . .	50
36. Israel could do more to facilitate trade. . . . .	52
37. There is room to further reduce barriers to trade in services . . . . .	52
38. Tax procedures for businesses are onerous . . . . .	53
39. Regulatory management processes can be enhanced . . . . .	54
40. Public investment in Israel doesn't match its population density, which is rising rapidly . . . . .	55
41. Inadequate public transport and infrastructure, especially in Arab areas, hinders well-being. . . . .	56
42. Lack of competition weakens efficiency in airport management. . . . .	58
43. Environmental indicators . . . . .	60
A.1.1. Families with one breadwinner are less likely to escape poverty. . . . .	70
A.1.2. Large families even with two breadwinners would not necessary escape poverty . . . . .	71
A.1.3. Higher employment of Haredim and Israeli-Arabs may not be enough to lift them out of poverty. . . . .	72
1.1. Adults in Israel have weak numeracy skills with significant variability . . . . .	80
1.2. Israel has many low-paid workers, and the effect of skills on wages is particularly strong . . . . .	82
1.3. The impact of skill inequality on wage inequality . . . . .	83
1.4. The shares of Israeli-Arab and Haredi pupils are increasing. . . . .	84
1.5. Israel lags considerably in students' school outcomes, particularly in case of Arab students . . . . .	84
1.6. Education financing remains low, especially at secondary level . . . . .	86
1.7. Shortages of teachers are prevalent in Israel. . . . .	88
1.8. Quality of teachers is weak, particularly in disadvantaged schools. . . . .	89
1.9. Salaries are relatively low for young and starting teachers. . . . .	89

1.10. Arab students have worse PISA outcomes and lower educational attainment . . .	91
1.11. Young Haredi adults' skills are weak . . . . .	92
1.12. The share of students in VET is slightly below the OECD average . . . . .	94
1.13. Vocational tracks differ significantly . . . . .	95
1.14. Participation in work-based vocational training is weak . . . . .	96
1.15. Share of tertiary graduates is high in Israel . . . . .	98
1.16. Number of students enrolled in tertiary education . . . . .	99
1.17. Annual expenditures per student in tertiary education . . . . .	99
1.18. Poorer students, Haredi and Israeli-Arab students are less likely to enrol in tertiary education . . . . .	101
1.19. Haredim and Israeli-Arabs are most likely to drop out from tertiary studies . . . . .	102
1.20. Tuition fees charged by public institutions and share of students with financial subsidies . . . . .	103
1.21. Mismatched workers are higher in Israel . . . . .	104
1.22. Workers who are mismatched suffer a large wage penalty in Israel . . . . .	105
1.23. Differences in skills between younger and older age cohorts are substantial . .	107
1.24. Spending on ALMPs, especially training programmes, is low . . . . .	108
1.25. There is a high share of workers with low levels of skills . . . . .	109
2.1. Snapshot of Israel's transport infrastructure . . . . .	117
2.2. Electricity production from renewables and air pollution . . . . .	118
2.3. Telecommunications indicators . . . . .	119
2.4. Intensity of freshwater use . . . . .	119
2.5. Medical beds . . . . .	120
2.6. Indicators of regional variation in well-being . . . . .	120
2.7. Stock of capital and investment in public transport . . . . .	121
2.8. Public investment . . . . .	122
2.9. Investment in transport infrastructure and population pressure . . . . .	123
2.10. Commercial and industrial area in relation to residential area in Israeli cities . .	124
2.11. Areas for public amenities . . . . .	125
2.12. Product market regulation in the network industries . . . . .	126
2.13. Socio-economic index – Arab vs Jewish municipalities . . . . .	127
2.14. Total hospital inpatient spending . . . . .	132
2.15. Deaths from infectious and parasitic diseases . . . . .	132
2.16. Infrastructure governance indicators, 2016 . . . . .	137
2.17. Change over time in transport investment plans for 2015 . . . . .	138
2.18. Fixed broadband connection . . . . .	142
2.19. Telecom companies margins . . . . .	142
2.20. Internet package prices per download speed . . . . .	143
2.21. Hydrogeological situation of the main natural water sources . . . . .	145
2.22. Air transport connectivity index, 2015 . . . . .	146
2.23. Airport management indicators . . . . .	147
A.2.1. Intensity of freshwater use . . . . .	157
A.2.2. Water prices . . . . .	159
A.2.3. Water by source and consumption . . . . .	161

<b>Chapter 1. Strengthening innovation in Poland</b> .....	67
Introduction .....	68
Poland's capacity to innovate needs to be strengthened .....	69
Strengthening the quality of higher education and research .....	76
Developing enterprise and innovative activity .....	84
<i>Recommendations to strengthen innovative capacity in Poland</i> .....	100
Bibliography .....	101
<b>Chapter 2. Financing innovative business investment</b> .....	105
Financing innovative business investments .....	110
Improving incentives for innovative investments .....	127
<i>Recommendations to boost innovative investment</i> .....	133
Bibliography .....	134

### Boxes

1. Structural funds of the European Union .....	18
2. The Strategy for Responsible Development .....	18
3. Debt sustainability analysis and quantification of structural reforms .....	28
4. The authorities' strategy to improve tax compliance .....	29
1.1. A tale of two high-tech inventions .....	83

1.2. Aligning education better with business needs – examples from the Łódź region . . . . .	90
1.3. Firms addressing skill gaps by sponsoring dual vocational education programmes . . . . .	94
1.4. Innovation through public procurement in Poland. . . . .	99
2.1. The 2016 and 2017 innovation laws and the Polish Development Fund (PFR) . . . .	115
2.2. PFR ventures and the development of venture capital. . . . .	126

## Tables

1. Macroeconomic indicators and projections . . . . .	20
2. Events that could lead to major changes in the outlook . . . . .	26
3. Potential impact of selected structural reforms . . . . .	29
4. Government fiscal plans until 2025 and OECD's recommendations . . . . .	30
5. Past OECD recommendations on fiscal policy, public investment and green growth. . . . .	32
6. Gross pension replacement rates for average income earners entering the labour market in 2017. . . . .	36
7. Past OECD recommendations on labour market policy . . . . .	41
8. Past OECD recommendations to enhance skills . . . . .	48
9. Past OECD recommendations on improving the investment framework . . . . .	55
1.1. Poland's research and innovation system . . . . .	74
2.1. EU Structural and Investment Funds for innovation in Poland, 2014-20. . . . .	119
2.2. External financing techniques for SMEs and entrepreneurs . . . . .	124

## Figures

1. GDP growth and catch-up with living standards in other OECD countries are continuing . . . . .	14
2. Poland's performance in the OECD's Better Life Index is mixed, 2017 . . . . .	15
3. Life expectancy continues to improve . . . . .	15
4. Population at risk of poverty is in line with the EU average . . . . .	16
5. The working-age population will decline sharply . . . . .	16
6. Investments to promote high-quality science and business innovation are needed. . . . .	17
7. Poland's structure of trade in goods is well diversified . . . . .	21
8. Growth in services exports has been strong . . . . .	21
9. The labour market is tightening . . . . .	22
10. Hiring of immigrant workers is increasing sharply . . . . .	22
11. Investment contracted abruptly with the switchover to the new budgetary period for EU funds . . . . .	23
12. The reported quality of Poland's capital stock is low, 2015 . . . . .	23
13. Inflation is close to the NBP's target . . . . .	24
14. Consumers' and firms' inflation expectations . . . . .	24
15. The financial sector appears resilient. . . . .	25
16. Evolution of macro-financial vulnerabilities . . . . .	25
17. Poland's public support for families is now probably above the OECD average. . .	27
18. The debt-to-GDP ratio is expected to be stable . . . . .	28

19. The tax burden is relatively low, and the system's impact on redistribution is weak. ....	31
20. Green growth indicators: Poland .....	33
21. Fixed broadband penetration and ICT use in enterprises .....	35
22. Women's average effective age of retirement is among the lowest in the OECD, 2016. ....	37
23. The share of minimum pensioners among women is expected to increase sharply. ....	37
24. Labour force participation among low-educated women has been declining. ...	39
25. Use of formal childcare is low, especially for children of less-educated mothers .....	40
26. Poland's public spending on long-term care is low. ....	42
27. The supply of researchers is weak, 2015. ....	43
28. Tertiary education spending per student is low .....	44
29. Industry-science cooperation is weak .....	46
30. Labour productivity is low across all firm sizes. ....	47
31. Low skills are pervasive among Polish managers, 2012. ....	47
32. Adult participation in lifelong learning remains weak. ....	48
33. Short-cycle tertiary programmes should be strengthened .....	50
34. Venture capital investment is very low in Poland .....	51
35. Public support for business R&D is low .....	51
36. Poland makes extensive use of government loan guarantees for SMEs .....	53
37. Until recently Poland received less foreign direct investment than its CEEC neighbours. ....	54
38. Regulatory restrictions on FDI could be eased further. ....	54
39. The business environment is improving, but the State's presence remains pervasive .....	55
40. Bankruptcy procedures are lengthy .....	56
41. Setting up a business and paying taxes remain onerous. ....	57
1.1. Poland's per capita income is converging, but a challenging demographic decline lies ahead .....	68
1.2. Productivity growth has been strong, with industrial restructuring as a key factor. ....	69
1.3. The employment share in more innovative industries is relatively weak. ....	70
1.4. Labour productivity is relatively low, particularly among microenterprises. ...	71
1.5. Spending on innovation is low and mainly aimed at existing technologies. ...	71
1.6. The gap in R&D intensity with more advanced economies is pervasive .....	72
1.7. Stock of inward FDIs in R&D-intensive industries .....	73
1.8. Patents counts and trademark applications are low .....	74
1.9. Quality in tertiary education has improved, but some weaknesses persist ...	76
1.10. Research output is relatively weak and poorly integrated within international research networks .....	77
1.11. The supply of researchers is weak, 2015. ....	78
1.12. Spending on tertiary education should be increased further, 2014 .....	80
1.13. The quality of management is relatively low in domestic firms. ....	85
1.14. Setting up a business and paying taxes remain onerous. ....	86
1.15. The Łódź special economic zone has performed particularly strongly, 2005-15 ..	90

1.16. Lifelong learning is underdeveloped, especially for low-skilled and senior individuals. ....	92
1.17. The skills of students and graduates from basic vocational schools are weak, 2012 .....	93
1.18. Low skills are pervasive and weigh on labour market outcomes, 2012 .....	96
1.19. Demand for innovation is low, 2016-17. ....	98
1.20. ICT penetration is low, 2016 .....	100
2.1. Productivity growth and business investment .....	106
2.2. Business investment and R&D spending .....	107
2.3. Structure of investment .....	108
2.4. Public funding for innovation. ....	109
2.5. Short-term developments in investment. ....	111
2.6. Credit developments and situation of non-financial corporations .....	112
2.7. SMEs and young firms in the economy .....	113
2.8. R&D and innovation expenditures and innovation by firm size. ....	113
2.9. EU Structural and Investment Funds, 2014-20. ....	114
2.10. Design of public support for innovation and stakeholder engagement in Regulatory Impact Assessments, 2014 .....	115
2.11. Poland makes extensive use of government loan guarantees for SMEs .....	117
2.12. Enforcement of contracts, 2017 .....	118
2.13. Public support for business RDI and firm size. ....	119
2.14. The R&D tax relief system .....	120
2.15. Banking sector developments .....	122
2.16. Development of alternative forms of finance .....	124
2.17. Venture capital development .....	125
2.18. FDI investment and integration in global value chains .....	128
2.19. Product market regulation in OECD countries, 2013. ....	129
2.20. Energy and environmental investment .....	130
2.21. Bankruptcy procedures .....	131
2.22. Labour market and regional disparities .....	133
