2.2. A statistical overview of large firms, mid-sized firms and SMEs in Korea ....	119
2.3. Global start-ups .....	136
2.4. A government plan to create an ecosystem to nurture innovative start-ups ..	140
2.5. Korea's Tech Incubator Programme for Startups is based on Israel's programme .....	151

## Tables

1. Korea's top export markets and products .....	23
2. Macroeconomic indicators and projections .....	25
3. Possible shocks to the Korean economy .....	26
4. Government spending in Korea is relatively large in economic affairs .....	28
5. Past recommendations on fiscal policy .....	29
6. The 2017-21 Fiscal Management Plan .....	29
7. Spending priorities are shifting from economic affairs to social welfare .....	30
8. The employment rate in Korea is rising .....	42
9. Past recommendations to increase labour force participation .....	43
10. Non-regular workers account for about a third of employees and earn much less .....	48
11. Non-regular workers receive less social insurance and company-based benefits .....	49
12. Past recommendations to break down labour market dualism .....	49
13. Past recommendations to extend employment and reduce poverty among the elderly .....	51
14. Past recommendations to promote green growth and improve the environment .....	56
A1.1. Comparison of North and South Korea in 2016 .....	63
A2.1. Assumptions of the baseline projection .....	67
1.1. Number of large business groups .....	80
1.2. Listed firms play a key role in the large business groups .....	82
1.3. Inside ownership is high in Korea's large business groups .....	84
1.4. Diversification of the business groups .....	87
1.5. The market position of firms affiliated with the large business groups in 2015 .....	88
1.6. Key regulations imposed on the large business groups .....	93
1.7. Evolution of the Shared Growth Index .....	94
1.8. The number of cases handled by the Korea Fair Trade Commission .....	100
1.9. The quality of corporate governance in Korea does not compare favourably in Asia .....	103
1.10. Background of outside directors .....	106

2.1. A comparison of large firms, mid-sized firms and SMEs . . . . .	120
2.2. SMEs' share of manufacturing value added is edging up . . . . .	121
2.3. SMEs, especially micro-firms, account for most of employment gains . . . . .	122
2.4. SMEs are focused primarily on domestic markets . . . . .	132
2.5. There are a large number of economic regulations on SMEs. . . . .	137
2.6. Government support for female entrepreneurs is low . . . . .	143
2.7. The public-sector's share of venture capital investment is falling but still high . . . . .	148
2.8. A comparison of Israel's TI programme with Korean incubator programmes. . .	151

## Figures

1. Korea's per capita income is converging to the most advanced countries . . . .	18
2. Wage inequality has increased during the past two decades . . . . .	19
3. Output growth has been led by the construction sector . . . . .	21
4. Export growth is led by key industries, notably semiconductors . . . . .	22
5. Consumer price inflation has picked up while housing prices are relatively steady . . . . .	23
6. Korea's current account surplus is explained by trends in the saving-investment balance . . . . .	24
7. Government spending, employment and debt are low in Korea . . . . .	27
8. Public social spending in Korea is rising rapidly from a low base . . . . .	28
9. Citizen satisfaction with the education system and the schools is relatively low in Korea . . . . .	31
10. Spending by the public pension system is projected to rise rapidly . . . . .	32
11. Corporate income tax rates in the OECD area are falling while revenue has stabilised . . . . .	33
12. The value-added tax in Korea generates relatively little revenue, reflecting its low rate . . . . .	34
13. Korea's cycle of monetary easing has ended . . . . .	35
14. The won has been relatively stable during the past few years . . . . .	36
15. Foreign exchange reserves are three times higher than short-term foreign debt . . . . .	36
16. High household debt is a concern in Korea . . . . .	38
17. Evolution of macro-financial vulnerabilities . . . . .	39
18. Minimum wage as a percentage of the median wage in 2016 . . . . .	40
19. Well-being indicators suggest room for improvement in Korea . . . . .	41
20. Labour income inequality is positively correlated with productivity disparities between firms . . . . .	42
21. Trends in maternity and parental leave . . . . .	43
22. Korean women face low wages and hold few managerial positions . . . . .	44
23. Korea has low productivity and high labour inputs . . . . .	45
24. Korea's population ageing will be the fastest in the OECD, leading to a shrinking labour force . . . . .	46
25. Korea has wide wage dispersion and a high share of low-wage workers . . . .	48
26. Women are concentrated in low-paying non-regular jobs . . . . .	49
27. Relative poverty rates for persons over 50 are very high in Korea . . . . .	51

28. The education and skill gap between younger and older workers is large in Korea .....	52
29. The first-tier pension benefit in Korea is very low while the coverage is high .....	54
30. Green growth indicators: Korea .....	55
31. Air pollution is increasing in Korea .....	57
A1.1. The North Korean economy grew rapidly in 2016, despite international sanctions .....	62
A1.2. Inter-Korean trade fell sharply following the closure of the Gaesung Industrial Complex .....	63
A1.3. Trends in North Korean trade .....	64
A2.1. Population ageing rapidly erodes the government's net financial position ...	68
1.1. The share of the large business groups is edging down .....	74
1.2. The price-earnings ratio of Korean firms is relatively low .....	75
1.3. International comparison of business groups' share of stock market capitalisation .....	77
1.4. The number of firms affiliated with the top 30 business groups has risen steadily .....	78
1.5. Intra-group shareholding in the Samsung group in 1997 .....	79
1.6. The largest business groups are increasingly dominant .....	81
1.7. Ownership and control in business groups .....	83
1.8. Inside ownership has been trending up .....	84
1.9. Intra-group trading is substantial for many firms in the large business groups .....	84
1.10. The share of financial firms in the large business groups has risen .....	85
1.11. There is a wide variation in the profitability of firms affiliated with the groups .....	86
1.12. The value added of the top 50 companies .....	88
1.13. The market shares of the business groups by industry .....	89
1.14. Company profitability is influenced by intra-group trading .....	90
1.15. Company profitability is influenced by the structure of ownership .....	91
1.16. Korea has scope to liberalise product market regulation and barriers to trade and investment .....	99
1.17. The share and number of outside directors is rising gradually .....	102
1.18. Factors influencing the probability of outside directors being replaced .....	105
2.1. Korea's output and export growth have slowed sharply .....	116
2.2. Labour income inequality is positively correlated with productivity disparities between firms .....	117
2.3. The share of employment in SMEs in Korea is the highest in the OECD .....	119
2.4. Government credit guarantees for SMEs in Korea are exceptionally high .....	121
2.5. Labour productivity in SMEs in manufacturing is low .....	122
2.6. The ICT sector is large in Korea, and concentrated in manufacturing .....	123
2.7. The proportion of innovative firms among SMEs in Korea matches the OECD average .....	124
2.8. Korean firms lag significantly in their use of key digital technologies .....	125
2.9. The share of capital sunk in non-viable firms .....	126
2.10. The exit rate of companies is very low in Korea .....	127

2.11. Korea ranks slightly below average in the OECD's indicator of insolvency regimes .....	127
2.12. R&D spending and government support for R&D are exceptionally high in Korea .....	128
2.13. Korean firms are less connected to global innovation networks .....	129
2.14. Korea's youth employment rate is below the OECD average and the number of NEETs is high .....	130
2.15. The contribution of services to exports is relatively low in Korea .....	133
2.16. Korea should reduce barriers to trade in key services .....	134
2.17. Service sector productivity is low in Korea .....	135
2.18. Korea R&D in services is the lowest in the OECD .....	135
2.19. Korea is ranked 21st in the 2018 Global Entrepreneurship Index .....	140
2.20. The gender gap in the entrepreneurship rate in Korea is high .....	142
2.21. Female entrepreneurs are concentrated in certain industries .....	143
2.22. Korea's entrepreneurship rate for youth is far below the OECD average.....	144
2.23. The interest rate spread between large firms and SMEs has fallen .....	146
2.24. Venture capital in Korea is among the highest in the OECD .....	148
2.25. The recovery of investment funds through M&As is still low in Korea .....	149
2.26. Investment by angel investors has rebounded but remains below earlier peaks .....	150
2.27. The operating process of TIPS .....	152
