Glossary .....	11
Executive summary.....	13
<b>Key Policy Insights .....</b>	<b>19</b>
Recent developments, macroeconomic policies and short-term prospects .....	23
Economic growth has recently eased towards more sustainable rates as capacity constraints tighten.....	23
Macroeconomic policies are becoming less expansionary.....	27
NAFTA threats and US tax reform are weighing on the outlook.....	29
Economic growth is projected to remain solid.....	33
The housing boom .....	35
Related high household debt is an important economic vulnerability .....	37
Macro-prudential measures have mitigated risks .....	39
Shortages of affordable housing raise inclusiveness issues .....	41
Fiscal sustainability.....	42
Fiscal policies are sustainable overall, but not for all levels of government.....	42
Inclusiveness for women, youth and seniors .....	46
Further steps are needed to narrow the gender wage gap.....	46
Improving labour-market information and skills development would support inclusiveness among young Canadians .....	49
Later retirement should be supported by measures to promote skills and retention of older workers.....	50
Further increases in basic pensions would curb old age poverty .....	53
Initiatives to protect pensions during insolvency should avoid creating barriers to capital reallocation.....	53
Better management of long-term care is needed to shrink waiting lists.....	53
Immigration policy .....	53
Immigration policy has economic, social and humanitarian goals.....	53
Immigration has modest effects on Canada's economy .....	57
Enhancing labour-market integration and well-being of immigrants.....	60
Reforms to increase productivity.....	65
Recommendations from past Surveys .....	66
Good project selection will be critical to harness the productivity benefits from infrastructure investment .....	68
Environmental sustainability .....	68
References.....	72
Annex. Progress in structural reform .....	79
<b>Chapter 1. Increasing inclusiveness for women, youth and seniors.....</b>	<b>83</b>
How inclusive is growth in Canada? .....	84
Income inequality.....	84

Employment .....	88
Population health.....	90
Labour market policy issues relevant for women, youth and seniors .....	91
In-work benefits .....	91
Active labour market policies (ALMPs) .....	92
Minimum wages .....	93
Universal basic income .....	94
Inclusiveness for women .....	95
Gender gaps in wages and employment reduce female incomes .....	95
Increase fathers' use of parental leave .....	98
Increase the availability and affordability of high-quality early childhood education and care (ECEC).....	101
Remove barriers to women's participation in computing and engineering.....	106
Improving well-being for single mothers.....	108
Promoting female entrepreneurship .....	109
Inclusiveness for youth .....	110
A substantial minority of Canadian youth are at risk of becoming detached from the labour market.....	110
Earnings for most young men are yet to recover from earlier declines.....	112
Skills development should continue to be prioritised .....	112
Improve labour market information and dissemination .....	113
Leverage benefits from vocational education and training .....	115
Inclusiveness for seniors aged 55 and above .....	116
There is room to increase employment of seniors.....	118
Reduce marginal effective tax rates for people eligible for GIS payments.....	119
Increase the normal retirement age in line with life expectancy .....	121
Improve skills of older workers through lifelong learning.....	121
Remove other barriers to employment of older workers.....	122
Curb old-age poverty through further real increases in public pensions .....	123
Make long-term care more responsive to user needs .....	125
References.....	129
<b>Chapter 2. Making the most of immigration .....</b>	<b>143</b>
Canada takes a managed approach to immigration.....	145
Immigration has demographic effects but is not a solution to population ageing .....	150
Immigration has become the main source of population growth .....	150
Immigration mitigates population ageing, but the effects are small .....	150
Immigration is increasing university attainment numbers, but immigrants' share of university graduates will not rise much.....	152
Immigration is making Canada more culturally diverse .....	155
Aggregate immigration has modest economic effects .....	156
Effects on real GDP per capita.....	156
Effects on innovation .....	158
Agglomeration economies.....	159
Effects on trade.....	161
Labour-market effects .....	161
Relieving skills shortages through immigration.....	163
Net fiscal impact.....	164
Labour-market integration of immigrants has deteriorated .....	166
Their labour market outcomes have worsened relative to the native-born .....	166

Immigrant earnings have fallen relative to native-born earnings.....	168
The main causes of the decline in immigrant earnings are a change in source countries and declining English and French language skills.....	171
The gap in low-income rates between immigrants and the native born has grown.....	173
Immigrants' children have less favourable labour-market outcomes as adults than the comparably educated native-born.....	173
Improving immigrants' labour-market integration.....	174
Selecting immigrants with better integration prospects.....	174
Enhancing the impact of settlement programmes.....	180
Reduce discrimination.....	184
Facilitating labour-market integration of refugees.....	185
References.....	188

## Figures

Figure 1. Decomposition of potential real GDP per capita growth in Canada .....	20
Figure 2. Well-being in Canada is high.....	21
Figure 3. Income distribution and relative poverty rates <sup>1</sup> .....	22
Figure 4. Factors driving the economic expansion.....	23
Figure 5. Exports of goods by market and commodity .....	24
Figure 6. Adjustment to the fall in commodity prices is complete.....	25
Figure 7. External sector indicators.....	26
Figure 8. The labour market is tightening .....	26
Figure 9. Inflation has returned to near the middle of the Bank of Canada’s target range.....	27
Figure 10. Corporate income tax rates, 2017.....	30
Figure 11. Global value chain (GVC) participation, 2014 .....	31
Figure 12. Evolution of macro-financial vulnerabilities .....	34
Figure 13. House prices have grown rapidly relative to fundamental drivers.....	36
Figure 14. House prices are particularly high in Toronto and Vancouver .....	37
Figure 15. Housing construction has exceeded demand recently, but with considerable geographic variation.....	38
Figure 16. Household debt levels are high, particularly so among some new borrowers .....	39
Figure 17. Homelessness is high and social housing stocks are low .....	41
Figure 18. Government sector net debt and fiscal gap estimates over the long term .....	43
Figure 19. Canadian men spend less time on childcare activities than their female spouses <sup>1</sup> .....	50
Figure 20. Qualifications mismatch <sup>1</sup> is large.....	51
Figure 21. The age distribution of retirement was concentrated around 60 and 65 in 2014 .....	52
Figure 22. Permanent resident admissions and planned levels by main class.....	55
Figure 23. Permanent migration flows by category .....	55
Figure 24. Selected demographic effects of immigration.....	56
Figure 25. Differences in PISA science scores between non-immigrant and immigrants .....	57
Figure 26. Average employment earnings by years since landing .....	57
Figure 27. Average income tax paid in 2014 net of transfers received by years since landing.....	59
Figure 28. Immigration will be essential to working-age population growth .....	59
Figure 29. Immigration has modest effects on the population age structure in the long run .....	60
Figure 30. Predicted male immigrant earnings <sup>1</sup> relative to those of comparable native-born.....	61
Figure 31. Cost-effectiveness of language training by type <sup>1</sup> .....	63
Figure 32. Average time needed to improve one Canadian Language Benchmark <sup>1</sup> .....	64
Figure 33. Average employment earnings for refugees and immigrants by years since landing .....	64
Figure 34. Labour productivity.....	65
Figure 35. Gross fixed non-residential capital formation.....	66
Figure 36. Environmental indicators .....	70
Figure 1.1. Canada’s income distribution is near average, but redistribution is modest.....	85
Figure 1.2. Canada’s relative poverty rate after taxes and transfers is also middling .....	85
Figure 1.3. Canada performs extremely well on intergenerational income mobility <sup>1</sup> .....	86
Figure 1.4. Many students from disadvantaged backgrounds perform well.....	87
Figure 1.5. Regional disparities in household disposable income are high and increasing.....	87
Figure 1.6. Median per capita after-tax income by Aboriginal identity .....	88
Figure 1.7. Employment rates for 15-64 year-olds are high but growing only slowly.....	88
Figure 1.8. Cross-country regression of policy determinants of employment <sup>1</sup> .....	89
Figure 1.9. Life expectancy .....	91
Figure 1.10. Spending on active labour market programmes per unemployed person is low <sup>1</sup> .....	93
Figure 1.11. Labour market gender gaps are relatively small but no longer shrinking .....	96

Figure 1.12. Women in management positions .....	97
Figure 1.13. The gender earnings gap is especially severe for working mothers <sup>1</sup> .....	98
Figure 1.14. Canadian men spend less time on childcare activities than their female spouses <sup>1</sup> .....	98
Figure 1.15. Paid leave entitlements for mothers are near the OECD average .....	99
Figure 1.16. The net cost of childcare <sup>1</sup> for a couple family in 2015 was relatively high .....	102
Figure 1.17. Few Canadian children attended early childhood education for two years or more .....	105
Figure 1.18. Canada's gender equality position in STEM <sup>1</sup> bachelor degree's graduates is mixed .....	107
Figure 1.19. Poverty rates of employed and unemployed single-parent families are high.....	109
Figure 1.20. Slightly fewer youth than average are not in employment, education or training .....	111
Figure 1.21. Youth unemployment is high for those who do not complete high school.....	111
Figure 1.22. Skills gaps between those with and without tertiary education are large.....	112
Figure 1.23. Qualifications mismatch <sup>1</sup> is large.....	114
Figure 1.24. Canada's relative poverty rate after taxes and transfers is low for the over-65s <sup>1</sup> .....	117
Figure 1.25. Employment rates of 55 to 64 year-olds were slightly above the OECD average in 2016.....	118
Figure 1.26. The age distribution of retirement was concentrated around 60 and 65 in 2014 .....	119
Figure 1.27. Incentives to remain in the workforce beyond 55 and 60 vary by age group .....	120
Figure 1.28. The age profile of information-processing skills .....	122
