<b>Basic Statistics of Spain, 2017</b> .....	<b>8</b>
<b>Executive Summary</b> .....	<b>9</b>
<b>Key Policy Insights</b> .....	<b>15</b>
Recent macroeconomic developments and short-term prospects .....	22
The recovery has been robust and balanced .....	22
Growth is set to continue, but at a slower pace .....	25
Strengthening the financial system's resilience to new challenges .....	27
Fiscal policy to manage medium-term sustainability risks .....	32
Fiscal vulnerabilities need to be addressed .....	32
Addressing spending pressures from demographic challenges is crucial .....	35
Addressing medium-term challenges to well-being .....	39
Income and wealth inequality should be further reduced.....	41
There is room to make growth greener .....	55
Boosting productivity and trade.....	57
There is room to increase internationalisation further.....	58
Removing barriers to firm growth will help increase internationalisation.....	60
Migration can facilitate trade .....	65
<b>References</b> .....	<b>68</b>
<b>Annex. Progress in main structural reforms</b> .....	<b>75</b>
<b>Thematic Chapter</b> .....	<b>79</b>
<b>Chapter 1. Reducing regional disparities for inclusive growth</b> .....	<b>81</b>
Challenges for lagging regions .....	84
Regional disparities in well-being are more pronounced than disparities in income .....	84
Regional dispersion in labour market outcomes is high.....	86
Low skills can be a barrier to growth in lagging regions .....	88
Low productivity growth also contributes to regional disparities .....	90
Addressing regional disparities in labour market outcomes .....	93
Improving the employability of low-skilled unemployed.....	93
Boosting labour mobility.....	94
Lowering regional disparities in education outcomes.....	98
Improving the adaptability of workers through lifelong learning .....	100
Ensuring a better matching of skills with labour market needs.....	102
Raising the overall level of basic skills and increasing equality of opportunity .....	107
Boosting productivity and firm dynamism across regions.....	109
Reducing regulatory differences .....	109
Raising the ability of regions to benefit from spillovers.....	111
Getting the most out of decentralisation .....	120
Improving evaluation, coordination and sharing of best practices.....	120
Strengthening the fiscal framework and rules.....	120
<b>References</b> .....	<b>128</b>

## Tables

Table 1. Macroeconomic indicators and projections.....	26
Table 2. Shocks that could strongly impact the Spanish economy.....	27
Table 3. Illustrative fiscal impact of recommended reforms.....	34
Table 4. Past OECD recommendations on fiscal sustainability.....	35
Table 5. Factors associated with greater household wealth accumulation.....	43
Table 6. Past OECD recommendations on tax, social and labour market policies.....	55
Table 7. Potential impact of structural reforms on GDP per capita.....	62
Table 8. Past OECD recommendations on improving the business climate.....	66
Table 1.1. Regional differences in education outcomes.....	99
Table 1.2. Catch up to the national productivity frontier.....	112
Table 1.3. Labour misallocation according to firm age.....	114
Table 1.4. Regional innovation performance.....	117

## Figures

Figure 1. The economy and employment have grown steadily.....	16
Figure 2. High unemployment and debt levels represent vulnerabilities.....	17
Figure 3. Lower labour productivity and labour utilisation both contribute to GDP per capita gaps.....	18
Figure 4. Boosting growth potential requires higher multifactor productivity growth.....	19
Figure 5. Regional dispersion in well-being is high.....	20
Figure 6. The recovery has been strong.....	22
Figure 7. Export performance has been strong.....	23
Figure 8. Structural factors have contributed to the changes in the current account.....	24
Figure 9. Exports have become more diversified.....	25
Figure 10. Macro-financial vulnerabilities have decreased.....	28
Figure 11. Capital ratios have increased, but remain low.....	28
Figure 12. Non-performing loans are falling, but remain high.....	29
Figure 13. House prices are recovering slowly and unevenly.....	30
Figure 14. Home bias in banks' holdings of government bonds is still high.....	31
Figure 15. Private sector debt is declining.....	32
Figure 16. High pension costs highlight the importance of a durable reduction of public debt.....	33
Figure 17. The old-age dependency ratio in Spain will more than double by 2050.....	36
Figure 18. The replacement rate for pensions in Spain remains high for those having a full career.....	38
Figure 19. Operating expenses of private pension systems in selected OECD countries.....	39
Figure 20. Well-being performance is mixed.....	40
Figure 21. Income inequality is high.....	41
Figure 22. Wealth inequality is comparatively low.....	42
Figure 23. Social expenditure is relatively high, but could be better targeted.....	44
Figure 24. Taxation remains tilted towards labour.....	46
Figure 25. Spain is a competitive tourism destination.....	47
Figure 26. The labour market remains segmented.....	49
Figure 27. Wage declines disproportionately affected the lowest deciles during the crisis.....	50
Figure 28. Gender pay gap decreases with education.....	51
Figure 29. The share of workers covered by firm-level collective agreements is low.....	52
Figure 30. Education outcomes vary by socio-economic conditions.....	53
Figure 31. The rate of child poverty is high.....	54
Figure 32. Green growth indicators: Spain.....	56
Figure 33. Environment-related patents are not concentrated on water.....	57

Figure 34. Trade performance could be enhanced further.....	58
Figure 35. Spain can improve its participation in global networks.....	59
Figure 36. The share of exporting SMEs has increased, but remains relatively low.....	59
Figure 37. Employment in SMEs is relatively high, but their productivity is low.....	60
Figure 38. Barriers to entrepreneurship are high.....	61
Figure 39. Public procurement could be better utilised.....	64
Figure 40. Spain has previously not attracted highly educated migrants.....	66
Figure 1.1. Income per capita differs across regions.....	82
Figure 1.2. Per capita income growth has become stronger in richer regions than in poorer ones.....	83
Figure 1.3. Regional disparities in income and poverty are high.....	85
Figure 1.4. Regional disparities may have implications for well-being at the country level.....	86
Figure 1.5. The dispersion of unemployment rates across regions is relatively high.....	87
Figure 1.6. Low levels of education are associated with high unemployment rates at the regional level.....	88
Figure 1.7. School performance displays large regional disparities.....	89
Figure 1.8. Some regions have low demand and supply of skills.....	89
Figure 1.9. Labour productivity is also a driver of regional disparities.....	90
Figure 1.10. There is much scope to boost the productivity of Spanish frontier firms.....	91
Figure 1.11. Investment in intangible assets is low in most regions.....	92
Figure 1.12. Regional differences in terms of the percentage of high productivity firms are high.....	92
Figure 1.13. Within-country dispersion in business survival rates.....	93
Figure 1.14. Annual regional migration rate.....	95
Figure 1.15. Burden of housing costs, especially for tenants and low-income households, is high.....	97
Figure 1.16. Potential gains to productivity from policy reforms that reduce skill mismatch.....	99
Figure 1.17. Participation in life-long learning across Europe by educational attainment.....	101
Figure 1.18. The changes in nature of jobs require new skills.....	104
Figure 1.19. There is scope to improve digital skills.....	105
Figure 1.20. Spanish firms lag in their use of key digital technologies.....	106
Figure 1.21. Grade repetition and early school leaving rates are positively related at the regional level.....	107
Figure 1.22. Education outcomes vary by socio-economic conditions.....	108
Figure 1.23. Economic regulation is relevant for firm growth.....	110
Figure 1.24. Barriers to starting a business and business birth rates at the regional level.....	111
Figure 1.25. Factors and policies to boost spillovers from the frontier.....	113
Figure 1.26. Resource misallocation is heterogeneous across Spanish regions.....	115
Figure 1.27. The share of jobs with high-performance workplace practices is low.....	116
Figure 1.28. Regions have different strengths in terms of exposure to international factors.....	119
Figure 1.29. Distribution of expenditures and revenues across levels of government.....	121
Figure 1.30. Responsibilities of regional governments are large in some areas.....	122
Figure 1.31. Vertical transfers increase dispersion of regional resources.....	124
Figure 1.32. Regional debt indicators.....	125

## Boxes

Box 1. Economic priorities of the new government.....	21
Box 2. Quantifying the fiscal impact of selected policy recommendations.....	34
Box 3. Income and wealth mobility in Spain.....	42
Box 4. Selected tax reforms since 2014.....	45
Box 5. Quantification of structural reforms.....	62
Box 6. Other recommendations on macro and structural policies.....	67

Box 1.1. Responsibilities across different levels of government.....	83
Box 1.2. Recent initiatives in lifelong learning.....	100
Box 1.3. Existing policies to boost digital skills and adoption.....	107
Box 1.4. Achieving good education outcomes: the case of Castilla-Leon .....	109
Box 1.5. Firm productivity convergence in Spain.....	112
Box 1.6. Resource misallocation in Spain.....	114
Box 1.7. Reform of the regional financing system in 2009.....	123
Box 1.8. Recommendations.....	126

<b>Executive Summary</b> .....	<b>9</b>
<b>Key Policy Insights</b> .....	<b>13</b>
Macroeconomy: a good near-term outlook but risks remain.....	15
Monetary policy, housing and financial markets: emerging from the low-interest rate environment.....	23
Fiscal policy: deficit reduction continues.....	26
Transport, urban environments and utilities: substantial ongoing challenges.....	36
Skills: evolving to new needs.....	38
Inclusiveness: scope to narrowing gaps remains.....	41
Business policies: ensuring strong competition and boosting innovation.....	45
Environmental policy: challenges in climate change and biodiversity.....	48
References.....	53
<b>Thematic chapter</b> .....	<b>55</b>
<b>Chapter 1. Benefitting from globalisation and technological change</b> .....	<b>57</b>
Introduction.....	57
Welfare and activation policies to help workers face change.....	79
Raising excellence and equity in education and skills.....	89
Strengthening adaptability to globalisation and technological change in metropolitan areas.....	105
References.....	120

### Tables

Table 1. Macroeconomic indicators and projections.....	19
Table 2. Tail-end scenarios for the Australian economy.....	22
Table 3. Past OECD recommendations on monetary and financial stability.....	26
Table 4. Illustrative fiscal impact of recommended reforms.....	34
Table 5. Illustrative GDP-per-capita impact of recommended reforms.....	35
Table 6. Past OECD recommendations on maintaining fiscal prudence and ensuring efficient tax and public spending.....	35
Table 7. Past OECD recommendations on infrastructure and utilities.....	38
Table 8. Past OECD recommendations on employment, health and welfare.....	44
Table 9. Past OECD recommendations on ensuring competitive and innovative business.....	47
Table 10. Selected components of Australia's current emission-reduction policy.....	51
Table 11. Past OECD recommendations on environment policy.....	52
Table 1.1. Australia's principal metropolitan areas.....	105
Table 1.2. Government responsibilities across selected urban issues.....	108
Table 1.3. Recent planning reform initiatives.....	110
Table 1.4. Key taxes and charges relating to the ownership and use of vehicles.....	113

Table 1.5. An overview of electric-vehicle policy in Australia .....	114
Table 1.6. Selected initiatives supporting and trialing autonomous vehicles in Australia.....	115

## Figures

Figure 1. Strong GDP per capita performance.....	13
Figure 2. Favourable well-being scores .....	14
Figure 3. A range of economic, social and environmental challenges.....	16
Figure 4. Robust output growth with recovering investment and falling unemployment.....	17
Figure 5. Wage and price inflation remain subdued .....	18
Figure 6. House prices are easing but the household-debt burden continues to rise.....	20
Figure 7. Exports of commodities to Asia remain dominant .....	21
Figure 8. Policy-rate normalisation yet to begin, federal budget consolidation continues .....	23
Figure 9. Capital and liquidity positions of banks have improved .....	24
Figure 10. Low public debt and comparatively low government spending.....	27
Figure 11. Federal budget consolidation since the global finance crisis.....	28
Figure 12. A wide range of debt-reduction speeds can be followed.....	29
Figure 13. The Goods and Services Tax rate is low in international comparison.....	32
Figure 14. Education and health indicators point to middle-ranking spending, yet room for better outcomes .....	33
Figure 15. A new surge in government investment is underway .....	36
Figure 16. Australia's PISA performance is weakening .....	39
Figure 17. Motherhood has a strong impact on labour market participation .....	42
Figure 18. Partnered mothers work very short hours.....	42
Figure 19. A favourable regulatory climate for business .....	45
Figure 20. Services Trade Restrictiveness Index .....	46
Figure 21. Environmental indicators.....	50
Figure 1.1. Advanced economies have experienced large rises in living standards .....	58
Figure 1.2. Labour productivity has risen.....	59
Figure 1.3. Higher labour productivity is associated with more employment .....	60
Figure 1.4. There has been no strong long-term trend in hours of work per capita .....	60
Figure 1.5. The sectoral composition of Australian economy has shifted dramatically .....	61
Figure 1.6. The sectoral composition of Australian employment has also changed.....	62
Figure 1.7. Job polarisation in Australia continues.....	63
Figure 1.8. Routine manual jobs in Australia are being replaced by non-routine cognitive and non-routine manual jobs.....	64
Figure 1.9. Growing use of information and communication technologies.....	65
Figure 1.10. There will be further automation of tasks.....	66
Figure 1.11. The share of part-time work is high in Australia, while shares of temporary employment and self-employment are low .....	67
Figure 1.12. The upward trend in casualisation has been reversed.....	68
Figure 1.13. The duration of jobs has not fallen .....	68
Figure 1.14. Australia's labour-market separation rate is high.....	69
Figure 1.15. Displaced workers find new jobs rapidly .....	70
Figure 1.16. Unemployment experience differs across states and territories.....	71
Figure 1.17. Probability of finding employment after being displaced differs across groups of workers.....	72
Figure 1.18. Income inequality in Australia has risen and remains above the OECD average .....	74

Figure 1.19. Growth of incomes in the middle has been comparatively weaker over the last 15 years	75
Figure 1.20. Female participation and the incidence of part-time work have risen	76
Figure 1.21. Wages have risen faster for high-skill occupations	76
Figure 1.22. Poverty in Australia is above the OECD average	77
Figure 1.23. Poverty in Australia has decreased over time	77
Figure 1.24. Poverty rates across country of birth and indigenous status	78
Figure 1.25. Risk of poverty across various characteristics	79
Figure 1.26. Participation tax rate from moving into employment can be high	80
Figure 1.27. Spending on training for the unemployed is low in Australia	83
Figure 1.28. Protection of permanent workers is low in Australia	84
Figure 1.29. Female employment rate is low and many work part-time	86
Figure 1.30. Motherhood has a strong impact on labour market participation	86
Figure 1.31. Partnered mothers work very short hours	87
Figure 1.32. Employment rates of lone mothers in Australia are among the lowest in the OECD	88
Figure 1.33. Australia has highly educated population	90
Figure 1.34. Australian 15-year olds are highly proficient	91
Figure 1.35. Adults in Australia have strong computer and ICT skills	92
Figure 1.36. The participation of adults in education and training is high	92
Figure 1.37. The workplace is a strong element of the skills system	93
Figure 1.38. Expenditure on education has increased over the last decade	93
Figure 1.39. Proficiency of Australian 15-year olds has declined over time	94
Figure 1.40. Disadvantaged students have much higher probability of low performance	95
Figure 1.41. Over-qualification is above the OECD average	96
Figure 1.42. Enrolment rates of Australian children in early childhood education	97
Figure 1.43. Enrolment rates in early childhood education of disadvantaged students are much lower	98
Figure 1.44. There is room to reduce the share of adults with low basic skills	101
Figure 1.45. Australia's metropolitan areas account for a large share of state populations	106
Figure 1.46. Congestion is reducing average traffic speed	107
Figure 1.47. Population density in metropolitan areas remains comparatively low	107
Figure 1.48. Some states still have small-scale local governments in urban areas	109

## Boxes

Box 1. Housing affordability initiatives continue	25
Box 2. Hikes in VAT rates: examples from other countries, impact on inflation	31
Box 3. Quantifying the fiscal impact of structural reforms	34
Box 4. Potential impact of structural reforms on per capita GDP	35
Box 5. Keys to successful outcomes in support for indigenous populations	43
Box 1.1. Displacement and re-employment of workers in Australia: evidence from the HILDA Survey	72
Box 1.2. Uncertainties in congestion impact from investing in roads	112
