Basic Statistics of Hungary, 2017	10
Executive Summary	11
Key Policy Insights	17
Recent macroeconomic developments and short-term prospects	22
The economic recovery is maturing	22
Labour market shortages are emerging and widening.....	25
Prospects and risks	31
Monetary, financial and fiscal policies to promote stability and well-being	32
Monetary policy is supportive.....	32
Financial sector vulnerability could be further reduced	35
Fiscal policy should be more forward looking	39
Towards a more growth-friendly and equitable tax system	43
Addressing longer-run challenges to well-being	45
Broadening growth.....	45
Addressing labour market challenges.....	50
The population is ageing	55
Greening growth requires mitigation of small particles emission	62
Bibliography	65
Annex. Progress in main structural reforms	73
Chapter 1. The challenges of sustaining Hungary’s pension and health systems	78
Introduction.....	79
The public pay-as-you-go pension system runs a deficit.....	79
Calculation of pension benefits	82
Most forms of early retirement have been abolished	87
Truncated careers reduce pension entitlements	87
Old-age poverty is a concern	90
The current pension design replicates wage inequalities	92
Old-age poverty can be mitigated with a basic state pension.....	94
Demographic trends will put pressure on public spending on pensions	94
The population is ageing and shrinking	94
Benefit ratios will keep falling, increasing the risk of poverty	98
The Women 40 scheme will widen the financing gap	99
Financing the spending increases.....	100
Voluntary savings can boost pension benefits	102
The health sector is facing multiple challenges	104
Health outcomes are characterised by low health status and large disparities.....	106
The resources invested in health care are not used efficiently.....	109
Reorganising health care provision would improve efficiency	109
Stronger price signals could reduce inefficiencies in the hospital sector	111
The gatekeeper role of primary care needs to be strengthened	112
The effectiveness of preventive care has to be improved to address lifestyle risks	113
A shortage of health workers hampers access to health services.....	113
High out-of-pocket payments create a barrier to health care access for low-income earners.....	115

Long-term care is faced with the challenge of population ageing	117
The organisation of long-term care for the elderly is fragmented.....	118
Low capacities of long-term care lead to a burden on informal care	119
Boosting home-based care would lead to efficiency gains	120
The capacities and efficiency of residential care homes need to be improved.....	121
Higher public spending on health is needed to achieve better outcomes.....	121
Bibliography.....	124
Chapter 2. Fostering regional growth and inclusiveness	129
Urban regions have had the fastest growth	130
Figure 2.1. The capital has been leading growth	130
Western part of Hungary has benefited from inward FDI.....	132
The capital region has benefited from agglomeration effects	133
Agglomeration effects can also be found outside the capital	135
Rural areas lag behind.....	137
Greater mobility could promote regional development.....	141
A more responsive education system could alleviate local labour shortages.....	145
Public work schemes reduce regional employment differences.....	147
Mobility is reduced by a rigid housing market and poor local roads	149
Regions have received large inflows of EU structural funds	152
Promoting regional growth	153
Tourism as a regional growth driver	154
Agriculture as a regional growth driver	162
Digitalisation as a promoter of regional growth.....	166
Bibliography.....	171

Figures

Figure 1. GDP per capita is converging to the OECD average, though slowly	20
Figure 2. Well-being can be improved	20
Figure 3. Redistribution reduces inequalities	21
Figure 4. Inequality and poverty are relatively low but vary across regions.....	22
Figure 5. Economic developments are strong	24
Figure 6. Trade is mainly with Europe	25
Figure 7. Employment rates of women, the low-skilled and older workers have risen.....	26
Figure 8. Higher participation is helping to offset the effect of ageing in the labour market	27
Figure 9. Capacity constraints are increasing.....	27
Figure 10. Inflation is picking up	28
Figure 11. The tax wedge is being reduced	29
Figure 12. Wage levels remain low in Hungary despite recent increases	30
Figure 13. The yield curve has steepened	32
Figure 14. Emerging market volatility has spilled into the Hungarian markets.....	33
Figure 15. Some central banks have been forced to sharply increase policy rates.....	34
Figure 16. Foreign reserves are declining	35
Figure 17. Macro-financial vulnerabilities have diminished significantly since 2007.....	36
Figure 18. The ratio of non-performing loans has fallen.....	37
Figure 19. Low banking sector efficiency is a concern.....	37
Figure 20. The stock of credit is relatively low.....	38
Figure 21. The size of the budget deficit is hidden by the strong economy	40
Figure 22. General government gross debt.....	41
Figure 23. More fiscal consolidation effort is needed to reduce public debt	42
Figure 24. Tax revenues are already high as a share of GDP.....	44
Figure 25. The tax structure is tilted towards consumption and labour taxes	45
Figure 26. Hungary is benefitting from a relatively high stock of inward FDI.....	46
Figure 27. Benefits from participating in GVCs are moderate.....	48
Figure 28. Productivity has failed to catch up	50
Figure 29. The shift towards high skilled employment is expected to continue	51
Figure 30. Labour market turnover is relatively low.....	52
Figure 31. Skills mismatches could be further reduced.....	52
Figure 32. Mothers with young children have relatively low employment rates	53
Figure 33. Gender pay gaps are increasing with education and skills requirements unlike in the EU.	54
Figure 34. Old-age spending pressures under less optimistic assumptions.....	56
Figure 35. The old-age dependency ratio is projected to peak around 2060.....	57
Figure 36. Gross pension replacement rates.....	59
Figure 37. Pension benefit accrual rate by years of coverage	60
Figure 38. Number of avoidable hospital admissions is high.....	61
Figure 39. Green growth indicators: Hungary.....	64
Figure 1.1. The effective retirement age remains below the OECD average, especially for women....	81
Figure 1.2. Using a moving average for valorisation would smooth fluctuations.....	84
Figure 1.3. Non-linear benefit accrual rates lead to less predictable pension outcomes	84
Figure 1.4. Pensioners generally do not work after 65	85
Figure 1.5. Workers with career interruptions have low pensions in Hungary ¹	88
Figure 1.6. Gender gap in pensions is relatively low	89

Figure 1.7. Theoretical accrued monthly pension benefits.....	90
Figure 1.8. The majority of pensioners receive pensions below average net wages	91
Figure 1.9. Public spending on pensions is relatively low	91
Figure 1.10. Wage inequality leads to pension inequality.....	92
Figure 1.11. Regional distribution of pensions reflects regional income disparities.....	93
Figure 1.12. Low-wage earners fall into poverty within 5-10 years of retiring	93
Figure 1.13. Life expectancy is rising, including for pensioners	95
Figure 1.14. The active population will be shrinking, while the share of pensioners will increase	96
Figure 1.15. The old-age dependency ratio is rising and will peak in 2060 ¹	97
Figure 1.16. Difference in cost between indexing pension benefits to wages and to inflation	99
Figure 1.17. Pre-funding future pension spending requires higher contributions	101
Figure 1.18. Potential pension contributions to a pre-funded buffer fund.....	102
Figure 1.19. Health care spending has been relatively low	106
Figure 1.20. Health status of the population is poor in international comparison.....	107
Figure 1.21. Lifestyle related health risks are high	108
Figure 1.22. Better resource utilisation could boost life expectancy significantly.....	109
Figure 1.23. Health care provision is highly hospital-centred ¹	110
Figure 1.24. Remuneration of health workers has been increasing, but remains relatively low	114
Figure 1.25. The shortages of health workers is especially severe in poor rural areas.....	115
Figure 1.26. Out-of-pocket medical spending is high	116
Figure 1.27. Relatively high share of old-age people need assistance due to health problems	118
Figure 1.28. Low capacities of long-term care leads to unmet demand for elderly care.....	120

Basic Statistics of Slovak Republic, 2017	9
Executive summary	11
Key Policy Insights	17
Macroeconomic conditions continue to improve	19
The economy is growing strongly	19
The financial sector is stable, but increasing household debt poses a risk	23
Healthy public finances should be preserved	26
Sustaining environmentally friendly growth	34
Improving the quality of public services and facilitating access will improve well-being for all citizens	36
Improving the effectiveness of tax collection	36
The judicial system needs to be further improved	38
Skills in public administration	39
Access to public services for disadvantaged groups	41
Enhance policies to develop workforce skills	43
Improving education outcomes should be a priority	45
Promoting life-long learning	49
Attracting foreign and Slovak migrants	51
Enhancing gender equality in the labour market	53
Enable entrepreneurship and innovation to support long-term growth	55
Regulation	55
Research and innovation	57
Bibliography	63
Annex. Progress in structural reform	69
Thematic chapters	73
Chapter 1. Enhancing the social integration of Roma	75
Roma in the Slovak Republic face extreme levels of social exclusion	76
Demographic trends underline the importance of Roma integration	80
Access to public policies should be strengthened	81
The education system should become more inclusive	81
Improving labour market access	92
Improving living conditions	97
Access to health care should be bolstered	100
Promoting financial inclusion in the Roma communities	104
A holistic policy approach is needed to address Roma exclusion effectively	106
The current framework goes in the right direction, but could take a more systematic approach	106
Stronger coordination of policies for Roma communities is needed	107
More trained Roma personnel are needed	108
Addressing the attitudes of the general population	108
Bibliography	111

Annex 1.A. Data on Roma.....	117
Chapter 2. Increasing the benefits of Slovakia’s integration in global value chains.....	119
Strong and successful integration into global value chains is positive for growth and living standards	120
Slovakia has benefited from its strong integration into global value chains	120
The benefits of the integration process have fallen since the 2008-09 crisis	125
An improvement in the quality of Slovakia’s role in GVCs would be useful.....	126
Promoting policies designed to increase and leverage integration into GVCs	136
A broad range of well-coordinated reforms is needed	136
Improving the skills of the work force	137
Promoting research and innovation.....	145
Enhancing the business environment and the quality of regulation	150
Improving transport infrastructure	153
Bibliography	160
