Editorial A fragile global economy needs urgent cooperative action	7
1 General assessment of the macroeconomic situation	11
Introduction	12
Global growth is set to remain weak	13
Key issues and risks	27
Policy considerations	36
References	51
Annex 1.A. Policy and other assumptions underlying the projections	54
2 Digitalisation and productivity: A story of complementarities	55
Introduction and overview	56
Digitalisation has accelerated but remains incomplete	60
Digitalisation can support productivity in various ways	63
Complementarities and main policy challenges	67
References	79
3 Developments in individual OECD and selected non-member economies	85
Argentina	86
Australia	89
Austria	92
Belgium	95
Brazil	98
Canada	102
Chile	106
China	109
Colombia	113
Costa Rica	116
Czech Republic	119
Denmark	122
Estonia	125
Euro area	128

United States	224

FIGURES

Figure 1.1. Global growth has lost momentum	14
Figure 1.2. Industrial and service sector output have recently diverged	15
Figure 1.3. Manufacturing and service sectors inter-linkages	16
Figure 1.4. Global trade growth has slowed	18
Figure 1.5. The slowdown in trade growth has been particularly sharp in Europe and China	18
Figure 1.6. Weaker investment has contributed to the trade slowdown	19
Figure 1.7. Global growth is set to remain modest	20
Figure 1.8. Global trade growth is set to remain subdued	22
Figure 1.9. Labour market conditions are improving in most economies	23
Figure 1.10. Wage and productivity growth remain moderate in the advanced economies	24
Figure 1.11. Moderate headline inflation is expected to persist in many advanced and emerging-market economies	25
Figure 1.12. Factors behind low inflation in the euro area	26
Figure 1.13. The adverse effects from higher US-China tariffs could intensify further	28
Figure 1.14. A sharper slowdown in China would hit growth and trade around the world	30
Figure 1.15. Trade linkages with China remain more important than financial linkages	31
Figure 1.16. The debt of non-financial corporations has increased in many OECD economies	32
Figure 1.17. Credit quality of non-financial corporate bonds has deteriorated globally	33
Figure 1.18. Leveraged loans outstanding in Europe and in the United States	34
Figure 1.19. Changes in equity prices seem to be disconnected from expected corporate earnings	35
Figure 1.20. Market sentiment vis-à-vis emerging-market economies has improved	36
Figure 1.21. Monetary policy remains highly expansionary	37
Figure 1.22. The use of borrower-based macroprudential measures	40
Figure 1.23. Projected fiscal positions	41
Figure 1.24. Interest payments on government debt have declined in many countries despite higher debt	43
Figure 1.25. Higher nominal GDP growth could create additional fiscal space in the medium term if monetary policy does not react	43

Figure 1.26. The need and room for fiscal stimulus differs across OECD countries	44
Figure 1.27. The impact of combined policy support in the euro area	47
Figure 1.28. The pace of reforms and potential output growth have both slowed	49
Figure 1.29. Infrastructure gaps are an obstacle to business investment in Europe	50
Figure 1.30. Infrastructure gaps are associated with lower broadband speeds and lower adoption of digital technologies	50
Figure 2.1. Productivity growth has declined sharply across OECD countries	57
Figure 2.2. Productivity dispersion across firms has increased, especially in digital intensive sectors	58
Figure 2.3. Internet access and adoption of digital technologies are increasing	61
Figure 2.4. Digitalisation has been uneven across countries	62
Figure 2.5. Online platforms are developing fast, but unevenly across countries	63
Figure 2.6. Adoption of digital technologies has supported firm productivity	65
Figure 2.7. Online platforms can enhance the productivity of service firms	66
Figure 2.8. More productive firms have benefitted more from digitalisation	68
Figure 2.9. A range of policies can support productivity by promoting greater diffusion of digital technologies	69
Figure 2.10. Skill shortages reduce digitalisation gains, especially among less productive firms	70
Figure 2.11. Many adults lack digital skills in OECD countries	71
Figure 2.12. Increased access to high-speed internet is associated with higher productivity	72
Figure 2.13. Business dynamism has been trending down	73
Figure 2.14. Non-contestable platform markets generate weaker productivity gains	76
Figure 2.15. There are large cross-country differences in barriers to digital trade	77
Figure 2.16. The uptake of digital government services differs significantly across countries	78
