Figures

Figure 1. On average, New Zealand performs well on several OECD <i>How's Life?</i> indicators	16
Figure 2. Labour productivity is weak	17
Figure 3. Perceived corruption is low.....	18
Figure 4. Growth has slowed to slightly below potential	21
Figure 5. Low business confidence has contributed to weak investment.....	22
Figure 6. Robust external demand has supported the economy	23
Figure 7. China and Australia are key export markets	24
Figure 8. The labour market is tight	25
Figure 9. Inflation is just below the mid-point of the target band	26
Figure 10. House prices and household indebtedness have increased markedly.....	28
Figure 11. New Zealand is unusual in not having deposit insurance	29
Figure 12. Proposed new capital requirements exceed those in other OECD economies	30
Figure 13. Life insurance commissions are high.....	31
Figure 14. Government debt is sustainable, but ageing will increase fiscal pressures	33
Figure 15. The minimum wage is high relative to the median wage.....	36

Figure 16. Macro-financial vulnerabilities are generally lower than at the end of the last expansion ..	40
Figure 17. Income inequality has increased since the mid-1980s	41
Figure 18. Income inequality is above the OECD average and relative poverty rates are below ¹	42
Figure 19. The gender gap is low for wages but high for employment ¹	43
Figure 20. There are large inequalities in education achievement	44
Figure 21. Māori and Pasifika have shorter life expectancy than the rest of the population.....	45
Figure 22. The NZ- and OECD well-being frameworks have much in common.....	46
Figure 23. The LSF Dashboard has a middling number of indicators.....	47
Figure 24. The anticipated Indicators Aotearoa New Zealand data pipeline	48
Figure 25. New Zealand's Wellbeing Budget process	49
Figure 26. Environmental indicators	53
Figure 27. Emigration from New Zealand is high.....	55
Figure 28. Immigration is high.....	56
Figure 29. The share of skilled immigrants (and accompanying family) in residence approvals is one of the highest in OECD countries ¹	57
Figure 30. Net permanent and long-term migration has been high in recent years ¹	57
Figure 31. Immigrants in New Zealand are highly educated and their children's education achievement is on a par with that of non-immigrants	58
Figure 32. Most low-income renters face very high housing costs	61
Figure 33. Homelessness is high and social housing stocks are low.....	64
Figure 1.1. New Zealand Treasury's Living Standards Framework, 2018 edition	72
Figure 1.2. On average, New Zealand performs well on several OECD <i>How's Life?</i> indicators	74
Figure 1.3. Opportunities for improving New Zealand's well-being: an international perspective using the OECD approach.....	75
Figure 1.4. Inequalities in health outcomes in New Zealand	76
Figure 1.5. Large variation in the prevalence of psychological distress in New Zealand.....	77
Figure 1.6 Average cognitive skills for students aged 15 have fallen in New Zealand.....	78
Figure 1.7. Incomes for the top 20% have far outpaced the rest	79
Figure 1.8. Asset-based poverty	79
Figure 1.9. Māori fare better than other OECD indigenous peoples on income gaps, but often worse on life expectancy, employment and unemployment gaps.....	81
Figure 1.10. New Zealand's greenhouse gas emissions by sector.....	82
Figure 1.11. The LSF Dashboard has a middling number of indicators.....	88
Figure 1.12. The Living Standards Framework compared to other well-being frameworks.....	89
Figure 1.13. The anticipated Indicators Aotearoa New Zealand data pipeline.....	95
Figure 1.14. New Zealand's Wellbeing Budget process.....	98
Figure 1.15. Regulatory impact assessments in OECD countries are increasingly considering a wider range of impacts	100
Figure 2.1. A large income gap with Australia emerged over the 1960s-1990s	120
Figure 2.2. Emigration from New Zealand is high.....	121
Figure 2.3. New Zealand's share of the native-born population living abroad is high	121
Figure 2.4. The immigration system aims to support economic growth, social inclusion and resilience.....	124
Figure 2.5. The skilled/business category has been dominant in residence approvals since the early 2000s	125
Figure 2.6. The share of skilled immigrants (and accompanying family) in residence approvals is one of the highest in OECD countries ¹	126
Figure 2.7. Student visa holders	127
Figure 2.8. Stock of temporary work visa holders by work visa policy	128
Figure 2.9. Temporary labour migration	128

Figure 2.10. Net permanent and long-term migration has been high in recent years ¹	129
Figure 2.11. New measures show lower net migration	130
Figure 2.12. The contribution of net migration to population growth has increased	130
Figure 2.13. The foreign-born share of the population is high in New Zealand	132
Figure 2.14. Birthplace diversity is average for the stock of immigrants but high for the flow ¹	133
Figure 2.15. Immigrants in New Zealand are highly educated and their children's education achievement is on a par with that of non-immigrants	134
Figure 2.16. Immigrants tend to have better well-being outcomes in New Zealand than in most OECD countries	135
Figure 3.1. House price growth	154
Figure 3.2. Housing costs for households	155
Figure 3.3. The homeownership rate is just below the OECD average.....	156
Figure 3.4. Housing affordability for owners has been supported by low interest rates	156
Figure 3.5. Most low-income renters face very high housing costs	158
Figure 3.6. Factors driving house price growth.....	159
Figure 3.7. Restrictions on foreign direct investment in construction are substantial.....	168
Figure 3.8. KiwiBuild original planned delivery and progress to date (dwellings)	170
Figure 3.9. Homelessness is high and social housing stocks are low.....	175
Figure 3.10. Spending on housing allowances and number of recipients are high ¹	178

Boxes

Box 1. Quantifying this <i>Survey's</i> fiscal recommendations	33
Box 2. Policy measures taken to lift New Zealand's low housing affordability	62
Box 1.1. New Zealand's long history of well-being measurement and evidence-building.....	86
Box 1.2. Well-being policy in New Zealand and the Living Standards Framework.....	93
Box 1.3. CBAX: A Treasury tool for improving the consistency of cost-benefit analysis	101
Box 2.1. Revisions to migration data	129
Box 3.1. Simulation of the potential impact of structural reforms	160
Box 3.2. The Urban Growth Agenda.....	162
Box 3.3. The KiwiBuild Programme.....	169
