Executive Summary	9
Key Policy Insights	15
Growth has been solid, but there are risks ahead.....	18
Strengthening financial regulation to address risks	21
External risks to the large financial sector call for enhanced monitoring	21
Macroprudential tools can help contain soaring house prices.....	24
Luxembourg has become a gateway for fintech and big tech firms.....	27
Enforcement against international corruption needs to be stepped up	28
Fiscal reforms for inclusive growth and sustainability	29
The fiscal position is strong, but ageing poses a long-term challenge	29
Further adjusting corporate taxation to a globalised world	31
Improving work incentives and diversifying tax bases	32
Reviving productivity growth in Luxembourg	36
Understanding productivity developments.....	36
Evaluating and adjusting diversification efforts.....	42
Reviving productivity growth for firms below the frontier.....	44
Stimulating the innovation engine to push the frontier	49
Avenues for greener growth.....	53
There is scope to further reduce CO ₂ emissions, especially from transport.....	53
Harnessing finance for the transition to a low-carbon economy	55
References.....	57
Annex. Progress in main structural reforms.....	63
Thematic Chapter.....	67
Chapter 1. Policies for a more efficient and inclusive housing market	69
Population growth and constrained supply diminish housing affordability.....	70
Demographic growth has exceeded housing supply	70
Price developments reflect limited use of available land	72
Increasing the supply of housing	76
Spatial planning instruments fail to prevent land hoarding.....	76
Improving co-ordination in spatial planning and infrastructure provision.....	80
New construction.....	81
Densification measures	85
Making the access to housing more equitable	88
Tax preference for homeownership.....	88
Measures to expand the stock of social housing	94
Social housing should be targeted to those most in need	97
Affordable private rental sector.....	98
References.....	102

Executive summary	9
Key Policy Insights	15
Malaysia's economic performance has been very successful, but social and governance challenges remain	15
Renewed priorities of structural reform	16
Malaysia's current state of well-being	20
Ensuring resilience to maintain growth momentum	23
Monetary and financial market policies underpin resilience.....	26
Low-income households are relatively vulnerable to rising cost of living	29
Ensuring fiscal sustainability is prioritised.....	31
Building a larger and consistent revenue base to foster inclusiveness	33
Consolidating expenditure for strengthening social protection.....	36
Improving public procurement as a basis for maximising expenditure efficiency.....	39
Improving budget process transparency.....	40
Risk management of contingent liabilities needs to be strengthened.....	40
Policy framework of public-private partnership needs to be more transparent.....	42
Strengthening public debt management as key to fiscal sustainability	44
Ensuring integrity is key to efficient fiscal system	46
Fostering growth and productivity.....	48
Accelerating liberalisation facilitates productivity gains	50
Promoting services liberalisation contributes to overall productivity.....	50
Strengthening the policy framework for environmental sustainability and green growth.....	53
References.....	57
Annex 1.A. Key recommendations in the first OECD Economic Assessment of Malaysia (November 2016).....	60
Thematic Chapter	63
1. Reducing skills imbalances to foster productivity growth	65
The importance of skills development as a game changer.....	65
The state of skills imbalances in the Malaysian labour market	67
Skills imbalances can hamper productivity growth	67
Malaysian firms face challenges in getting workers with the right skills	69
The labour market faces shortages in a variety of occupations and skills.....	71
Overview of Malaysia's education performance	75
Educational attainment has been on the rise	75
Despite success in increasing attainment, educational quality remains a concern.....	80
Improving student outcomes by strengthening teacher quality and practices.....	83
Improving disadvantaged students' access to quality teachers	84
Tapping the potential of the teacher workforce.....	86
Improving teachers' capacity to teach English.....	90
Strengthening the connection between education and employment	92

Fostering collaboration between education institutions and businesses.....	92
Improving career guidance services and preparing students to enter the labour market.....	95
Providing opportunities for up- and re-skilling during working life.....	96
Evidence suggests that Malaysian adults have limited access to training opportunities.....	96
Key policy areas to improve the adult learning system.....	97
Making better use of women's skills	113
Women's labour market participation rate in Malaysia is low.....	113
Reducing barriers to labour market participation for women	114
Moving towards a high-skill equilibrium.....	120
Attracting foreign direct investment (FDI)	120
Stimulating entrepreneurship	121
Making the most of migration while encouraging the adoption of technology.....	123
References.....	128

Tables

Figures

Figure 1. Per capita GDP has converged but its pace needs to be accelerated.....	15
Figure 2. Life is good in Malaysia, though improvement is still needed in several areas	21
Figure 3. Well-being improvements have weakened	22
Figure 4. Recent macroeconomic developments.....	25
Figure 5. Malaysia's growth is highly reliant on trade.....	26
Figure 6. Monetary and financial developments have been stable overall.....	28
Figure 7. Inflation has a different impact according to income groups.....	29
Figure 8. Decreasing contribution of paid employment and self-employment to household income ...	30
Figure 9. Malaysia's inequality has declined but its tax-and-transfer system has little effect on income distribution.....	30
Figure 10. The fiscal deficit has increased	32
Figure 11. Malaysia's tax revenue collection is low	33
Figure 12. The share of non-tax revenue is projected to widen, and the ratio of total revenue to GDP has been falling.....	35
Figure 13. Malaysia's tax mix relies on direct taxes	36
Figure 14. Public social spending has much room to increase.....	37
Figure 15. Malaysians can expect a lengthy retirement	37

Figure 16. Healthcare expenditure is rising fast.....	38
Figure 17. Government's debt guarantee has risen	41
Figure 18. Malaysia's capital stock of PPP projects is high.....	43
Figure 19. Malaysia can improve the preparation, procurement and management of PPPs	44
Figure 20. Federal government debt remains below the ceiling.....	45
Figure 21. Federal government debt scenarios.....	45
Figure 22. Malaysia needs to fully implement anti-corruption plans.....	46
Figure 23. Contribution of labour quality to economic growth is low	48
Figure 24. Labour productivity level still lags behind advanced countries	49
Figure 25. There is room to further liberalise services regulations in Malaysia	51
Figure 26. Restrictions to movement of people in STRI, by professional services.....	52
Figure 27. Economic development path needs to be less carbon-intensive	56
Figure 1.1. Labour productivity and the use of reading skills at work.....	66
Figure 1.2. The Malaysian labour market is undergoing structural changes.....	68
Figure 1.3. Finding the right skills is an obstacle for many Malaysian firms	70
Figure 1.4. Labour market imbalances are pervasive in Malaysia	72
Figure 1.5. Many workers are employed in jobs that do not match their education level.....	75
Figure 1.6. Government expenditure on education is relatively high.....	76
Figure 1.7. Government expenditure per student in tertiary education is high	77
Figure 1.8. Expenditure on students in tertiary education is higher than for those at lower levels in the education system	78
Figure 1.9. Enrolment in education has been on the rise.....	78
Figure 1.10. Malaysian students performed relatively poorly in PISA 2012	82
Figure 1.11. A relatively high percentage of Malaysian students achieve low scores in PISA	82
Figure 1.12. Malaysian teachers spend a lot of time on non-teaching duties in addition to teaching ...	87
Figure 1.13. Smaller class sizes are linked to lower non-teaching workload of teachers	88
Figure 1.14. Youth unemployment rate among tertiary education graduates is relatively high in Malaysia	93
Figure 1.15. Relatively few firms train their workers in Malaysia.....	97
Figure 1.16. Adults face multiple barriers to participation in training activities.....	99
Figure 1.17. Not everyone has the same access to adult learning opportunities	102
Figure 1.18. Many of the HRDF training opportunities are in the area of health and safety	106
Figure 1.19. Funds collected from employers for training have not been put to full use.....	111
Figure 1.20. Gender gaps in labour force participation in Malaysia increase with age.....	114
Figure 1.21. Female workers are not overrepresented in low-skill or low-wage occupations	119
Figure 1.22. Entrepreneurial policy in Malaysia	122
Figure 1.23. Routine jobs have been losing importance in the Malaysian labour market.....	124

Boxes

Box 1. Malaysia's socio-economic development.....	16
Box 2. The government's structural reform priorities	17
Box 3. Malaysia's drive to promote greater governance, integrity and anti-corruption.....	19
