Executive summary 9

1 Key policy insights 14
The economy will recover gradually from the COVID-19 crisis 14
The recovery will probably be slow and uncertainty is exceptionally high 17
Monetary policy is accommodative but inflation remains below the 2% target 21
Strong public finances allow stimulating the economy 22
The financial system remains solid, but the COVID-19 crisis raises vulnerability 24
The fruits of Korea's past economic performance have not been equally distributed 27
Korea's economic achievements have not fully translated into well-being 31
Better use of labour resources and innovation can support growth 31
The fight against corruption has been stepped up but challenges remain 41
Environmental quality remains low by OECD standards 43
References 47
Annex 1.A. Progress in other structural reform areas 50
Annex 1.B. Government measures to address the COVID-19 crisis 51
Annex 1.C. Economic co-operation with North Korea 54
References 58

2 Raising employment and enhancing job quality in the face of rapid ageing 59
Scarcer labour resources need to be better mobilised 63
A more flexible labour market should be combined with stronger social protection 83
References 90

3 Promoting the diffusion of technology to boost productivity and well-being 92
Digital opportunities to raise productivity are not used to their full potential 98
The diffusion of digital technologies among firms and workers is slow 103
Policies supporting digital adoption and productivity need strengthening 108
Ensuring digital trust is key to digital development and well-being 117
References 123

FIGURES

Figure 1. GDP falls less than in the OECD 10
Figure 2. Inflation is set to remain very low 11
Figure 3. Inequality is relatively high 11
Figure 4. The old age dependency ratio will soar 12
Figure 5. Service sector productivity is lagging 12
Figure 1.1. Mobility for retail and recreation has remained relatively high 14

Figure 1.2. The COVID-19 crisis has hit employment hard, albeit less than in most other countries 17
Figure 1.3. Employment drops in services and among non-regular workers 18
Figure 1.4. Exports are fairly concentrated in terms of countries and product types (%), 2018 19
Figure 1.5. The outlook for global semi-conductors remains uncertain 20
Figure 1.6. Inflation is well below the 2% target 21
Figure 1.7. Monetary policy has been eased and the won has depreciated somewhat 22
Figure 1.8. Sound public finances leave room for fiscal stimulus 23
Figure 1.9. Potential impact of the COVID-19 crisis on gross government debt 23
Figure 1.10. The unweighted leverage ratio is close to the OECD average 24
Figure 1.11. Aggregate corporate debt is moderate but rising and household debt is high 25
Figure 1.12. At the national level, housing prices have been stable 26
Figure 1.13. Income inequality is relatively high 28
Figure 1.14. The minimum wage is high relative to the median wage, 2018 29
Figure 1.15. Permanent workers' employment protection is relatively strong 30
Figure 1.16. Well-being scores remain relatively low in many dimensions 31
Figure 1.17. Korea has scope to raise both employment and productivity 32
Figure 1.18. Fewer individuals work very long hours as time limits were tightened towards OECD norms 35
Figure 1.19. Low-productivity sectors account for a high share of total employment 37
Figure 1.20. Digital gaps between large and small firms remain high 39
Figure 1.21. Product market regulations are stringent 40
Figure 1.22. Corruption is perceived as relatively high 41
Figure 1.23. Korea is compliant on tax transparency 42
Figure 1.24. Environmental performance remains weak 44
Figure 2.1. Employment falls sharply in services and among non-regular workers 60
Figure 2.2. The old-age dependency ratio is set to be the highest in the OECD in 2060 62
Figure 2.3. Korea faces important challenges with inclusiveness and some aspects of job quality 64
Figure 2.4. Disadvantaged groups face large employment gaps 65
Figure 2.5. There are multiple worker-related barriers to employment 65
Figure 2.6. Groups facing different combinations of employment barriers 66
Figure 2.7. Many workers earn low wages and work very long hours 67
Figure 2.8. Women's employment rate is relatively low between ages 30 and 60 68
Figure 2.9. The gender wage gap is the widest in the OECD 69
Figure 2.10. The employment rate falls more slowly with age than in other OECD countries 71
Figure 2.11. Many older workers are excluded from the social safety net 72
Figure 2.12. The share of the elderly in relative poverty is the highest in the OECD 72
Figure 2.13. Net pension replacement rates are relatively low 73
Figure 2.14. Wages reflect seniority more than in most other OECD countries 76
Figure 2.15. Many older Korean workers would like to get education and training 77
Figure 2.16. Youth and elderly employment rates are positively correlated 82
Figure 2.17. The share of non-regular employment is high 84
Figure 2.18. Permanent workers' employment protection is relatively strong 85
Figure 2.19. Active labour market programmes focus most on direct job creation 87
Figure 2.20. Employment service resources are among the lowest in the OECD 88
Figure 3.1. Korea is one of the top players in emerging digital technologies 93
Figure 3.2. Corona Map App plots locations with confirmed cases of COVID-19 94
Figure 3.3. Households turned to e-commerce during the COVID-19 outbreak 95
Figure 3.4. High-speed broadband is widespread in Korea 96
Figure 3.5. Low-productivity sectors account for a high share of total employment 97
Figure 3.6. Economy-wide productivity in Korea is far below the OECD average 97
Figure 3.7. The contribution of domestic services to Korean manufacturing exports is low 101
Figure 3.8. Korean exports of predominantly digitally deliverable services are weak 102
Figure 3.9. Use of websites for online ordering or reservation has increased rapidly in Korea 103
Figure 3.10. Korea is below the OECD average in sophisticated digital technologies adoption 104
Figure 3.11. Digital gaps between large and small firms remain high 105
Figure 3.12. The age gap in online purchasing is the highest among OECD countries 106
Figure 3.13. The digital skills gap between generations is the highest among OECD countries 107
Figure 3.14. The share of teachers with high digital skills is relatively low in Korea 109
Figure 3.15. Teachers can further improve their use of ICT for teaching 109
Figure 3.16. The share of tertiary graduates in science, engineering and ICT is high 110
Figure 3.17. Korea can further increase the share of workers receiving firm-based training 111

Figure 3.18. The participation in online courses is the third highest in Korea 112
Figure 3.19. Korea has high regulatory barriers to competition 115
Figure 3.20. Korea should be more open to foreign entry and competition 116
Figure 3.21. Korea is a leader in e-government 118
Figure 3.22. Korea has the highest score in open-useful-reusable government data 118
Figure 3.23. Online security incidents are relatively frequent in Korea 119
Figure 3.24. Privacy violations are second highest in Korea 119
Figure 3.25. The share of Korean youth at risk of addiction to Internet and smartphones is high 121

Annex Figure 1.C.1. North Korea's recorded foreign trade 55
Annex Figure 1.C.2. Estimated GDP level and growth rate 56
