Foreword	3
Executive Summary	9
<b>1 Key policy insights</b>	<b>15</b>
The pandemic hit Austria hard, requiring to adjust the sharing of health responsibilities across levels of government	15
Macroeconomic outlook and risks	21
Economic and social supports are being adapted to the recovery	29
Important structural changes are pending after the pandemic	42
Social cohesion is under pressure	49
Public sector reforms become more compelling	61
Illustrative medium-to-long term growth scenarios and policy recommendations	66
References	70
<b>2 Helping the business sector to cope with new opportunities and challenges</b>	<b>75</b>
COVID-19 induced structural change, adaptation to climate change and population ageing pose challenges to the Austrian growth model	76
Adapting business framework conditions to promote productivity growth, an efficient allocation of resources and investments	84
Stimulating the adoption of key digital technologies	92
Reinvigorating investments for a resilient recovery	101
Making the most out the available pool of talent	111
Fostering knowledge creation and R&D to boost innovation	124
References	128

Foreword	3
Executive summary	8
<b>1 Key Policy Insights</b>	<b>13</b>
Introduction	14
Denmark weathered the crisis well, but imbalances are increasing	15
House prices have risen rapidly	25
Asset price growth is increasing financial stability risks	27
Fiscal policy to support wellbeing	32
Government spending supported the economy during the crisis	32
Sustainable public finances over the long term	34
Reforms to increase productivity growth and labour market inclusion	39
Supporting diffusion of the benefits from the digital transformation	42
Enhancing the benefits from strong female labour market participation	45
Improving the integration of migrants	46
Harnessing synergies between climate action and the local environment	49
References	53
<b>2 An effective, inclusive and comprehensive strategy for a decarbonised economy</b>	<b>60</b>
The climate strategy in Denmark	61
Denmark is exposed directly and indirectly to the impacts of climate change	61
Denmark has reduced its GHG emissions and set ambitious new targets	63
Climate targets call for accelerated action, but this will have socio-economic impacts	66
A strategy to mitigate macroeconomic and financial consequences	67
Curbing labour market adjustment costs	68
The risk of emission leakage through international trade will have to be assessed and curbed to allow for an effective domestic strategy	70
Key policy instruments for a net-zero economy	72
Aligning emission pricing to accelerate the transition	73
Regulation can be a valuable part of the policy mix where cost-effective measures are targeted	82
Private investment is key for meeting climate targets	83
Well-targeted public investment needs to play a role	84
The green transition has important implications for the finance sector	85
Research and development plays a major role in the Danish climate mitigation strategy	87
Enhancing good governance to improve coordination and monitoring	88
References	90
<b>3 Climate policies for energy, transport and agriculture</b>	<b>97</b>
Maintaining progress in the energy sector	98
Policy measures have contributed to the falling cost of renewables	98
Electricity taxes unrelated to environmental effects should be reduced	102
Reliance on biomass for heat and power needs to be reduced	104
The rate of renovations should be increased to meet energy efficiency goals	106

Reversing the increase in GHG emissions in the transport sector	108
The transport sector has become the largest emitter of GHGs	108
Reducing vehicles' carbon intensity is the focus of government's policy	109
Shifting the tax burden to encourage sustainable use of transport in a cost-effective way	112
Ramping up mitigation in agriculture	114
Danish agriculture is open to international trade and potentially vulnerable to GHG emission leakage if unilateral measures increase production cost	115
An ambitious policy mix of regulation and subsidies for carbon sequestration can enhance climate change mitigation in agriculture	118
Complementing with steps to encourage sustainable consumption	121
References	124
