Software Developer – Bizzkit

Are you looking for an opportunity to build high quality software and would you like to take part in developing market's most complete, headless e-commerce platform? Hesehus and our platform team, Bizzkit, is ready to onboard more dedicated software developers who will put an imprint on our platform products.

What are we offering?

Since 2002 Hesehus has delivered ambitious e-commerce solutions based on its own developed platform, called Bizzkit. Today, the Bizzkit platform is one of the most widely used platforms among the top 1000 companies with physical products in Denmark. We want to achieve that same position internationally and have therefore started our journey by entering the Swedish market and more markets are to follow.

Our company is characterised by a vibrant environment consisting of highly skilled and committed colleagues. Our commitment shows in the professional work with a strong focus on knowledge sharing and development. Our culture is centered around a strong social and professional unity, a positive atmosphere and good management.

As we are in search of more than one software developer, we have now the opportunity of creating the best match between your skills and interests and our product suite. We are therefore looking forward to talk to you about what product you will be mostly passionate working with:

PIM
In the role as a PIM Developer you will help build the best tool for product information management. The position requires interest in product data, complex attribute modelling and relations, workflows, working with top performance and scaling of big product catalogs and multiple job processing. Learn more about the job and apply here: https://www.hesehus.com/career/product-software-developer---pim

DAM
As a DAM Developer you will be working with rich media and automate and optimize transformation of these to a multitude of channels and new file formats. You will update and tweak indices for search and filtering, ensure good collaborative tools and new image editing features, and have it optimally integrated with the other products in the Bizzkit suite.

CMS
Working as a CMS Developer it is important to have a keen eye on how to create and update

content elements, ensure easy versioning, efficient and reliant content delivery to multiple channels and know structure and flexibility can be each other's best friends.

Search and Browse

In the position as a Search and Browse Developer you will ensure the best search experience for e-commerce customers. The essential part of this role is to combine and synergize data and features in new ways to provide new business values for e-commerce customers and to work with a huge amount of data and squeeze the last ounce of performance out the code.

Add-Ons
Developing Add-Ons you will focus on finding, standardizing, optimizing and productizing tasks and features into smaller products and modules, so that they are once and for all handled, updated, and delivered in a centralized manner. In this position it is important to have a microservice mindset and know how and when it provides value.

Your primary tasks:

- Develop, and test new features for the Bizzkit product suite
- Refine, scope and assign story points to user stories
- Continuously help keeping products up to date on the newest technologies
- Contribute to documentation of features for the developers at our solution partners

Who are you?

Preferably, you have a few years of experience in software development and have a higher education within IT, where you have shown great results. You are a skilled and ambitious developer who want to build generic products that our solutions partners and customers love to work with. You have high focus on test and quality and want to help analyze complex demand and implement simple, elegant solutions together in close cooperation with the team's architects. Last but not least, you always think in terms of scoping and creating small deliveries that can create a positive business impact.

You have experience in:

- .NET and ASP.NET CORE
- ASP.NET MVC
- C#
- SQL
- EF Core
  On top of your skills as a developer, you have a great drive and are motivated to find the best solutions. It is easy for you to adapt complex issues, work in a goal-focused manner and set high standards for your work. As we work in a team orientated culture, we are looking for a true team player, who wants to contribute to our informal and fun working environment.

Hesehus add-ons:

- Great opportunity to advance your own career. We hold staff development interviews twice a year, as we believe in a closer interaction with you and your development.
- Tailored development plans instead of a predefined career paths.

- Hesehus Training Academy - time for immersion.
- Family friendly and flexible working hours.
- Parental leave with good conditions.
- Free health insurance - covers also your children until they are 24 years old.
- Free Danish lessons in-house.
- Company lunch program.
- Beautiful premises located centrally at the harbour in Odense.
- Cozy office enviroment located centrally in Aarhus (right next to Aarhus Central Station).
- Extensive discount program including LogBuy.

Apply for the job

We offer a competitive salary based on your experience, as well as pension and healthcare insurance. **We wish to fill in the position as soon as possible and therefore interview on an ongoing basis.** Certificate of criminal record must be obtained before employment can take place. We look forward to hearing from you.
