<b>Executive summary</b> .....	11
The US economy has rebounded from the crisis .....	12
Productivity has slowed in most industries .....	12
Income inequality continues to increase .....	12
<b>Assessment and recommendations</b> .....	15
After the recovery, growth is likely to remain moderate .....	16
Achieving stronger long-term growth .....	30
Making growth more inclusive and sustainable .....	40
Meeting environmental challenges .....	51
Bibliography .....	54
<b>Annex. Progress in structural reform</b> .....	59

### Thematic chapters

<b>Chapter 1. Unleashing private sector productivity</b> .....	67
Labour productivity has suffered a broad-based deceleration .....	68
The business investment climate .....	74
The role of innovative activity .....	76
Business dynamism and technological diffusion .....	79
The role of market power .....	83
Innovative management practises and productivity .....	88
Harnessing complementarities between business productivity and public infrastructure .....	89
<i>Recommendations for unleashing productivity growth</i> .....	93
Bibliography .....	93
<b>Chapter 2. Realising and expanding opportunities</b> .....	97
Skills and opportunity .....	99
Barriers to opportunity .....	108
Infrastructure and opportunity .....	122
<i>Recommendations</i> .....	128
Bibliography .....	128
<b>Boxes</b>	
1. Recession risks appear limited .....	20
2. Low-probability vulnerabilities .....	21
3. Real-time uncertainty in assessing inflationary pressures .....	22
4. The proposed FY2017 budget .....	27

5. Potential lessons from healthcare spending in OECD countries.....	28
6. Corporate tax reforms.....	37
7. Well-being is high, but not for all.....	42
8. Economy-environment linkages in the United States.....	52
1.1. Are shifts in industry composition slowing overall productivity?.....	71
1.2. Can mismeasurement help account for the productivity slowdown?.....	73
1.3. Is intensifying market concentration contributing to higher mark-ups?.....	86
2.1. Inter-generation income mobility.....	99
2.2. Student loans.....	105
2.3. Activation policies in the OECD.....	107
2.4. Paid parental leave policies in the OECD and gender equality.....	113
2.5. Female labour force participation and the role of family-friendly policies....	115
2.6. Disability policies in OECD countries.....	119
2.7. Water abstraction and governance.....	127

## Tables

1. Macroeconomic indicators and projections.....	19
2. Past OECD recommendations on monetary and financial policy.....	24
3. Past OECD recommendations on fiscal policy.....	29
4. Past OECD recommendations on innovation.....	36
5. Past OECD recommendations on education policy.....	43
6. Past OECD recommendations to improve work-life balance.....	46
7. Gender inequalities are large.....	47
8. Past OECD recommendations on disability and health care reform.....	49
9. Past OECD recommendations on business sector contribution to well-being .	50
10. Past OECD recommendations on environmental sustainability and energy ..	54
1.1. Contributions to slowdown in aggregate private business productivity by selected sectors and industries.....	72
1.2. Estimated Effects of Market Consolidation on the Mark-up.....	87
1.3. Decomposition of the Estimated Mark-up Effect.....	88
2.1. Probabilities of female labour force participation are boosted by more supportive family-friendly policies at the state level.....	116

## Figures

1. Output recovery has been weaker than after previous recessions, while the decline in the unemployment rate has been faster.....	17
2. Business fixed investment has recovered as output growth continues steadily ..	18
3. The exchange rate has appreciated sharply and export growth has slowed ..	18
4. Recession probabilities: real time and in-sample comparisons.....	20
5. Strong job gains and much lower unemployment rates.....	21
6. Price and wage inflation have remained stubbornly subdued.....	22
7. Real-time estimates of the US output gap can be misleading.....	22
8. Capital ratios exceed thresholds but risks remain.....	23
9. House price-to-rent ratios are broadly in line with historical trends.....	25
10. Household balance sheets have recovered from the crisis.....	25
11. The budget deficit has fallen.....	26
12. Healthcare spending has slowed.....	28
13. Public debt scenarios.....	29

14. The growth of the government capital stock has slowed markedly . . . . .	30
15. Infrastructure quality appears to have deteriorated overall . . . . .	31
16. Fixed (wired) broadband penetration is around average and relatively slow . .	32
17. Labour productivity growth has been weak recently . . . . .	33
18. Aggregate corporate profits are hovering near post-war highs. . . . .	33
19. Relative prices have fallen with productivity growth . . . . .	34
20. Bankruptcy reform reduced filings and increased incorporation. . . . .	35
21. Markets have become more concentrated, on balance . . . . .	38
22. Licencing of occupations and regulation in services restrict business dynamism . . . . .	39
23. Income inequality has been trending upwards . . . . .	41
24. High, but unequal well-being . . . . .	42
25. Education performance has improved though skills remain weak on average . . .	44
26. Student loans have become a much more important element of household debt . . . . .	45
27. US labour-market participation has fallen . . . . .	46
28. The gender wage gap has declined over time, but remains comparatively high. .	47
29. Wage gaps are large between population groups . . . . .	48
30. Employment rates are lower amongst blacks . . . . .	49
31. Health un-insurance has dropped since 2013 . . . . .	51
32. Contribution of domestic natural capital to output growth, 1991-2013 averages .	52
33. Green growth indicators for the United States . . . . .	53
1.1. Productivity has slowed in the USA and in the OECD as a whole. . . . .	68
1.2. Capital deepening and multifactor productivity have held back U.S. productivity growth . . . . .	69
1.3. The productivity slowdown is pervasive across industries . . . . .	69
1.4. Capital formation has been broadly in line with overall activity . . . . .	74
1.5. Lending conditions for businesses have been eased since the crisis, and uncertainty has subsided . . . . .	75
1.6. Despite a wide gap between returns on produced assets and borrowing costs, corporations are accumulating financial assets. . . . .	75
1.7. Innovative effort seems robust overall, but is shifting toward the private sector .	76
1.8. The US ratio of overall R&D expenditures to GDP is somewhat above the OECD average. . . . .	77
1.9. Efforts to speed patenting are paying off, but the process is still lengthy. . . .	78
1.10. The business sector is gradually becoming less dynamic . . . . .	80
1.11. Increases in small business collateral requirements during the crisis have not been reversed . . . . .	81
1.12. Bankruptcy reforms in 2005 reduced filings and increased the likelihood of incorporation . . . . .	82
1.13. The share of non-labour compensation in aggregate income has risen . . . . .	83
1.14. Foreign activities have helped boost profits by domestic corporations to record highs . . . . .	84
1.15. Markets have become more concentrated, on balance . . . . .	84
1.16. The link between an industry's productivity and its relative price has loosened .	85
1.17. Merger and acquisition activity has been elevated over the past two decades . .	86
1.18. Price mark-ups and market concentration at the industry level . . . . .	87

<b>Executive summary</b> .....	9
Growth has been robust despite adverse circumstances but must be rebalanced .	10
Removing structural bottlenecks would boost productivity .....	10
Deeper participation in global value chains could help rebalance growth .....	10
<b>Assessment and recommendations</b> .....	13
Recent economic developments and short-term macroeconomic outlook .....	20
Economic rebalancing to make growth sustainable and more inclusive .....	23
Strengthening the resilience of the economy .....	27
Restructuring the tradable sector by upgrading the business environment .....	33
Reforms and green growth .....	45
Bibliography .....	48
<b>Annex. Progress in key structural reforms</b> .....	53
<b>Thematic chapters</b>	
<b>Chapter 1. Rebalancing growth by strengthening the manufacturing sector</b> .....	59
Introduction: upgrading manufacturing to rebalance the economy .....	60
The development of manufacturing has strengthened social inclusion but has hit a glass ceiling .....	60
Disaggregated analysis confirms deep fragmentation .....	65
Formalisation requires a coherent policy framework .....	78
Policy recommendations .....	85
<i>Recommendations to rebalance the economy by strengthening the manufacturing sector</i> .....	85
Bibliography .....	86
<b>Chapter 2. Reaping the benefits of global value chains</b> .....	89
Turkey's participation in GVCs .....	90
Drivers of participation in global value chains .....	98
Implications of participation in GVCs .....	116
<i>Recommendations to reap greater benefits from global value chains</i> .....	119
Bibliography .....	119
<b>Annex A1. Methodology for the overview figures</b> .....	121
<b>Annex A2. Sector definitions</b> .....	127
<b>Annex A3. Backward participation by source and exporting sector</b> .....	128
<b>Annex A4. Forward participation by source and exporting sector</b> .....	129

Annex A5. Network visualisation maps .....	130
Annex A6. Drivers of GVC participation – an econometric assessment .....	134
<b>Boxes</b>	
1. Integrating Syrian refugees .....	26
1.1. Manufacturing led broader employment growth in many emerging regions ..	61
1.2. Business sector segmentation .....	66
2.1. Depth of Turkey’s preferential trade agreements .....	104
2.2. Special investment zones in Turkey .....	111
<b>Tables</b>	
1. The 2016 Action Plan .....	15
2. Macroeconomic indicators and projections .....	21
3. Shocks that might affect economic performance .....	23
4. Macroeconomic imbalances .....	27
5. Educational indicators in international comparison .....	41
1.1. Estimation results .....	61
1.2. Industry-relevant measures of the 2016 Action Plan .....	79
2.1. Non-policy drivers of GVC participation .....	99
A6. Drivers of GVC participation .....	135
<b>Figures</b>	
1. Long-term macroeconomic performance .....	14
2. Growth and social inclusion .....	16
3. Well-being indicators .....	17
4. Income inequality has declined despite low redistribution .....	18
5. Convergence with the upper half of OECD countries has slowed .....	19
6. Recent economic developments and outlook .....	22
7. Structural imbalances .....	24
8. International competitiveness .....	25
9. Gross external debt .....	28
10. Private sector debt .....	29
11. Banks remain well capitalised .....	30
12. Monetary policy and inflation expectations .....	31
13. Fiscal performance in international comparison .....	32
14. Turkish manufacturing underperforms international peers .....	35
15. Significant productivity divergences .....	36
16. Investment obstacles reported by fully formal firms .....	37
17. Global value chain participation indices .....	38
18. Overview of human capital .....	42
19. Overview of basic institutions .....	43
20. Overview of specific regulations .....	44
21. Overview of the tax system and knowledge-based capital .....	45
22. Green growth indicators for Turkey .....	46
23. Greenhouse gas emissions .....	47
24. Air pollution .....	48
1.1. Broad-based industrialisation has promoted social inclusion .....	61
1.2. Job creation in manufacturing led broad-based employment growth in catching-up regions .....	62

1.3. Previously less active groups are better mobilised .....	63
1.4. Turkish manufacturing underperforms international peers .....	64
1.5. Manufacturing employment according to firm size and technology level .....	67
1.6. Productivity divergence within the manufacturing sector .....	67
1.7. Skills in informal firms .....	69
1.8. Allocation of wage earners according to their education level .....	69
1.9. Fully formal firms achieve higher productivity growth but create fewer jobs .....	70
1.10. Productivity divergence within fully formal manufacturing .....	71
1.11. Gazelle firms in fully formal versus total manufacturing .....	71
1.12. Room for progress in corporate governance .....	73
1.13. Room for more growth by fully formal firms .....	75
1.14. Investment obstacles reported by fully formal firms .....	75
1.15. Export intensity has weakened overall, but improved in dynamic areas .....	76
1.16. Resource allocation efficiency in total and fully formal manufacturing .....	78
2.1. Value added origin of exports and its destination .....	91
2.2. Turkey's export market shares .....	92
2.3. Participation in global value chains .....	93
2.4. Revealed comparative advantages .....	94
2.5. Sectoral contributions to global value chain participation indices .....	95
2.6. Share of high-value exports by sector .....	96
2.7. Turkey's main global value chain partner countries .....	97
2.8. Global value chain participation by export destination .....	97
2.9. Governance types of global value chains .....	98
2.10. Deviation from expected global value chain participation index .....	100
2.11. Network readiness indicators .....	101
2.12. Financial volatilities and exchange rate evaluation .....	102
2.13. Tariffs applied on primary and manufactured products .....	102
2.14. Trade-weighted depth of preferential trade agreements .....	104
2.15. Non-tariff-measures by type .....	105
2.16. OECD trade facilitation indicators .....	106
2.17. Visa restriction index .....	106
2.18. Foreign direct investment .....	107
2.19. Diffusion of selected ICT tools and activities in enterprises, 2014 .....	108
2.20. Research and development (R&D) expenditures .....	109
2.21. Government support for business research and development (R&D) .....	110
2.22. Patent applications .....	112
2.23. Experimentation-enabling policy gaps .....	113
2.24. Percentage of adults who have attained at least upper secondary education .....	114
2.25. Reliance on professional management .....	115
2.26. Turkey's trade balance .....	117
2.27. Jobs sustained by foreign final demand .....	118
2.28. Low- and medium-skilled labour share in manufacturing GVCs .....	118
