Basic statistics of Switzerland, 2016	8
Executive summary	9
Assessment and recommendations	13
Switzerland is doing well by most measures of economic and social well-being . . .	14
The recovery has been difficult to sustain	17
Assessing the large current account surplus	22
Preserving price and financial stability	25
Balancing fiscal priorities in the short and medium term	29
Boosting productivity for long-term growth and living standards	35
Ensuring dynamic skills training and life-long learning	44
Enhancing environmental sustainability	50
Bibliography	53
Annex. Progress in structural reform	57

Thematic chapters

Chapter 1. Boosting productivity in Switzerland	63
Productivity growth has under performed recently, but its level remains elevated	65
Understanding the drivers and determinants of productivity	72
Recommendations to boost Swiss productivity	100
Bibliography	101
Annex 1.A1. Firm database	106
Chapter 2. Ensuring a dynamic skills-training and life-long learning system	111
Demand for skills and skills mismatch	116
The impact of digitalisation on work	121
Overview of the Swiss education system	123
The supply of VET	129
The post-secondary education mix	132
Life-long learning	133
Equity in skills and education	136
Recommendations to make education and skills training more responsive	141
Bibliography	142

Boxes

1. Estimating the cyclical component of the current account surplus.	23
2. Reforming corporate taxation to meet international obligations.	30
3. The importance of immigration in Switzerland	33
1.1. Role of measurement issues.	66
1.2. Environmental productivity	66
1.3. The effects of immigration on productivity outcomes	70
1.4. Availability of Swiss firm-level data	74
2.1. Strengths of the Swiss vocational education and training system.	113
2.2. The 2003 OECD Adult Literacy and Life Skills Survey	119
2.3. Forecasting skills needs	130

Tables

1. Macroeconomic indicators and projections.	18
2. Possible shocks and their economic impact	22
3. Switzerland's net international investment position.	24
4. Past recommendations relating to financial-sector regulation.	28
5. Fiscal indicators	30
6. Past recommendations related to ageing.	35
7. Comparison of the regime for resolving insolvency	41
8. Past recommendations on addressing environmental sustainability	52
1.1. Comparison of the regime for resolving insolvency	84
A1.1. R&D rate of return	108
A1.2. Type of competition	109
A1.3. Correlations with productivity growth	109
2.1. Sources of working-age population growth	120
2.2. Responsibilities for non-compulsory education	124
2.3. PISA scores and gender differences across selected countries	126

Figures

1. Well-being and trust in government.	15
2. Sources of real income differences across OECD countries, 2015.	16
3. Average annual rate of trend labour productivity growth	17
4. Drivers of growth dynamics	19
5. The current account surplus has remained large despite the appreciation of the franc	20
6. Exports of goods by market and type, 2016	20
7. Labour market developments	21
8. Inflation has become positive	21
9. Developments in macro-financial vulnerabilities since 2007	22
10. Components of the current account surplus.	23
11. The savings-investment balance	24
12. Monetary policy has remained very accommodative.	25
13. Banks are recouping some costs on mortgages.	26
14. The financial sector is adjusting to the post-crisis environment.	27
15. Housing prices and household debt	28
16. Government spending and debt are comparatively low	31

17. The federal debt brake	32
18. Long-term projections for age-related spending	33
19. The role of net immigration in past and projected population growth	34
20. Comparison of hourly productivity levels across several European economies	36
21. Decomposition of the growth rate of Swiss potential output per capita	36
22. Firm performance has diverged since the crisis	37
23. Network sectors are highly regulated	38
24. Regulation of trade in services is relatively restrictive	40
25. Innovation performance is high	42
26. Parts of the population are underutilised in the labour market	43
27. Most of Switzerland's job growth has been in high-skill jobs	45
28. Job vacancy rates by sector	45
29. Tertiary qualifications in OECD countries, 2015	47
30. Participation in life-long learning across Europe	48
31. Difference in PISA science score levels between students in schools with high and low concentrations of students with an immigrant background, 2015	49
32. Students in vocational education and training	50
33. Environmental indicators	51
1.1. Growth of output per hour worked	65
1.2. CO ₂ productivity	67
1.3. Decomposition of GDP per capita amongst OECD countries	67
1.4. Decomposition of growth of potential output per capita	68
1.5. Labour productivity trends by major regions	71
1.6. Contribution to productivity growth by sector	73
1.7. Labour reallocation	73
1.8. Allocation of labour input across firms and labour productivity	75
1.9. Employment protection legislation strictness	76
1.10. Wage differences between leading and other firms	77
1.11. Employment rate differences between native- and foreign-born population	78
1.12. Share of small enterprises by main sector	80
1.13. Importance of bank and non-bank financing	82
1.14. Backward and forward participation in global value chains	85
1.15. PMRs in international comparison, 2013	86
1.16. International comparison of PMRs by sector, 2013	86
1.17. Price level comparison for household final consumption expenditure	88
1.18. Services trade restrictiveness index, 2016	89
1.19. FDI Regulatory Restrictiveness Index, 2016	90
1.20. Share of Swiss firms that are highly productive	91
1.21. Importance of the most productive firms	92
1.22. Labour productivity of the most productive firms versus the rest	92
1.23. Gross domestic expenditure on R&D	94
1.24. Quality of academic publications	94
1.25. Innovation performance remains high	95
1.26. Patents covering inventions made abroad	96
1.27. Business R&D expenditure in the pharmaceuticals industry	97
1.28. Total government support to business R&D	98

2.1. Youth labour market outcomes, 2016	113
2.2. Expected average years of schooling of the adult population	114
2.3. Public expenditure on educational institutions by level of education	115
2.4. Most of Switzerland's job growth has been in high-skill jobs	117
2.5. Job vacancy rates by sector in Switzerland and in the ICT sector across Europe. .	117
2.6. Types of mismatch in Europe	118
2.7. Adult Literacy and Life Skills Survey (ALL) scores, 2003	120
2.8. Employment in the ICT sector and its sub-sectors	122
2.9. Labour productivity in the ICT sector is high	122
2.10. PISA outcomes versus expenditure per student	125
2.11. Percentage of 25-64 year-olds whose highest level of education is upper-secondary or post-secondary non-tertiary, by programme orientation (2016)	127
2.12. The post-compulsory education system	127
2.13. Average years of tertiary schooling for the total population, 1950 to 2010	128
2.14. Tertiary qualifications in OECD countries, 2015	133
2.15. Participation in life-long learning across Europe by educational attainment ...	134
2.16. Students in vocational education and training	137
2.17. Difference in PISA science score levels between students in schools with high and low concentrations of students with an immigrant background, 2015	139
