<b>Editorial: The policy challenge: catalyse the private sector for stronger and more inclusive growth</b> .....	7
<b>Chapter 1. General assessment of the macroeconomic situation</b> .....	11
Introduction .....	12
Global growth momentum will stay strong, but only for a while .....	14
Strong and sustained medium-term growth is not yet secured .....	17
Policy measures need to catalyse a private sector response .....	41
Bibliography .....	49
Annex A1. Policy and other assumptions underlying the projections .....	52
<b>Chapter 2. Resilience in a time of high debt</b> .....	55
Debt ratios in the household and non-financial corporation sectors rose in the late 1990s, stabilising at historically high levels at the onset of the crisis ..	57
High and rising debt creates vulnerabilities .....	65
High debt has longer term implications for growth .....	73
Integrated policies to reduce financial vulnerabilities and enhance economic resilience .....	79
Bibliography .....	87
Annex A2.1. Recent OECD Economic Survey recommendations to address vulnerabilities arising from private debt .....	92
Annex A2.2. Recently introduced prudential measures .....	95
<b>Chapter 3. Developments in individual OECD and selected non-member economies</b> .....	97
Argentina .....	98
Australia .....	101
Austria .....	104
Belgium .....	107
Brazil .....	110
Canada .....	114
Chile .....	118
China .....	121
Colombia .....	125
Costa Rica .....	128
Czech Republic .....	131
Denmark .....	134
Estonia .....	137
Euro Area .....	140
Finland .....	144
France .....	147
Germany .....	151
Greece .....	155
Hungary .....	158
Iceland .....	161
India .....	164
Indonesia .....	168
Ireland .....	172
Israel .....	175
Italy .....	178
Japan .....	182
Korea .....	186
Latvia .....	189
Lithuania .....	192
Luxembourg .....	195
Mexico .....	198
Netherlands .....	201
New Zealand .....	204
Norway .....	207
Poland .....	210
Portugal .....	213
Russia .....	216
Slovak Republic .....	220
Slovenia .....	223
South Africa .....	226
Spain .....	229
Sweden .....	232
Switzerland .....	235
Turkey .....	238
United Kingdom .....	241
United States .....	245

<b>Statistical annex</b> .....	249
<b>Boxes</b>	
1.1. Deeper reforms would strengthen growth prospects .....	21
1.2. Future monetary policy frameworks and the size of central banks' balance sheets .....	42
2.1. The rise of intermediation activities by non-financial firms .....	67
2.2. Using early warning indicators to parameterise GDP growth forecast fan charts .....	74
2.3. Risks from leveraging in foreign currency loans – policy experiences from Central and Eastern Europe .....	80
<b>Table</b>	
1.1. The modest cyclical recovery will continue .....	13
<b>Figures</b>	
1.1. GDP growth projections for the major economies .....	12
1.2. The cyclical upturn has gathered pace this year .....	14
1.3. The upturn is broad-based, but remains modest by past standards .....	15
1.4. The trade upturn is being driven from Asia, but global trade intensity growth remains low .....	16
1.5. Global investment intensity remains below past norms .....	17
1.6. Business dynamism has declined in several advanced economies .....	18
1.7. Investment shortfalls are set to persist .....	19
1.8. Rising depreciation rates are helping to hold down net investment in productive capital .....	20
1.9. The upturn in the global IT cycle points to improving prospects for high-tech investment .....	20
1.10. Hurdle rates for corporate investment are well above the cost of capital .....	23
1.11. GDP growth is subdued in the emerging market economies and medium-term prospects have declined .....	24
1.12. China is an important trading partner for smaller Asian economies and commodity exporters .....	25
1.13. Potential GDP growth has fallen in many EMEs .....	26
1.14. Reform responsiveness and improvements in regulatory quality have slowed in many EMEs .....	27
1.15. Inflation is projected to remain moderate in the major economies .....	28
1.16. Recent low core inflation has been driven by a mixture of idiosyncratic factors and longer-term trends .....	29
1.17. The distributions of disaggregated core inflation price changes have shifted and become less dispersed .....	30
1.18. Corporate expectations of selling prices have strengthened .....	31
1.19. Employment and participation rates are now rising in the advanced economies .....	32
1.20. Wage growth remains moderate despite declining unemployment .....	33
1.21. Compositional changes have had only modest net effects on the growth of average wages .....	34
1.22. Changes in bond yields, equity prices and exchange rates since early May .....	35

1.23. Long-term bond yields in the euro area reflect differences in government debt more closely than prior to the crisis .....	36
1.24. Equity market performance .....	37
1.25. Risk-taking in bond markets persists .....	37
1.26. Gross issuance of bonds by non-financial corporations has been strong .....	38
1.27. Volatility in financial markets has remained subdued .....	38
1.28. Low volatility is broadly in line with the low perceived uncertainty of future economic growth .....	39
1.29. Total social financing flows in China remain robust despite the tightening of financial conditions .....	40
1.30. Markets expect policy interest rates to differ among the main economic areas	45
1.31. Projections of the US Federal Reserve balance sheet .....	46
1.32. The fiscal stance is expected to ease in many OECD countries .....	47
1.33. Overall government budget balances are projected to improve in most OECD countries .....	47
1.34. Government interest payments have declined despite rising debt in many OECD countries .....	48
2.1. Private non-financial sector debt has increased .....	58
2.2. Non-financial corporation debt in advanced countries .....	59
2.3. Credit and bond issuance in EMEs .....	60
2.4. The role of bond financing has increased .....	61
2.5. International and foreign currency issuance has increased .....	62
2.6. Credit quality has deteriorated in advanced economies and EMEs, risks for bond investors have increased .....	63
2.7. Household debt is high in many advanced economies .....	64
2.8. Consumer credit is rising in some countries .....	65
2.9. NFC debt servicing costs are rising in some countries .....	66
2.10. International debt and currency mismatches .....	69
2.11. Bank capital and the shift to debt securities .....	69
2.12. Households and non-bank financial intermediaries are exposed to NFC debt	70
2.13. Duration risk has never been higher .....	71
2.14. Changes in house prices and household debt are positively correlated .....	72
2.15. House prices in OECD countries .....	73
2.16. Real estate dynamics and severe recessions .....	76
2.17. Too much, or the wrong kind, of finance is negatively associated with growth and equality .....	77
2.18. The disconnect between debt and investment .....	77
2.19. Zombie firms capture capital and reduce dynamism .....	79
2.20. Declining initial public offerings of smaller growth company listings in advanced economies .....	79
2.21. Debt bias in corporate tax systems .....	84
2.22. The design of insolvency regimes across countries .....	85
2.23. Growth-fragility trade-offs .....	86
