What now, with whom, where to – the future of the UE

RECOMMENDATIONS FOR EUROPE 6

EXECUTIVE SUMMARY 7

CHAPTER 1 MACROECONOMIC CONDITIONS AND OUTLOOK 10

The global economy has moved from recovery mode to a pronounced upturn. Output gaps in the euro area and the United States are expected to close soon, if they have not done so already. East and Southeast Asia are also making strong contributions. The Chinese and the Japanese economies expanded strongly in 2017, both fuelled by economic stimuli. In Latin America, the recovery was dampened by slow economic development in Brazil and the aftermath of the devastating earthquakes in Mexico. India's economy is regaining its footing. The global upturn is likely to continue for a while, before gradually slowing down as factors of production become increasingly over-utilised, particularly in North America and in Europe.

CHAPTER 2 BUILDING TRUST BETWEEN SUSPICIOUS MINDS 35

Trust is crucial to hold societies together. As for nation-states, trust in the European Union can be strengthened by contractual security, as well as by repeated and continuing interactions between people. In the absence of sufficiently high levels of trust, pooling resources across national boundaries may be perceived as painful and can erode, rather than build up a common identity. This chapter discusses the importance and development of trust both between people and in national and European institutions.

CHAPTER 3 ALL TOGETHER NOW: THE EUROPEAN UNION AND THE COUNTRY CLUBS 47

A founding principle of the European Union is that all member states and citizens should participate equally in a single process of ever closer integration. The euro crisis, Brexit and global geo-political trends make it interesting to revisit the issue of whether more flexible structures might be more promising. By comparing supranational groupings to country clubs, this chapter examines the pros and cons of a potential reconfiguration of the euro area, the Schengen Agreement, and the European Union. This chapter argues that while a multi-speed and variable geometry approach would solve some problems, it would also raise new issues of transparency and accountability of decision-making, free-riding, and the heterogeneity of rights depending on residence.

CHAPTER 4 IT'S OK TO BE DIFFERENT: POLICY COORDINATION AND ECONOMIC CONVERGENCE 64

Convergence has long since been one of the key goals of the European Union. As this chapter shows, however, convergence has not yet been achieved in many areas, most evidently in the case of income and employment levels, as well as for policies and institutional quality, undermining trust in European institutions. At the same time, diversity is natural and valuable, and policies need to be targeted to country-specific circumstances. Policy coordination at the European level can pave the way for necessary reform by providing information and encouraging dialogue, but within the existing institutional setup, economic convergence mainly hinges on the policies adopted by the member states.

Basic statistics of Finland	8
Executive summary	9
Assessment and recommendations	13
A strong revival in exports is boosting growth.....	14
Strong economic performance and low inequality foster well-being.....	22
Environmental achievements and ambitions are high.....	26
Structural vulnerabilities remain in the financial sector.....	28
Public finances are under pressure from an ageing population.....	30
Reforms to the tax system would enhance growth.....	32
Work incentives need to be strengthened, while maintaining strong social protection.....	39
Finding direction for benefit reform.....	43
Reform priorities within the current system.....	46
Bibliography.....	51
Annex. Progress in structural reform	55

Thematic chapters

Chapter 1. Tax reform to support growth and employment	59
The public finances are currently healthy but face mounting challenges.....	60
Redistribution lowers income inequality.....	65
Promoting output and employment growth.....	67
Encouraging greener growth.....	77
Recommendations on taxation.....	80
Bibliography.....	80
Chapter 2. Benefit reform for employment and equal opportunity	85
The case for benefit reform.....	86
Finding direction: benefit reform scenarios.....	93
Towards robust work incentives and protection for all.....	109
Summary and recommendations.....	119
Recommendations to reform working-age benefits.....	119
Bibliography.....	120

Boxes

1. The Competitiveness Pact.....	16
2. The health, social services and regional government reform.....	17

3. The Finnish basic income trial	45
1.1. Tackling tax avoidance: The OECD/G20 BEPS project	76
2.1. Interpreting common measures of work incentives	94
2.2. Universal credit in the United Kingdom	101
2.3. Examples of controlled experiments in activation policies	117

Tables

1. Macroeconomic indicators and projections	19
2. Possible shocks and their economic impact	21
3. Past recommendations on productivity-enhancing reform	22
4. Past recommendations to promote gender equality	24
5. Past recommendations on environmental sustainability	28
6. Past recommendations on financial stability	30
7. Impact of budget measures	31
8. Past recommendations on fiscal policy	32
9. Past recommendations on health care	32
10. Past recommendations on tax reform	39
11. Reform could reduce average effective tax rates	44
12. Past recommendations on labour market reform	51
1.1. Breakdown of government expenditure and revenue	64
2.1. Opportunities and challenges associated with non-standard work	92
2.2. Main working-age benefits and income taxation	96
2.3. Comparative average effective tax rates, income-related unemployment insurance	104
2.4. Comparative average effective tax rates, social assistance and housing benefit	105

Figures

1. Real GDP growth is gathering momentum	14
2. GDP per capita and employment rate are below the other Nordics	15
3. GDP per capita gaps reflect both productivity and labour utilisation differences	15
4. Unemployment remains high	20
5. Main export sectors and destinations	21
6. Productivity needs a boost	22
7. Finns enjoy a high quality of life	23
8. Income inequality is low and stable	24
9. Gender inequalities persist	25
10. Environmental performance is strong	27
11. The banking system shows some vulnerabilities (2017 Q3 or latest)	29
12. Household debt is moderate and housing prices are broadly stable	30
13. The government deficit persists but debt is contained	31
14. Health reform and higher employment would help stabilise debt	32
15. Ageing is increasingly weighing on public finances	33
16. The tax burden is among the highest in the OECD	34
17. Social spending is not as high in international comparison when private social spending and taxation of benefit income are taken into account	34

18. Tax revenue from recurrent taxes on immovable property is still relatively low . . .	35
19. VAT rates are high but efficiency is slightly below average	36
20. Corporate tax rate and revenue are low	37
21. Corporate tax revenue has so far held up relatively well despite sharp tax rate cuts	38
22. The labour market has been hard hit by crises	39
23. Compared to other Nordics, employment is low across gender and age	40
24. The tax wedge on labour remains high	41
25. Work does not always pay	42
26. The world of work is changing	43
27. A basic income would alter the income distribution	45
28. Net income and work incentives in the current system	46
29. Exit rates spike immediately before unemployment benefit expiry	47
30. Reforms to child-related fees and benefits would improve work incentives for second earners	48
31. Shortening the unemployment tunnel increases employment substantially	49
32. Rising unemployment and budget cuts have put the employment service under strain	50
1.1. The tax burden is among the highest in the OECD	61
1.2. Social spending is not as high in international comparison when private social spending and taxation of benefit income are taken into account	62
1.3. The government deficit is modest but debt has risen markedly	63
1.4. Government revenue has failed to keep up with spending over the past decade	63
1.5. Government gross debt remains relatively low and assets are large	64
1.6. Ageing is increasingly weighing on the public finances	65
1.7. Redistribution lowers income inequality	66
1.8. The tax wedge on labour remains high	68
1.9. The combined top marginal rate of personal income tax and employee social security contributions is high	69
1.10. Tax revenue from recurrent taxes on immovable property is still relatively low	70
1.11. The earnings premium from tertiary education is higher than in the other Nordics	70
1.12. VAT rates are high but efficiency slightly below average	72
1.13. Corporate tax rate and revenue are low	74
1.14. Corporate tax revenue has so far held up relatively well despite sharp tax rate cuts	75
1.15. Environmentally related tax revenue is high compared to other OECD countries	79
1.16. Diesel is lightly taxed compared to gasoline	79
2.1. The labour market has been hard hit by crises	87
2.2. Employment is low compared to other Nordics across gender and age	89
2.3. High unemployment traps and inactivity traps in Finland	90
