Executive summary	9
Key Policy Insights	15
Income gains and government policies are lifting well-being	15
The economy is expanding at a healthy pace	17
Monetary policy is contributing to macroeconomic stability	23
Deepening and broadening financial markets and access	24
Fiscal policy is sound, but public spending is constrained by low revenues	27
Government debt is low	27
Finding funds for development-related spending is a challenge	30
Raising revenues to meet spending needs	34
Upgrading tax administration and increasing enforcement are priorities	34
Taxes can be broader and more inclusive	36
Taxes on goods and services could be more efficient	38
Property tax could yield medium-term revenue gains	41
Reaping the demographic dividend	42
Most workers are still informally employed	43
Low skills are holding back growth	47
Improving health outcomes will reinforce learning and work	49
Simulations of structural reforms	49
Using tourism to diversify the economy and support regional development	50
Tourism's potential is high but not fully exploited	50
Tackling the infrastructure gap is crucial for scaling up tourism	53
Facilitating firm creation and growth to foster local development	54
Policies need to manage the sustainable development of tourism	55
Adjusting to a greener growth path	56
Deforestation and pollution threaten sustainability	56
Transitioning to a low-carbon and energy-efficient economy	58
Bibliography	59
Annex. Progress in structural reform	65
Thematic chapters	69
Chapter 1. Raising more public revenue in a growth- and equity-friendly way	71
Main characteristics of the Indonesian tax system	72
Tax revenues have remained low	72
Most tax revenues are from income and consumption taxes raised by the central government	74
Administrative reform remains a priority	76
Reforms to tax administration are improving performance	76
Voluntary compliance and enforcement should be raised together	80
Income taxes are levied on narrow bases	82
Relatively few individuals must pay personal income tax	83
Corporate income taxation can be broader and more growth-friendly	87
Taxes on goods and services have further potential	92

A more efficient value-added tax would raise more revenue.....	93
Higher excise taxes can raise revenue and improve health outcomes.....	96
Well-designed environmental tax reform could work toward several goals.....	97
Property tax is currently low.....	100
Recurrent taxes on immovable property are underused.....	101
Transaction taxes are a significant local government tax.....	102
Better management of natural resources could raise related revenues.....	102
Bibliography.....	106
Annex A.....	111
Chapter 2. Making the most of tourism to promote sustainable regional development.....	113
Recent developments and tourism prospects in Indonesia.....	115
Recent developments and the size of the industry.....	115
The medium-term perspective.....	119
Boosting regional development through tourism.....	122
Building relevant infrastructure will be crucial for scaling up tourism.....	122
Tourism can generate employment opportunities in more areas.....	124
Improving the business environment to boost entrepreneurship.....	128
Reaping the benefits of digitalisation.....	131
Ensuring growth in tourism is sustainable.....	133
Tourism and the environment are deeply interconnected.....	133
Improving the planning process to better include local needs.....	138
Tourism as an opportunity to promote female labour participation.....	141
Bibliography.....	145
