Editorial : Growth has peaked: Challenges in engineering a soft landing	7
Chapter 1. General assessment of the macroeconomic situation	11
Introduction	12
Global growth is set to ease.....	14
Key issues and risks	22
Policy requirements	34
Policy options to counteract a future downturn.....	43
References	47
Annex 1.1. Policy and other assumptions underlying the projections.....	49
Chapter 2. Decoupling of wages from productivity: What implications for public policies?	51
Introduction and summary.....	52
Setting the scene	53
The drivers: Aggregate and disaggregated evidence	59
References	63
Chapter 3. Developments in individual OECD and selected non-member economies	67
Argentina	68
Australia	71
Austria	74
Belgium	76
Brazil	79
Canada	82
Chile	86
China	89
Colombia	92
Costa Rica.....	95
Czech Republic	98
Denmark	101
Estonia	104
Euro area	107
Finland	111
France	114
Germany	117
Greece	120
Hungary.....	123
Iceland	126
India	128
Indonesia.....	131
Ireland	134
Israel	137
Italy	140
Japan	144
Korea	148
Latvia	151
Lithuania.....	154
Luxembourg	157
Mexico	160
Netherlands	163
New Zealand	166
Norway	169
Poland	172
Portugal.....	175
Russia	178
Slovak Republic	181
Slovenia	184
South Africa	187
Spain	190
Sweden	193
Switzerland	196
Turkey	199
United Kingdom	202
United States	206
Boxes	
1.1. Trade restrictions have increased this year	23
1.2. Non-tariff measures and trade	26
1.3. Vulnerabilities of Italian banks	37

Tables

1.1. Global growth is set to slow	12
2.1. There are large cross-country differences in macro-level decoupling	56
2.2. Drivers of decoupling	61

Figures

1.1. Global growth and confidence have moderated	14
1.2. Rising trade tensions have affected capital spending plans and added to uncertainty	15
1.3. Global growth is set to ease gradually	17
1.4. Global trade is slowing and trade intensity remains modest	18
1.5. The crisis has had a persistent impact on living standards	19
1.6. Potential output growth is projected to slow under current policies	20
1.7. Survey indicators point to rising capacity constraints	21
1.8. Wage growth could pick up quickly as labour markets tighten	21
1.9. Inflation is projected to rise modestly in the advanced economies	22
1.10. Tariffs are already visible in US trade and price data	23
1.11. The adverse effects of higher tariffs could intensify	24
1.12. Tariff and NTM estimates for selected economies	26
1.13. Price effects and regulatory similarity with partners	27
1.14. Supply disruptions could push up oil prices, with a negative impact on global activity	28
1.15. Financial tensions have risen in emerging-market economies	31
1.16. Financial and trade exposures to Argentina and Turkey are generally small ..	32
1.17. The output effect of higher risk premia in emerging-market economies	32
1.18. Fundamentals differ across emerging-market economies	33
1.19. Changes in financial conditions in emerging-market economies during past and recent turbulence	33
1.20. Several central banks have become dominant holders of domestic government bonds	35
1.21. Sovereign and bank riskiness have risen in Italy	37
1.22. Cost of bank credit and bank credit growth	38
1.23. Italian banks remain exposed to sovereign debt	39
1.24. Fiscal policy will be broadly neutral and government debt will fall in most OECD countries	40
1.25. Debt servicing costs could still decline in some G7 countries	41
1.26. GDP effects of selected structural reforms in G7 countries	43
1.27. An interaction of downside risks would slow global growth substantially	44
1.28. Policy options to offset a global cyclical downturn	46
2.1. The conceptual framework underlying the analysis of decoupling	54
2.2. Real median wages have decoupled from labour productivity	55
2.3. Average wages and productivity in frontier firms and others	57
2.4. 'The Great Divergence(s)' in wages and productivity	58
2.5. High skills reduce capital-labour substitution	62
