<b>Executive summary</b> .....	<b>9</b>
<b>KEY POLICY INSIGHTS</b> .....	<b>15</b>
Recent macroeconomic developments and short-term prospects .....	18
Strengthening the sustainability of public finances .....	24
Improving the efficiency of public spending .....	26
Raising revenues in a growth-friendly manner .....	29
Enhancing financial stability.....	32
Improving bank and firm profitability and solvency.....	34
Optimising the insolvency regime.....	36
Addressing medium-term challenges for the economy.....	39
Improving labour utilisation and reducing poverty .....	39
Reinvigorating productivity growth .....	45
Further recalibrating the economy for greener growth.....	51
<b>References</b> .....	<b>54</b>
<b>Annex. Progress in structural reform</b> .....	<b>57</b>
<b>Chapter 1. Public policy reforms to further improve export performance</b> .....	<b>61</b>
Introduction.....	62
Improving the framework policies for high-potential businesses .....	70
Reducing administrative burdens .....	71
Reforming other policy settings that discourage or hamper firm growth.....	74
Improving access to finance .....	78
Ensuring domestic infrastructure promotes better export performance .....	80
Transport .....	81
Tourist accommodation.....	83
Digital networks .....	85
Promoting better skills and innovation in the business sector .....	88
Further providing the right skills.....	88
Boosting innovation in the export sector.....	90
<b>References</b> .....	<b>96</b>
<b>Chapter 2. Enhancing judicial efficiency to foster economic activity</b> .....	<b>101</b>
Judicial efficiency is crucial for business activity .....	105
Judicial efficiency ensures contract enforcement.....	106
Judicial efficiency affects business dynamics .....	107
Court settings is key for judicial efficiency .....	108
Trial length remains long with significant disparities .....	109
Judicial resources are not allocated efficiently.....	111
Management of courts remains weak.....	114

Better meeting the demand for judicial services .....	117
Trial costs shape the demand for judicial services .....	118
Alternative dispute resolution mechanisms can be developed further .....	125
Improving institutional quality and preventing corruption .....	129
<b>References .....</b>	<b>135</b>

## Tables

Table 1. Macroeconomic indicators and projections .....	23
Table 2. Possible shocks to the Portuguese economy .....	24
Table 3. Illustrative annual fiscal impact of recommended reforms .....	31
Table 4. Past recommendations related to improving fiscal sustainability .....	32
Table 5. Past recommendations related to improving financial stability .....	38
Table 6. Past recommendations related to improving labour utilisation and reducing poverty .....	45
Table 7. Illustrative impact of structural reforms on GDP per capita .....	46
Table 1.1. Determinants of Portuguese export growth .....	68
Table 1.2. Estimates of export quality .....	91
Table 1.3. Regression results (Dependent variable = export quantity) .....	91
Table 2.1. The number of judges has increased strongly .....	112

## Figures

Figure 1. Past structural reforms helped the recovery .....	15
Figure 2. Wellbeing can be improved along multiple dimensions .....	16
Figure 3. The population is expected to age rapidly .....	17
Figure 4. Strong exports sustained activity .....	18
Figure 5. Travel and tourism now accounts for almost half of services exports .....	19
Figure 6. External imbalances remain high .....	20
Figure 7. Investment has recovered despite ongoing corporate sector deleveraging .....	21
Figure 8. House prices have risen strongly .....	22
Figure 9. Macro-financial vulnerabilities remain high in some areas .....	24
Figure 10. Sovereign borrowing costs have eased but public debt remains high .....	25
Figure 11. Sustained primary budget surpluses are needed to durably lower public debt .....	26
Figure 12. Public staff expenditures are rising at a slower pace than prior to the crisis .....	27
Figure 13. A low number of nursing graduates compounds existing shortages .....	28
Figure 14. Most potential VAT revenues are untaxed .....	30
Figure 15. The NPL ratio in Portugal remains elevated .....	32
Figure 16. The loan-loss coverage ratio is high in Portugal .....	33
Figure 17. Vulnerabilities remain in the Portuguese banking sector .....	34
Figure 18. The NPL net of provisions to capital ratio is high in Portugal .....	36
Figure 19. Personal bankruptcy law is stringent in Portugal .....	37
Figure 20. Court proceedings for credit claims can take a long time .....	38
Figure 21. The pool of labour is expected to decline over the long run .....	39
Figure 22. Incidence of long-term unemployment is high in Portugal .....	40
Figure 23. Low-skilled people face significant employment barriers .....	40
Figure 24. Poverty is high in jobless households .....	41
Figure 25. Labour market programmes differ in effectiveness for re-employment .....	43
Figure 26. Productivity growth has slowed in Portugal .....	45
Figure 27. Regulation remains stringent in some sectors .....	47

Figure 28. Court proceedings are shorter than before, but still long .....	50
Figure 29. Significant bottlenecks remain in some court districts.....	50
Figure 30. Green growth indicators: Portugal .....	52
Figure 31. CO2 emissions and energy consumption from transport have declined relatively slowly...	53
Figure 1.1. Exports have expanded rapidly .....	62
Figure 1.2. External imbalances have declined .....	62
Figure 1.3. Tourism has accounted for a large share of recent export growth .....	63
Figure 1.4. The United Kingdom has become an increasingly important origin of tourists .....	64
Figure 1.5. Increased security risk in some destinations appears to have discouraged some tourists..	64
Figure 1.6. Both foreign demand for Portuguese exports and domestic demand have been weak .....	66
Figure 1.7. Some businesses adjusted to the cyclical shock.....	67
Figure 1.8. Export intensity is lower than in other small European countries.....	69
Figure 1.9. A declining share of exporters are young firms .....	70
Figure 1.10. There is scope for government reforms to support firm growth .....	71
Figure 1.11. Administrative burden on business has declined over recent years .....	72
Figure 1.12. Tax administration takes significant time for businesses.....	73
Figure 1.13. Portuguese R&D tax incentives are more beneficial for profitable firms .....	75
Figure 1.14. Services prices have risen relatively rapidly .....	76
Figure 1.15. Restrictions on trade in some professional services reduce competition .....	77
Figure 1.16. Inefficient customs processes may be exacerbated by barriers to the customs broker profession .....	78
Figure 1.17. Borrowing costs for Portuguese firms have declined rapidly .....	79
Figure 1.18. Domestic infrastructure can be improved .....	80
Figure 1.19. Rising tourist demand has pushed-up accommodation prices .....	84
Figure 1.20. Broadband access is widespread but not many firms sell online .....	86
Figure 1.21. Few businesses have integrated digital technologies into their operations .....	86
Figure 1.22. Only half the population have basic digital skills .....	87
Figure 1.23. The educational attainment of adults is lagging.....	88
Figure 1.24. Participation in lifelong learning opportunities is low .....	89
Figure 1.25. Professional management in the business sector is relatively rare.....	90
Figure 1.26. The export product mix is relatively mature .....	92
Figure 1.27. Research intensity and innovation output in the business sector are low .....	92
Figure 1.28. Collaborative research activities are limited, especially for small firms .....	93
Figure 2.1. Court proceedings are shorter than before, but still long .....	102
Figure 2.2. Judicial efficiency as measured by trial length .....	103
Figure 2.3. Forbearance loans are frequently extended in Portugal .....	106
Figure 2.4. The average time to pay is long in Portugal.....	107
Figure 2.5. Net job creation of start-ups is reduced by judicial inefficiency.....	107
Figure 2.6. The allocation of resources is inefficient in Portugal.....	108
Figure 2.7. Resolution in courts is slow in Portugal.....	109
Figure 2.8. Court congestion has been alleviated, but remains significant .....	110
Figure 2.9. Some cases still require a significant amount of time .....	110
Figure 2.10. Total court budget does not explain court performance.....	111
Figure 2.11. Significant bottlenecks remain in some court districts.....	113
Figure 2.12. Litigation is comparatively frequent in Portugal .....	118
Figure 2.13. Court fees for a high value claim are low in Portugal.....	119
Figure 2.14. Number of lawyers per inhabitant is high in Portugal .....	121
Figure 2.15. The productivity in the legal services sector is low in Portugal.....	122
Figure 2.16. Regulation in the legal professions sector is generally strict .....	122
Figure 2.17. Alternative dispute resolution mechanisms falls far behind the court system .....	127

Figure 2.18. Personal bankruptcy law is stringent in Portugal.....	128
Figure 2.19. Indicators of corruption.....	130
Figure 2.20. Resources to public prosecution services differ notably across countries .....	133

### **Boxes**

Box 1. Quantifying the fiscal impact of selected policy recommendations .....	31
Box 2. Quantification of the structural reforms recommended in this survey.....	46
Box 1.1. The durability of the tourism upswing.....	63
Box 1.2. The drivers of Portuguese export performance.....	68
Box 1.3. Portugal's Simplex+ Programme.....	72
Box 1.4. Portuguese National Initiative on Digital Competencies 2030 (INCoDe.2030).....	87
Box 1.5. Estimates of the quality of manufacturing exports .....	91
Box 1.6. Fostering innovation collaboration through <i>Programa Interface</i> .....	93
Box 2.1. Recent reforms in the Portuguese court system.....	103
Box 2.2. Impact of judicial efficiency on economic performance .....	105
Box 2.3. The Portuguese court system .....	109
Box 2.4. Public Prosecution in Portugal.....	131
