EXECUTIVE SUMMARY	9
Key Policy Insights	13
The economy remains strong, though with signs of growth slowdown.....	13
Towards stable and inclusive growth.....	42
References.....	76
Chapter 1. Realising regional potentials through better market integration	81
Phasing out local protectionism to create a single product market.....	82
Creating a single labour market for stronger growth and inclusiveness	91
Regional policies to help laggard regions catch up.....	100
References.....	123
Annex A. Gauging disparities across regions in multiple dimensions	126
Annex B. The three initiatives	132
Annex C. The four mega-regions	136

Tables

Table 1. Excess capacity is being phased out.....	18
Table 2. Measures of fiscal deficit	23
Table 3. Fiscal stimulus measures will increase in 2019.....	24
Table 4. Macroeconomic indicators and projections.....	25
Table 5. Past OECD recommendations on monetary and financial policies	35
Table 6. Estimated fiscal impact of selected recommended reforms	41
Table 7. Past OECD recommendations on fiscal reform.....	42
Table 8. Estimated impact of structural reforms on per capita GDP.....	52
Table 9. Past OECD recommendations to increase productivity	53
Table 10. Past OECD recommendations on inclusive growth	59
Table 11. Past OECD recommendations on greening growth.....	74
Table 1.1. Protectionist measures in procurement and transportation are rampant.....	89
Table 1.2. Within-province disparities are dominant in overall disparities at the county level	103
Table 1.3. Fiscal transfers reduce disparities in province-level revenues	104

Figures

Figure 1. China continues to converge to OECD, notwithstanding growth moderation	13
Figure 2. Growth is increasingly driven by consumption and services.....	15
Figure 3. Job vacancy rates are high in some inland cities.....	16
Figure 4. Stock prices have partially recovered	16

Figure 5. The slowdown in growth and investment has been geographically uneven	17
Figure 6. House prices are flattening in mega cities but still not affordable for average earners	19
Figure 7. Trade growth has stalled	20
Figure 8. The goods trade surplus is shrinking while the services trade deficit is growing	21
Figure 9. Producer price inflation is trending down and consumer price inflation remains stable	22
Figure 10. New enterprise and mortgage lending growth faded	28
Figure 11. The share of lending at and below the benchmark rate have fallen	29
Figure 12. Forex reserves are stable and the exchange rate appreciation faded in 2018.....	30
Figure 13. Corporate deleveraging continues amid shrinking shadow banking.....	32
Figure 14. Increasing household credit creates financial risks	34
Figure 15. Debt and urban construction bonds are high relative to output and revenues.....	37
Figure 16. Relief to LGIVs may derail debt from the sustainable path.....	38
Figure 17. The burden at the local level is high	40
Figure 18. The saving rate is still very high	43
Figure 19. Capital accumulation still drives growth.....	44
Figure 20. Catching up with the United States is rapid but the productivity gap is still large	45
Figure 21. In several manufacturing industries only a small share of patents are genuine inventions..	46
Figure 22. SOEs spend more on R&D per patent but own fewer patents per researcher than private or foreign patenters.....	47
Figure 23. State ownership in some commercially oriented sectors is still high.....	48
Figure 24. Import tariffs are relatively high, but non-tariff measures are frequently used	50
Figure 25. The services value added share of exports is rising	51
Figure 26. Income inequality has declined but is still high	54
Figure 27. The tax and transfer system are not very effective.....	55
Figure 28. Few people pay income taxes and only a tiny fraction at the highest marginal rate.....	56
Figure 29. Those who pay income taxes pay at very low rates	57
Figure 30. Personal income taxes remain a tiny source of tax revenues in China.....	58
Figure 31. The richest people hold a high share of net personal wealth	58
Figure 32. Chinese ODI is expanding rapidly	61
Figure 33. Most Chinese ODI went into services.....	62
Figure 34. Manufacturing ODI is small, but is growing rapidly	63
Figure 35. More investment is done through M&A than greenfield	64
Figure 1.36. In many manufacturing industries, M&A and greenfield investment are equally important	65
Figure 37. China's digital economy is about double the size of India's, but smaller than in advanced economies.....	66
Figure 38. The ICT sector is not particularly large	67
Figure 39. The internet penetration rate is on par with other upper middle-income countries	68
Figure 40. Smart manufacturing is most widespread in coastal provinces.....	69
Figure 41. The sharing economy is expanding rapidly, in knowledge and skills sharing	70
Figure 42. Internet penetration is high in the East, but remains low in the Centre and the West.....	71
Figure 43. Environmental investment has stagnated	72
Figure 44. Ample room for improvement in greening growth	75
Figure 1.1. Local protectionism is mostly manifest in purchasing goods or services from specific providers, in particular in the construction industry.....	86
Figure 1.2. Wealthier provinces, the internet industry, recent years saw more cases and most were unsuccessful.....	88
Figure 1.3. Urbanisation is progressing but still low in some provinces.....	93
Figure 1.4. The growth rate of the migrant population is slowing	95
Figure 1.5. Migrants are young and have little formal education as of 2017	96

Figure 1.6. Admission rates in kindergartens and schools is still low for migrants' children.....	98
Figure 1.7. The migrant work force is ageing	99
Figure 1.8. Government support doesn't prevent growing pension deficits.....	100
Figure 1.9. The West and the Centre are catching up, but not much the Northeast	101
Figure 1.10. Equalisation transfers and agriculture-related subsidies are the most important transfer items	104
Figure 1.11. The gap between own revenues and spending is the greatest at the lowest levels.....	105
Figure 1.12. Counties rely on transfers for a large part of their spending.....	106
Figure 1.13. Counties rely on VAT and non-tax revenues and are in charge of education and other crucial public services	107
Figure 1.14. Disparities in per capita spending are even greater than in revenues.....	108
Figure 1.15. In several Western provinces, spending disparities are high across counties	109
Figure 1.16. Urban-rural disparities are declining, but are still significant.....	116
Figure 1.17. Agriculture productivity is low and its gap with other sectors is growing.....	117
Figure 1.18. Provinces with big primary sectors tend to be less wealthy.....	118
Figure 1.19. Infrastructure in villages lags well behind cities.....	119
Figure 1.20. Rural medical staff is in shortage.....	120
Figure A.1.21. Disparities in per capita incomes across China's provinces are large.....	127
Figure A.1.22. Old-age dependency varies greatly across provinces.....	128
Figure A.1.23. Population density varies widely across provinces	130
Figure A.1.24. The drivers of growth vary widely across provinces	131
Figure B.1.25. The three strategies cover a diverse set of regions	133
Figure B.1.26. Jingjinji is a diverse region.....	135
Figure C.1.27. The East is bigger, wealthier and more open than the other regions.....	137

Executive summary	11
Key policy insights	19
Economic growth has peaked	24
The economic outlook has weakened, but remains positive	24
Financial risks	30
Better use of public spending to boost growth and well-being.....	33
Key economic and social challenges remain.....	33
Reducing public spending and improving their efficiency.....	38
Making taxes more favourable to employment and productivity.....	50
Ensuring environmental sustainability.....	53
Improving productivity, employment and social mobility.....	56
Product and services market reforms would boost growth	56
Boosting innovative business investment.....	63
Strengthening skills through initial education.....	65
Bibliography	69
Thematic Chapters	75
Chapter 1. Improving labour market performance	76
The labour market has improved but challenges remain	77
Those with few qualifications and young people face the most difficulties	83
Employment and inequality have polarised	83
Wages have decoupled from productivity.....	89
The labour market needs to be transformed successfully.....	94
Strengthening and adapting people’s skills.....	96
Promoting lifelong learning and skill acquisition	96
Increasing support for those in the greatest difficulty	101
Improving young people’s move into employment	104
Encouraging job quality and productivity gains	110
Improve incentives to work for low wage earners	110
Reducing labour market duality	114
Strengthening collective bargaining.....	123
Limiting inequality and improving support for low incomes	130
Better co-ordinating and simplifying support for low income households	130
Reducing gender bias at work	133
Bibliography	138
Chapter 2. Improving the efficiency of public investment	150
Overview and challenges to public investment.....	152
The stock of public capital is extensive and its quality is high... ..	152

...but a stronger focus on maintenance and on a thorough selection of investment projects is needed	153
Local governments are responsible for the majority of public investment and the private sector could play a bigger role.....	155
Investing for the future.....	156
Strengthening framework conditions for effective public investment.....	159
Towards a better prioritisation and selection of investment projects	159
Leveraging the private sector in the provision of infrastructure	164
Strengthening local government capacities for public investment.....	166
Better maintenance and greener investment in transport and energy	170
Improving transport infrastructure investment.....	170
Promoting appropriate energy infrastructure	177
Encouraging digitalisation and innovation	182
Fostering a faster transition towards digitalisation.....	182
Getting the most out of public investment in R&D.....	185
Bibliography	192

Tables

Table 1. Macroeconomic indicators and projections.....	25
Table 2. Low probability events that could lead to major changes in the outlook.....	29
Table 3. Potential impact of some ongoing reforms on GDP per capita after 10 years	36
Table 4. Potential impact of some reforms proposed in this Survey on GDP per capita after 10 years	37
Table 5. Fiscal indicators.....	39

Executive summary	11
Key policy insights	17
Output growth has peaked, but is projected to continue at a moderate pace	22
Fiscal policy: short-term challenges and threats to long-run fiscal sustainability	26
The new fiscal targets and preparing for the 2019 tax hike	27
Ensuring long-run fiscal sustainability.....	29
Monetary policy and the financial sector.....	32
Recent developments in monetary policy	34
The financial sector: strong at present but emerging concerns	37
Sustaining labour inputs in the face of population ageing.....	39
Narrowing the productivity gap with leading OECD countries.....	44
Improving corporate governance in Japan	45
Improving the performance of SMEs.....	50
Green growth policies to improve well-being and promote sustainable growth.....	55
More ambitious climate policy would have many benefits.....	55
Japan needs to reform energy markets further to make the most of renewables.....	59
The scope for increasing carbon taxation is large	59
Bibliography	62
Annex A1. Osaka: meeting the challenges of sustaining growth and providing social services in the face of population ageing.....	66
Annex. Progress in structural reform	71
Chapter 1. Labour market reform to cope with a shrinking and ageing population	73
Extending working lives	75
A reversal of falling employment rates for older persons since 2000.....	75
Japan's traditional labour market practices	77
Policies that have helped to lengthen working lives	80
The skills of older workers.....	83
Reforms to extend the careers of older persons	85
Reducing obstacles to the employment of women.....	93
Improving work-life balance.....	95
Providing high-quality, affordable childcare.....	98
Ensuring that women do not have to leave their jobs to care for elderly relatives.....	101
Reforming the tax system to remove disincentives to work for second earners	101
Enhancing women's role by reducing discrimination	103
Making greater use of foreign workers	109
Promoting inclusive growth by breaking down labour market dualism	112
Bibliography	117
Chapter 2. Meeting fiscal challenges in a rapidly ageing society	123
Ensuring fiscal sustainability in Japan requires significant fiscal consolidation	127

Japan's new fiscal consolidation plan	128
A path to fiscal sustainability	129
Policies to control social spending while providing quality health and long-term care	132
Factors driving health and long-term care spending	132
