Figures		
Figure 1. Growth has been driven mainly by demographics		

Figure 2. Exports to the US are driving total export growth	
Figure 3. Remittances have been increasing	
Figure 4. Growth has not been strong enough to allow for convergence to higher living standards	. 19
Figure 5. Poverty rates are still high but differ greatly across states	
Figure 6. Inequality is high.	
Figure 7. Female labour market participation is low	. 21
Figure 8. Security is low, hurting women in particular	. 22
Figure 9. Well-being varies greatly across states	. 22
Figure 10. Without policy reforms, Mexico's convergence to higher living standards will be limited	1 23
Figure 11. The Mexican economy benefits from strong economic fundamentals	
Figure 12. External debt has declined and foreign exchange reserves are adequate	. 29
Figure 13. Investment and oil production are weighing on the economy	
Figure 14. Unemployment is low but informality remains elevated	
Figure 15. Real wages are recovering	
Figure 16. Investment is low	
Figure 17. Headline inflation is still above target	
Figure 18. Inflation expectations	
Figure 19. The monetary policy stance is tight	
Figure 20. Selected banking sector indicators	
Figure 21. Financial inclusion remains low	
Figure 22. Bank branches are unevenly distributed	
Figure 23. Mexican SMEs face high borrowing costs	
Figure 24. Competition in the banking sector is low	
Figure 25. Fiscal performance has improved	
Figure 26. Public sector debt has been contained	42
Figure 27. Current policies are consistent with stable debt	43
Figure 28. The tax and transfer system does little to reduce income inequality	
Figure 29. There is room to increase revenues and the progressivity of PIT	
Figure 30. The VAT revenue ratio is the lowest among OECD countries	
Figure 31. The tax administration needs to be strengthened	
Figure 32. Social spending has increased but remains low	
Figure 33. The quality of Mexico's institutions is low	
Figure 34. Perceived corruption continues to be a substantial problem	
Figure 35. The high levels of crime and violence continue to grow	
Figure 36. Mexico is behind most other OECD countries on the ease of doing business	
Figure 37. There is a large potential for policy reforms to raise living standards	
Figure 38. Green growth indicators for Mexico	
Figure 39. Small particle emissions in Mexico City are still high	. 67
Figure 1.1. Growth has not been strong enough to allow for convergence to higher living standards	
Figure 1.2. Inequality is high and the labour market could be more inclusive	
Figure 1.3. Security is low, hurting women in particular	
Figure 1.4. Regional GDP per capita and productivity differences are large	
Figure 1.5. Informality is high by international standards	
Figure 1.6. Informality remains stubbornly high	. 95
Figure 1.7. Informal but legal firms account for a large share of resources but have the lowest	0.7
productivity levels	
Figure 1.8. Low productivity informal but legal firms have the fastest resource growth	
Figure 1.9. The ease of doing business varies greatly across Mexican states	
Figure 1.10. Tax compliance costs are high	100
Figure 1.11. High dismissal costs discourage formal job creation	101

Figure 1.12. Employers' social security contributions are high for low-income earners	. 103
Figure 1.13. Mexico needs to continue to raise educational attainment	. 105
Figure 1.14. PISA scores are low	
Figure 1.15. Public expenditure on education is low	. 108
Figure 1.16. Early childhood education and care has been expanding but enrolment rates are still	
low	. 109
Figure 1.17. Youth not in education, employment or training are predominantly women	. 112
Figure 1.18. Agglomeration benefits are limited in Mexico	. 115
Figure 1.19. Productivity has grown little in the metropolitan area of Mexico City (Valle de	
México)	. 116
