<b>Basic Statistics of Latvia, 2018 .....</b>	<b>8</b>
<b>Executive summary .....</b>	<b>9</b>
<b>Key policy insights.....</b>	<b>15</b>
Growth is strong, but inequality remains high, and ageing is a challenge .....	15
Macroeconomic policies are sound.....	20
The short-term economic outlook is strong.....	20
Credit growth is low and financial market is stable .....	25
Tax and spending reform for a stronger and more inclusive economy .....	29
The budgetary framework is sound .....	29
Making taxing and spending more inclusive.....	30
Improving fiscal equalisation and the quality of local public services .....	35
Addressing skill shortages .....	37
Providing high-quality education to all .....	37
Providing adequate skills .....	37
Making Latvia more attractive for foreign and domestic workers alike .....	38
Fighting informality to improve productivity and access to social services .....	39
Improving access to social services .....	42
Improving pension adequacy .....	42
Improving healthcare services.....	43
Improving environmental outcomes and regional cohesion .....	45
Regional disparities are high and environmental outcomes should improve .....	45
Improving access to affordable housing, its quality and energy efficiency .....	47
Better integrated urban and transport policies are needed.....	49
Building better transport and energy infrastructure .....	52
References.....	54
<b>Annex. Progress in structural reform.....</b>	<b>59</b>
<b>Thematic chapter .....</b>	<b>63</b>
<b>1. Policies for stronger productivity growth .....</b>	<b>65</b>
Productivity growth is held back by low innovation and inefficient resource allocation .....	66
Fighting informality .....	73
Engaging social partners to fight informality .....	74
Adequate tax reforms can reduce informality .....	75
Improving the allocation of capital .....	76
Access to finance remains tight for small young firms .....	76
Building a transparent and efficient insolvency regime .....	79
Diversifying credit supply .....	81
Enhancing competition .....	82
Competition can be strengthened in some sectors.....	82
Ensuring fair competition between state-owned and private enterprises .....	84
Bolstering competition law enforcement .....	85
Strengthening skills.....	87
Engaging more firms in vocational education and training.....	89
Making tertiary education more responsive to labour market needs.....	91

Improving the skills of the adult population .....	92
Active labour market policies should receive more stable funding .....	94
Strengthening innovation and knowledge transfer.....	95
Latvia's innovation performance is weak .....	95
Enhancing knowledge transfer .....	98
Using EU funds more effectively to promote productivity.....	100
Ensuring the continuity of the most effective EU-funded policy measures .....	100
Establishing an effective productivity board .....	102
References.....	106

## Tables

Table 1. Illustrative GDP-per-capita impact of recommended reforms .....	20
Table 2. Macroeconomic indicators and projections.....	22
Table 3. Potential vulnerabilities of the Latvian economy .....	25
Table 4. Past OECD recommendations on taxation and spending .....	33
Table 5. Illustrative fiscal impact of recommended reforms.....	34
Table 6. The strength of equalisation in OECD countries.....	36
Table 7. Past OECD recommendations on education and labour market policies .....	39
Table 8. Past OECD recommendations on informality .....	42
Table 9. Past OECD recommendations on healthcare and pension services.....	44
Table 10. Past OECD recommendations on transport.....	53
Table 1.1. Resources allocated to the competition authority are low .....	86

## Figures

Figure 1. GDP growth is strong and income convergence continues.....	15
Figure 2. The working age population is shrinking fast .....	16
Figure 3. Emigrants are relatively less skilled.....	16
Figure 4. Poverty is high .....	18
Figure 5. Latvia lags behind in some dimensions of well-being .....	19
Figure 6. Investment and consumption contribute to GDP growth .....	21
Figure 7. Unemployment is falling and vacancies are rising.....	21
Figure 8. Wage growth is strong, but inflation remains stable .....	23
Figure 9. Unit labour costs are rising, but profitability remains strong.....	23
Figure 10. Latvia has diversified its trading partners .....	24
Figure 11. Exports have become more sophisticated .....	24
Figure 12. Credit growth remains weak .....	26
Figure 13. Corruption indicators .....	26
Figure 14. House prices are rising in line with income growth.....	27
Figure 15. Non-bank loans are rising fast, as many households have problems re-paying debt.....	28
Figure 16. The share of foreign deposits in the Latvian banking sector is falling.....	29
Figure 17. Illustrative public debt paths .....	30
Figure 18. Tax revenues are relatively low as a share of GDP.....	31
Figure 19. The tax-and-benefit system could do more to lower high inequality.....	32
Figure 20. Taxation of labour income will decrease for some households .....	32
Figure 21. Regional disparities are large .....	35
Figure 22. Average size of municipalities is small.....	36
Figure 23. Informality is widespread.....	40

Figure 24. Trust in national institutions is low.....	41
Figure 25. The poverty rate for elderly people is high .....	43
Figure 26. Life expectancy remains low and unequal.....	43
Figure 27. Many Latvians skip doctors' appointments to avoid high out-of-pocket payments .....	44
Figure 28. The renewable energy share is high and CO <sub>2</sub> intensity is relatively low.....	46
Figure 29. Energy intensity and population exposure to pollution need to fall further.....	46
Figure 30. Many families live in substandard housing.....	47
Figure 31. Higher building energy efficiency would bring benefits for well-being.....	47
Figure 32. Commuting by car has increased substantially .....	49
Figure 33. Effective tax rates on CO <sub>2</sub> are relatively low .....	51
Figure 34. The share of landfill in municipal waste treatment remains high .....	51
Figure 35. Road accident fatalities are high .....	52
Figure 1.1. The labour productivity gap is large .....	66
Figure 1.2. The contribution of capital deepening to labour productivity growth has diminished.....	67
Figure 1.3. Firm-level productivity and efficiency of resource allocation are low .....	68
Figure 1.4. Better resource allocation has contributed to productivity growth .....	69
Figure 1.5. Very unprofitable firms are operating especially in some service sectors .....	70
Figure 1.6. Only the most productive manufacturing firms enjoyed high productivity growth.....	71
Figure 1.7. Latvian firms lag behind in the use of digital technologies .....	71
Figure 1.8. Employment is concentrated in small firms .....	72
Figure 1.9. The productivity gap between large and small firms is wide.....	72
Figure 1.10. Only a small share of SMEs innovate .....	73
Figure 1.11. Informality is particularly high in the non-manufacturing sectors.....	74
Figure 1.12. The number of firms using the microenterprise tax regime remains large .....	75
Figure 1.13. Access to finance remains an obstacle to investment .....	77
Figure 1.14. A significant share of firms are reluctant to apply for bank loans .....	77
Figure 1.15. Borrowing costs are relatively high .....	78
Figure 1.16. The debt recovery rate is low .....	78
Figure 1.17. The insolvency regime could be more efficient.....	79
Figure 1.18. Venture capital investments remain low .....	82
Figure 1.19. Regulatory settings are competition friendly overall .....	83
Figure 1.20. Mark-ups are relatively high in Latvia.....	83
Figure 1.21. Mark-ups are higher in sectors with many SOEs.....	84
Figure 1.22. The shortage of digital skills is severe .....	87
Figure 1.23. Skill mismatches are large .....	88
Figure 1.24. Relatively few firms are managed by professional managers.....	93
Figure 1.25. Participation in adult learning is low .....	94
Figure 1.26. Participation in Active Labour Market Policies is low .....	95
Figure 1.27. The quality of academic research can be improved .....	96
Figure 1.28. The research workforce is small .....	97
Figure 1.29. International collaboration in research is limited.....	97
Figure 1.30. There is little collaboration between SMEs and research institutions.....	98
Figure 1.31. Latvia is one of the largest recipients of EU funds .....	101

## Boxes

Box 1. Latvia's emigration challenge.....	16
Box 2. The new government's key policy priorities .....	17
Box 3. Structural reforms can raise growth and living standards.....	20
Box 4. Quantifying the fiscal impact of structural reforms .....	34
Box 1.1. The role of resource allocation in Latvia's productivity growth .....	68
Box 1.2. Involvement of social partners in vocational education and training .....	89
Box 1.3. Trends in knowledge transfer policies across OECD countries.....	99
Box 1.4. The effect of EU funds on the performance of Latvian firms.....	102
