FIGURES

Figure 1.1. Global activity has slowed sharply	14
Figure 1.2. Uncertainty has become the major concern for firms around the world	15
Figure 1.3. Global trade growth is very weak	16
Figure 1.4. The adverse effects from higher US-China tariffs are expected to intensify	17
Figure 1.5. Recent changes in financial conditions	18
Figure 1.6. More government bonds have been trading at negative yields in Europe and Japan	19
Figure 1.7. Global growth is set to remain low	21
Figure 1.8. Global trade growth is set to remain very weak	22
Figure 1.9. Corporate hurdle rates remain high and are adjusted rarely	23
Figure 1.10. Household saving has risen in many countries despite strong wealth gains	23
Figure 1.11. Survey measures point to a further labour market slowdown	24
Figure 1.12. Household labour income growth is set to slow	25
Figure 1.13. Evolution of the Beveridge curve in selected OECD countries	26
Figure 1.14. Expected market-based inflation compensation has declined	28
Figure 1.15. Inflation is set to remain mild	28
Figure 1.16. Trade restrictions are rising and global FDI has declined	29
Figure 1.17. The sales of US-owned affiliates in China are larger than US exports to China	30
Figure 1.18. The potential impact of Brexit without a trade deal	32
Figure 1.19. Import demand is weak in China and infrastructure investment growth remains modest	34
Figure 1.20. Evolution of the US yield curve and term premia	35

Figure 1.21. Market expectations of policy interest rates	37
Figure 1.22. Developments in the US repo market	38
Figure 1.23. Composition of insurance companies' assets in selected European countries	43
Figure 1.24. Fiscal policy is expected to be eased in many OECD economies	44
Figure 1.25. Selected indicators of possible changes in the fiscal stance	45
Figure 1.26. Key structural reform priorities	49
Figure 2.1. Support to agriculture, 2016-18	57
Figure 2.2. Government support for 17 of the largest firms in the aluminium value chain	58
Figure 2.3. In many countries core inflation remains low despite closed unemployment gaps	60
Figure 2.4. Simulation of the Great Recession unemployment shock on euro area inflation	61
Figure 2.5. Simulated effect on euro area core inflation of the Great Recession and hypothetical recovery based on a non-linear Phillips curve	63
Figure 2.6. The impact of alternative policy approaches in the euro area	66
Figure 2.7. The impact of G20 policy co-ordination	70
Figure 2.8. There are sizeable spillovers from co-operative actions	71
Figure 2.9. Automatic stabilisation of shocks to household market income is generally strong	73
Figure 2.10. The size and effectiveness of specific components of automatic stabilisers	74
