|   |     |
|---|-----|
| Executive summary   | 8   |
| 1 Key Policy Insights   | 13  |
| Domestic demand growth strengthened in recent years, but external conditions are weakening  | 14  |
| The fiscal measures in the government programme 2017-2022   | 17  |
| The financial system remains bank-focussed and banks' balance sheets have improved  | 20  |
| Employment performance, well-being and social cohesion are strong but come under pressures  | 25  |
| Achieving and sustaining stronger and broader-based growth  | 50  |
| Public sector reforms are now more crucial  | 66  |
| References  | 75  |
| 2 Firming up the capital base of the Austrian business sector – Consolidating Austria's business sector strengths and its social role in the face of new challenges | 84  |
| Challenges and opportunities for Austria's business sector in a changing world  | 85  |
| Firming up the capital structure of the Austrian business sector  | 94  |
| Addressing skill shortages to unleash the full potential of Austrian SMEs   | 115 |
| Business transfers can accelerate SMEs' growth  | 118 |
| References  | 125 |
| Annex 2.A. Is there a listing gap in Austria?   | 131 |
| <b>FIGURES</b>  |     |
| Figure 1.1. The strong recovery has peaked  | 15  |
| Figure 1.2. Structural fiscal position has improved   | 18  |
| Figure 1.3. Austrian banks' balance sheets can be strengthened further but monetary transmission works well   | 20  |
| Figure 1.4. Financial intermediation remains centred on bank credits  | 22  |
| Figure 1.5. Housing market risks have been contained so far but may be increasing   | 24  |
| Figure 1.6. Well-being is high and regionally balanced  | 26  |
| Figure 1.7. Income inequalities are relatively low  | 27  |
| Figure 1.8. The distribution of private wealth is more unequal than the income distribution   | 28  |
| Figure 1.9. Structural changes in employment went smoothly so far, but more is to come  | 29  |
| Figure 1.10. Skills could be improved to ease recruitment challenges  | 31  |
| Figure 1.11. Increased mismatch in labour supply  | 32  |
| Figure 1.12. Participation in life-long learning can be raised further  | 34  |
| Figure 1.13. Regional imbalances in labour market   | 36  |
| Figure 1.14. Gender gaps remain large   | 38  |
| Figure 1.15. High-educated migrants are more likely to be unemployed or overqualified for their jobs  | 41  |
| Figure 1.16. Migrants' integration can be improved  | 43  |
| Figure 1.17. Environmental indicators   | 47  |
| Figure 1.18. Effective carbon rates in Austria and selected countries by sector and component   | 48  |
| Figure 1.19. Urban sprawl and municipal fragmentation   | 49  |
| Figure 1.20. Migrants are sustaining higher employment  | 50  |
| Figure 1.21. Labour force participation is still low  | 51  |
| Figure 1.22. Marginal and average tax wedges hinder labour force participation  | 52  |
| Figure 1.23. There are risks on long-term public finance  | 54  |
| Figure 1.24. Productivity growth has slowed down  | 55  |
| Figure 1.25. Digitalisation gaps  | 57  |
| Figure 1.26. Structural reforms can support productivity through digital adoption   | 58  |
| Figure 1.27. Traditionally strong export performance has weakened somewhat  | 60  |
| Figure 1.28. Performance differences between manufacturing and services are weighting on aggregate productivity   | 61  |
| Figure 1.29. Product Market Regulations remain generally restrictive  | 62  |

|   |     |
|---|-----|
| Figure 1.30. Service markets can be opened to freer international trade and competition   | 63  |
| Figure 1.31. Inflationary pressures in services   | 64  |
| Figure 1.32. Potential impact of structural reforms on per capita GDP   | 65  |
| Figure 1.33. The public sector is very large and its performance can be improved  | 67  |
| Figure 1.34. The structure of general government revenue and spending remained broadly stable over two decades                          | 68  |
| Figure 1.35. Corruption risks   | 71  |
| Figure 2.1. Medium-sized manufacturing firms play an important role in Austria  | 87  |
| Figure 2.2. Lower contribution to value added but similar share of exports confirm high export orientation of Austrian SMEs             | 88  |
| Figure 2.3. Austrian SMEs are more likely to engage in exporting  | 88  |
| Figure 2.4. Austrian SMEs contribute more to medium-high to high-tech sectors and knowledge-intensive market services                   | 89  |
| Figure 2.5. Austrian SMEs in manufacturing sectors close to productivity top performers but lag behind in service sectors               | 89  |
| Figure 2.6. Weak productivity growth in service sectors drags on aggregate productivity growth  | 90  |
| Figure 2.7. Overall productivity performance masks differences between sectors  | 91  |
| Figure 2.8. SMEs perform comparatively well on productivity, but larger firms lag further behind the global frontier                    | 92  |
| Figure 2.9. Demographic change reduces the size of Austria's talent pool  | 93  |
| Figure 2.10. Business investment is above pre-crisis levels with shift towards intangibles  | 95  |
| Figure 2.11. High debt-to-equity ratios but moderate total leverage point to lack of equity capital                                     | 96  |
| Figure 2.12. High capital intensity and prevalence of family-owned enterprises lead to high debt-to-equity ratios in tourism industries | 97  |
| Figure 2.13. Debt-to-equity ratios of Austrian SMEs are higher than in peer countries   | 98  |
| Figure 2.14. Bank loans are the most important form of external credit for small- and medium-sized firms                                | 99  |
| Figure 2.15. Austria has the lowest stock market capitalisation in the OECD and the market lacks liquidity                              | 103 |
| Figure 2.16. Number of listings per GDP (1 million USD)   | 104 |
| Figure 2.17. Protection of minority shareholder interests across countries  | 105 |
| Figure 2.18. Estimates of Austria's listing gap   | 107 |
| Figure 2.19. Young firms are successful in surviving the first years but do not grow large  | 110 |
| Figure 2.20. Venture capital markets lag behind   | 111 |
| Figure 2.21. Growth capital markets are not well developed  | 112 |
| Figure 2.22. Revenue and rates for corporate income tax   | 113 |
| Figure 2.23. Effective marginal corporate income tax rates are high particularly for intangible investment                              | 114 |
| Figure 2.24. Employment in Austria lost middle-skilled jobs but gained high-skilled jobs  | 116 |
| Figure 2.25. Austria attracts many international students but few stay after graduation   | 118 |
| Figure 2.26. Austrians perceive themselves as capable for entrepreneurial activity...   | 121 |
| Figure 2.27. ...and have less fear of failing than elsewhere  | 121 |

## TABLES

|  |     |
|--|-----|
| Table 1.1. Macroeconomic indicators and projections                                      | 19  |
| Table 1.2. Low probability events that could lead to major changes in the outlook        | 19  |
| Table 1.3. Past financial policy recommendations   | 24  |
| Table 1.4. Past education policy recommendations   | 35  |
| Table 1.5. Past recommendations to promote gender equality                               | 39  |
