Executive summary	10
1 Key policy insights	15
The COVID-19 crisis is having a major social and economic impact	17
The United Kingdom was significantly affected by the COVID-19 pandemic	17
The COVID-19 crisis has hit some sectors disproportionately	18
The COVID-19 shock led to market tensions but banks have proved resilient so far	20
Activity is set to reach pre-crisis levels only gradually	22
Managing the risks of a disorderly Brexit	25
Moving from crisis management to recovery	26
Monetary policy has eased	28
Fiscal policy should support the recovery	29
The anti-corruption drive is strong	55
Seeking a close trade relationship with the European Union	57
The United Kingdom has been deeply integrated with the European Union	57
Maintaining a close trade relationship would help limit the costs of exiting the EU Single Market	58
The impacts of the new trade arrangements will vary across sectors and regions	60
Ensuring market access in services is key to a good outcome	61
Making sure the immigration system remains flexible	63
Keeping the global financial role of the City	64
Bibliography	68
2 Boosting productivity in the service sectors	74
A rebound in productivity in the service sectors is key to supporting a sustainable recovery	75
Productivity performance has been poor since the financial crisis	76
Productivity has been lacklustre in the service sectors	79
Productivity in the service sector needs to accelerate markedly	86
Low investment and innovation rates and a lack of knowledge diffusion across firms are the main factors behind the poor productivity performance	87
A large part of the post-crisis productivity shortfall reflects low investment and slower innovation	87
A large tail of less productive firms accounts for much of the productivity shortfall in services	88
How to encourage firms to adopt new technologies	90
Some firms are not engaging in the most advanced technologies	91
Facilitating access to digital infrastructure	94
Improving Research and Development support	95
Easing access to finance of new and young firms	97

Maintaining low barriers to trade and competition	101
Ensuring basic skills in a modern workplace after the COVID-19 crisis	107
Retraining low-skilled workers is a double dividend policy following COVID-19	107
Upgrading management skills will improve the capability of firms to benefit from digitalisation	112
Improving efficiency in the public sector	114
Productivity growth in the public sector has improved since the beginning of the decade	114
Further developing digital Government	115
Bibliography	119

Tables

Table 1. Activity will stay below pre-crisis levels	11
Table 1.1. Past recommendations on macroprudential policies and financial markets regulations	21
Table 1.2. Short-term economic projections	23
Table 1.3. Main measures of the emergency package and fiscal costs	27
Table 1.4. Main measures of the Plan for Jobs and additional measures	28
Table 1.5. Main elements of the UK Industrial Strategy	32
Table 1.6. Past recommendations on infrastructure and innovation	33
Table 1.7. Impact of selected reforms on growth and inequality	34
Table 1.8. Past recommendations on regional development	35
Table 1.9. Past recommendations on labour markets and skills	47
Table 1.10. Past recommendations on green growth	51
Table 1.11. Past recommendations on fiscal policy and tax	54
Table 1.12. Long-term fiscal costs of selected recommendations	55
Table 2.1. Productivity gaps between UK exporting and non-exporting firms	101
Table 2.2. Long-run determinants of productivity growth	102
Table 2.3. Moving from EU to non-EU in restrictions to service trade would reduce long-term productivity in the service sectors	103

Figures

Figure 1. Most UK households report lower income since the crisis started	11
Figure 2. Services play a key role in UK exports	12
Figure 3. Productivity growth has been weak	12
Figure 1.1. Output has fallen dramatically with the COVID-19 crisis	16
Figure 1.2. Containment measures slowed the spread of cases	17
Figure 1.3. Output fell dramatically, especially in some services sectors	18
Figure 1.4. Claims for universal credit surged in March	19
Figure 1.5. Most UK households experienced an income reduction in the aftermath of the coronavirus outbreak	20
Figure 1.6. Stress in financial markets has eased	21
Figure 1.7. Capital buffers and macroprudential caution have increased resilience	22
Figure 1.8. The fiscal position would deteriorate markedly further in the event of a no-deal exit	24
Figure 1.9. A no deal would predominantly affect manufacturing industries	25
Figure 1.10. Monetary policy has eased	29
Figure 1.11. The emergency package and the fall in GDP will raise the public debt-to-GDP ratio	30
Figure 1.12. Investment has been lower than in many other leading economies	31
Figure 1.13. Risk of automation is higher in lower-earning regions	35
Figure 1.14. Lower-earning regions have been hit harder	36
Figure 1.15. The demographics and labour market situation are different across regions	37
Figure 1.16. A large majority of firms applied for the Coronavirus Job Retention Schemes	39
Figure 1.17. Participation in lifelong learning has been decreasing	43
Figure 1.18. Minimum wages in the United Kingdom are among the highest in the OECD relative to productivity	44
Figure 1.19. Poverty rates are highest among households out of work and single parents	45
Figure 1.20. Job creation was strong prior to the COVID-19 shock but inclusiveness is more challenging	46
Figure 1.21. Women participate less in the labour force than men and are more likely to work part time	47

Figure 1.22. Average hours in early childhood education and care are short	48
Figure 1.23. Some self-employed enjoy important tax incentives compared with employees	49
Figure 1.24. CO ₂ intensity is lower in the United Kingdom than in the OECD average	50
Figure 1.25. Public health spending has risen	52
Figure 1.26. Tax revenues are lower than in peer countries	53
Figure 1.27. Corruption is perceived to be low in the United Kingdom	56
Figure 1.28. Tax transparency is largely compliant and anti-money laundering measures are effective	56
Figure 1.29. Services play a key role in UK exports	57
Figure 1.30. Higher non-tariff barriers and barriers to service trade under a free trade agreement will lead to lower incomes than under EU membership	59
Figure 1.31. Export and import losses vary across sectors	60
Figure 1.32. UK regions have different export and employment exposure	60
Figure 1.33. Work-related immigration from the European Union has fallen sharply	64
Figure 2.1. Transport and tourism were hit severely by the COVID-19 crisis	76
Figure 2.2. Productivity growth was weaker after the financial crisis than in earlier recoveries	77
Figure 2.3. Productivity has fallen short in OECD countries since the financial crisis	78
Figure 2.4. The productivity gap with the United States is large	78
Figure 2.5. The service sector accounts for 80% of the UK economy	79
Figure 2.6. Service sectors represent a large share of exports and investment	80
Figure 2.7. Digital services constitute a large share of service exports	80
Figure 2.8. Productivity levels are higher in manufacturing than in services	81
Figure 2.9. Service sectors account for a large share of the productivity shortfall	82
Figure 2.10. The service sector is heterogeneous	83
Figure 2.11. Productivity has been weak in both financial and non-financial sectors	84
Figure 2.12. Illustrative scenarios on productivity developments in the United Kingdom	86
Figure 2.13. Investment rates in the service sectors are low	87
Figure 2.14. Firm dynamism is relatively high	89
Figure 2.15. The United Kingdom displays a long tail of low-productivity firms	90
Figure 2.16. The productivity gap between leader and laggard firms is higher in the United Kingdom	90
Figure 2.17. Adoption of new technology lags the best performers	91
Figure 2.18. A range of policies can support productivity through digital adoption in the United Kingdom	93
Figure 2.19. The share of firms with high-speed broadband is lower than in peer countries	94
Figure 2.20. Most major investment projects are in transport, energy and utilities	95
Figure 2.21. Spending on research and development is lower than the OECD average	96
Figure 2.22. Small firms only receive a limited share of support	97
Figure 2.23. Reliance on venture capital is relatively low	98
Figure 2.24. The pensions market is large	99
Figure 2.25. Equity capital is a small portion of SME finance in the United Kingdom	100
Figure 2.26. Restrictions on trade in service sectors will rise when the United Kingdom leaves the EU Single Market	103
Figure 2.27. Restrictions to trade in digital services are currently low in the United Kingdom	104
Figure 2.28. Basic skills are lacking amongst applicants to new position	108
Figure 2.29. The share of jobs at risk is lower in the United Kingdom than in most countries but sizeable	108
Figure 2.30. Participation in lifelong learning has declined	110
Figure 2.31. Low-skilled workers receive less firm-based training	110
Figure 2.32. Own-account workers participate less in training	111
Figure 2.33. Management skills can be upgraded further	113
Figure 2.34. Managerial quality tends to be lower in family-owned firms	114
Figure 2.35. Health services contributed the most to productivity growth in the public sector in recent years	115
Figure 2.36. The uptake of digital government services is average	116

Boxes

Box 1.1. Containment and economic response to the outbreak of coronavirus	26
Box 1.2. The Industrial Strategy	32
Box 1.3. GDP and inequality impact of selected recommendations to support the recovery	34
Box 1.4. The COVID-19 crisis could hit lower-earning regions hardest	36
Box 1.5. Selected policies to support the recovery in OECD countries	40
Box 1.6. Recent trends in on-the-job training	44

Box 1.7. Prudent debt in New Zealand	51
Box 1.8. 21 st Century Trade Agreements	62
Box 2.1. The United Kingdom is a service-based economy	79
Box 2.2. Measuring productivity in the service sectors	85
Box 2.3. Does engaging in new technologies boost productivity?	92
Box 2.4. Explaining productivity developments: insights from sectoral and firm-level data	102
Box 2.5. Main recommendations of the Digital Competition Expert Panel	106
Box 2.6. Adult learning for displaced individuals and those with low-skills	112
