FIGURES	
Figure 1.1. Output rebounded in the third quarter of 2020 after the sharp contraction in the first half of the year	r 14
Figure 1.2. Growth outcomes in the second quarter of 2020 are associated with differences in national	
containment measures and mobility	16
Figure 1.3. The pace of the recovery has slowed	18
Figure 1.4. The impact of the pandemic on activity remains severe in some service sectors	20
Figure 1.5. There are signs of financial fragilities in some service sectors Figure 1.6. Uncertainty about the pandemic is expected to persist for some time	21 22
Figure 1.7. Global trade is slowly recovering, but international travel remains at very low levels	22
Figure 1.8. Selected indicators about bank deposits	24
Figure 1.9. The resurgence of the virus is hitting activity in affected countries	25
Figure 1.10. Labour market conditions are recovering slowly	26
Figure 1.11. Lower-skilled and low-wage workers have been particularly affected	27
Figure 1.12. Financial market conditions have partly normalised	28
Figure 1.13. Growth is projected to remain moderate with long-lasting costs Figure 1.14. Labour market conditions are expected to remain subdued	30 32
Figure 1.14. Labour market conditions are expected to remain subdued	33
Figure 1.16. There is considerable uncertainty around the baseline projection	36
Figure 1.17. Non-COVID-19-related import-restrictive measures continue to rise	39
Figure 1.18. The global monetary policy stance was eased substantially in the first half of 2020	41
Figure 1.19. Changes in the discretionary fiscal stance vary across countries	44
Figure 1.20. Fiscal policy is providing considerable support to growth	45
Figure 1.21. Government budget deficits and debt will widen	46
Figure 1.22. Vulnerabilities in emerging-market economies	47
Figure 1.23. Many of the sectors heavily affected by the pandemic are employment-intensive	50

Figure 1.26. Changes in the composition of energy investment are need to meet environmental objectives Figure 2.1. Quarterly model: out-of-sample simulations Figure 2.2. The OECD Weekly Tracker: United States Figure 2.3. The OECD Weekly Tracker: selected advanced G20 economies in 2020 6 Figure 2.4. The OECD Weekly Tracker: emerging G20 economies in 2020 6 Figure 2.5. Most recent predictions of the OECD Weekly Tracker 6 Figure 2.6. Google search intensities per spending categories 7 Figure 2.7. A substantial portion of otherwise viable firms is predicted to become distressed 7 Figure 2.8. The impact of the shock is heterogeneous across types of sectors and firms 7 Figure 2.9. Firms' leverage is expected to increase in the aftermath of the crisis 7 Figure 2.10. A large portion of otherwise viable firms will find it hard to service their debt 7 Figure 2.11. High financial leverage decreases investment 8 Figure 2.12. Household inflation expectations tend to exceed realised inflation and targets Figure 2.13. Persistent deflation has taken place for some categories of goods and services 9 Figure 2.14. Link between mobility and GDP forecast revisions at a quarterly frequency for the first and second quarters of 2020 9 Figure 2.15. Percentage of countries at different stringency levels for containment policies 10 Figure 2.16. The estimated effect of containment policies and natural caution on mobility 10 Figure 2.18. Effect of containment policies and public health policies on (logged) R 10 Figure 2.19. Percentage of countries at different stringency levels for testing and contact tracing 10 Figure 2.20.
