Executive summary	9
<b>1 Key policy insights</b>	<b>14</b>
The strength of the recovery will hinge on economic reforms	18
COVID-19 has plunged the economy back into a long and deep recession	21
Inflation is below target and interest rates have reached a long-time low	28
The fiscal outlook has become much more challenging after COVID-19	30
Further social progress is possible at reasonable fiscal cost	40
Fighting corruption and economic crimes	46
Making economic growth greener and more sustainable	49
References	54
<b>2 Raising productivity through structural reforms</b>	<b>60</b>
Possible sources of low productivity growth	62
How can policies help to strengthen productivity growth?	65
Enhancing domestic competition through reforms on product markets	66
Enhancing foreign competition by fostering the trade integration	71
The structure of financial intermediation is improving	76
Simplifying taxes and reducing compliance costs	78
Addressing infrastructure bottlenecks	80
Improving judicial efficiency	81
References	93
<b>3 Improving skills to harness the benefits of a more open economy</b>	<b>101</b>
Policies can help to make trade work for all	102
Gauging the effects of stronger integration into the global economy	104
Improving professional training policies	116
Improving education policies	121
References	130
<b>Tables</b>	
Table 1. The economy is in a deep recession	10
Table 1.1. Expected gains from structural reform are substantial	20
Table 1.2. Macroeconomic indicators and projections	23
Table 1.3. Events that could lead to major changes in the outlook	28
Table 1.4. Fiscal impact of recommendations	34
Table 1.5. Past OECD recommendations on macroeconomic policies	40
Table 1.6. Past OECD recommendations on social and labour market policies and education	48

Table 1.7. Past OECD recommendations on fighting corruption	49
Table 1.8. Past OECD recommendations on green growth	50
Table 1.9. Policy recommendations from this chapter (key recommendations in bold)	52
Table 3.1. Trade liberalisation will require some workers to move to jobs in other sectors	112

## Figures

Figure 1. Ageing will slow Brazil's growth potential	10
Figure 2. Gross public debt has shot up	11
Figure 3. Social transfers are not well targeted	11
Figure 4. Poverty and inequality have edged up	11
Figure 5. Product market regulation hampers competition	12
Figure 6. Average tariff rates are high	12
Figure 1.1. After a weak recovery, the economy has plunged into another recession	15
Figure 1.2. Demographics will no longer support economic growth	15
Figure 1.3. Well-being indicators	16
Figure 1.4. Women are facing sizeable wage gaps	17
Figure 1.5. Prosperity gaps across regions are large	17
Figure 1.6. An ambitious structural reform package can lift growth	19
Figure 1.7. COVID-19 has triggered a very deep recession	22
Figure 1.8. Brazil's main export markets and products	23
Figure 1.9. Intergenerational mobility is low	24
Figure 1.10. External debt is stable and currency reserves are substantial	25
Figure 1.11. Foreign direct investment inflows exceed the current account deficit	25
Figure 1.12. Financial stability indicators have deteriorated at the margin during the pandemic	26
Figure 1.13. Household and corporate debt levels remain moderate	27
Figure 1.14. Inflation has come down	28
Figure 1.15. Monetary authorities have responded by cutting rates	29
Figure 1.16. Monetary policy decisions have closely followed inflation dynamics	29
Figure 1.17. Gross public debt is set to stabilise, but subject to risks	31
Figure 1.18. Public sector tax revenues and expenditures	32
Figure 1.19. The fiscal outlook has become more challenging	33
Figure 1.20. Distribution of monetary transfers by quintiles of the income distribution	35
Figure 1.21. Benefits tied to the minimum wage reach only those above median income	36
Figure 1.22. Poverty rates are relatively high for young people	37
Figure 1.23. Public payroll expenses are high in international comparison	38
Figure 1.24. Subsidies and tax expenditures have risen	39
Figure 1.25. Income inequality and poverty have started to rise again after a long decline	41
Figure 1.26. Labour informality is high and the labour tax wedge is almost at the OECD average	41
Figure 1.27. Job turnover rates are high across most sectors	42
Figure 1.28. Spending on education is relatively high, but outcomes are poor	45
Figure 1.29. Corruption indicators in international comparison	47
Figure 1.30. Budget amendments for parliamentarians have peaked around key voting dates	48
Figure 1.31. Total greenhouse gas emissions have been stable	49
Figure 1.32. Deforestation in the Amazon has picked up after a long decline	51
Figure 2.1. Total factor productivity is contributing less and less to potential growth	61
Figure 2.2. Minimum wages are high	62
Figure 2.3. Job creation has been strong in services, but also in manufacturing sectors	63
Figure 2.4. New market entrants are relatively small	64
Figure 2.5. Net job creation is concentrated among firms aged less than 6 years	65
Figure 2.6. Regulatory barriers to competition and entrepreneurship are high	67
Figure 2.7. Product markets have high barriers to domestic and foreign entry	68
Figure 2.8. Distortions induced by state involvement are high	70
Figure 2.9. The economy has little exposure to foreign trade	72
Figure 2.10. Tariff barriers are high, including for capital goods	72
Figure 2.11. Many sectors are enjoying high levels of protection	73
Figure 2.12. The potential consumer benefits from lower trade barriers are highly progressive	74
Figure 2.13. Financial markets are changing	76
Figure 2.14. Lending spreads remain high	77

Figure 2.15. Tax compliance is extremely cumbersome	78
Figure 2.16. Infrastructure quality is low	81
Figure 2.17. The time to enforce contracts is high	82
Figure 2.18. Insolvencies are slow and recovery rates low	83
Figure 2.19. Higher judicial efficiency would boost employment growth particularly for young firms	83
Figure 2.20. Spending for courts is high, but case resolution low	84
Figure 2.21. Judicial performance indicators show incipient improvements	85
Figure 2.22. Investment in ICT infrastructure in the judiciary is low	85
Figure 2.23. The regional disparity of judicial efficiency is high	86
Figure 2.24. The demand for litigation is high	88
Figure 2.25. Labour law is responsible for a high share of incoming cases	89
Figure 2.26. The number of lawyers is high	90
Figure 2.27. The law profession is highly regulated	91
Figure 3.1. Lowering trade barriers boosts productivity, exports and private consumption	102
Figure 3.2. The tariff reductions of the 1990s	104
Figure 3.3. The number and share of medium and high skilled jobs has strongly increased	105
Figure 3.4. Manufacturing employment has recovered since the 2000s	106
Figure 3.5. The exposure to trade liberalisation has been heterogeneous across local labour	107
Figure 3.6. Employment growth has been weaker in regions more exposed to trade liberalisation	109
Figure 3.7. Trade liberalisation has affected low-skilled workers more severely	109
Figure 3.8. Firm dynamics have increased in regions more exposed to trade liberalisation	110
Figure 3.9. Labour productivity and real wages have risen in trade-exposed regions	111
Figure 3.10. Protected sectors employ many low-skilled and informal workers	114
Figure 3.11. Training targeted to local skill demands mitigates adjustment costs for workers	115
Figure 3.12. Active labour market policies are not focused on training policies	117
Figure 3.13. PRONATEC courses were poorly aligned with labour market needs	118
Figure 3.14. Firms have difficulties to find the workers they need	121
Figure 3.15. Educational attainment has strongly increased	122
Figure 3.16. Educational quality is weak and has not improved much	123
Figure 3.17. The share of adults without completed basic education is high	125
Figure 3.18. Particularly old workers have low educational attainment	126
Figure 3.19. Opportunities for vocational training in upper secondary education are low	127
Figure 3.20. Spending for tertiary education is relatively high, but dropout rates are high	128

## Boxes

Box 1.1. Policy responses to the COVID-19 pandemic	16
Box 1.2. Recent and ongoing reform initiatives since 2017	18
Box 1.3. Brazil's 2019 pension reform	21
Box 2.1. The OECD Competition Assessment Reviews for Greece	69
Box 2.2. Tax reform in India	80
Box 2.3. Policy recommendations for raising productivity	92
Box 3.1. Identifying the effects of trade opening on employment and firm dynamics	108
Box 3.2. Policy simulations based on the OECD METRO model	113
Box 3.3. Training targeted to local skill demands can mitigate adjustment costs for workers	116
Box 3.4. Targeting vocational training to vulnerable workers	120
Box 3.5. Policy recommendations for improving skills	129
