Executive summary	9
1 Key Policy Insights	17
The COVID-19 crisis has hit the economy	18
The economy requires continued macroeconomic policy support	21
Considerable uncertainty surrounds the recovery	25
Fiscal space permits a large pandemic response	26
Ensuring access to health care is a priority during the pandemic	27
A wage subsidy scheme has prevented a large rise in unemployment	28
Long-term public finances are sound but subject to uncertainties from ageing	31
The currency board is a cornerstone for macroeconomic stability	34
The financial sector has been fortified, but non-performing loans remain high	36
Strengthening the recovery	39
Making the most of the export sector	39
Public investment should be increased	41
Removing barriers to competition	42
Decarbonising the economy	45
Ageing demographics will influence future growth	47
Ensuring equal opportunities for all	49
Improving labour market policies for higher participation and better jobs	51
Making the tax and benefit system work for all	54
Promoting public integrity and succeeding in the fight against corruption	59
References	63
2 Structural reforms to raise productivity and boost convergence	67
Income convergence needs to accelerate	68
Improving the regulatory framework for enterprise activity	72
Reducing regulatory barriers to competition	72
Decreasing the red tape required to set up a firm	75
Facilitating firm exit and rehabilitation for viable enterprises	75
Improving corporate governance of SOEs	79
Continuing regulatory efforts to support competition	79
Creating a level playing field for public contracting	81
Increasing skills and innovation	82
Increasing the availability of skilled workers is a key priority for enterprises	82
Basic education is not providing a firm foundation for skills	84
Vocational education and training could better meet labour market demands	86
Adult learning is low	86
Fostering return migration and skilled immigration	88
Promoting innovation	88

Supporting growth of the digital economy	90
References	94
3 Reducing regional disparities for inclusive growth	97
Cities are driving growth, while lagging regions are depopulating fast	98
Supporting living standards in lagging regions	100
Including the Roma population in the economy	101
Ensuring equal access to public services	103
Enabling reallocation and fostering regional growth	109
Better infrastructure and housing to support mobility	109
Realising the potential of the agricultural sector	115
Reviving tourism for future regional growth	118
References	124

Tables

Table 1. The recovery will be gradual	10
Table 1.1. Macroeconomic indicators and projections	25
Table 1.2. Low probability vulnerabilities	26
Table 1.3. Illustrative GDP impact of recommended reforms	44
Table 1.4. Illustrative fiscal impact of post-recovery recommended reforms	44
Table 1.5. Tax allowances in flat tax countries	56
Table 1.6. Spending on social protection benefits is low	57
Table 1.7. Recommendations on macroeconomic and selected structural policies	62
Table 2.1. Recent labour productivity growth exceeds the OECD, catching up with CEEC peers	69
Table 2.2. Recommendations	93
Table 3.1. Recommendations	123

Figures

Figure 1. GDP growth abruptly interrupted	10
Figure 2. Convergence had increased	11
Figure 3. PISA education scores are low	11
Figure 4. Relative poverty is high	12
Figure 5. Depopulation and urbanisation	12
Figure 1.1. Income convergence had increased from 2014	18
Figure 1.2. The economy was doing well before the COVID-19 pandemic	23
Figure 1.3. After a low initial outbreak, COVID-19 infections began to increase in October 2020	24
Figure 1.4. Sound public finances leave room for fiscal stimulus	27
Figure 1.5. Access to general practitioners is unequal across regions	28
Figure 1.6. Employment situation of the young most negatively affected	29
Figure 1.7. The informal economy amounts to almost one-third of (official) GDP	30
Figure 1.8. Ageing-related spending pressures could push up public debt	31
Figure 1.9. Revenues are low and rely on indirect taxation	33
Figure 1.10. Inflation was stabilising prior to the COVID-19 shock	34
Figure 1.11. Current account surpluses have been driven by a reduction in the trade deficit	35
Figure 1.12. Net international investment has fallen substantially	35
Figure 1.13. Credit growth had picked up	36
Figure 1.14. Financial sector health had improved	37
Figure 1.15. Household indebtedness is low, while non-financial corporation debt had been falling	38
Figure 1.16. Exports by destination and commodity	40
Figure 1.17. Integration in global value chains is high	40
Figure 1.18. Foreign direct investment is close to the CEEC average	41
Figure 1.19. Public investment has fallen below CEEC peers	42
Figure 1.20. Barriers to competition are high	43
Figure 1.21. Energy intensity and reliance on coal remain high	46
Figure 1.22. The working-age population is shrinking and ageing quickly	48
Figure 1.23. Higher educated people work more and longer	48

Figure 1.24. A large proportion of Bulgarian nationals are living abroad	49
Figure 1.25. Income inequality and poverty are high	50
Figure 1.26. Income inequality has risen fast because growth mainly benefitted top incomes	50
Figure 1.27. Poverty has remained at a high level, notably among children and elderly	51
Figure 1.28. Labour market participation is low for youth and Roma	52
Figure 1.29. Use of active labour market policies is low	53
Figure 1.30. No basic tax allowance results in tax rates for low incomes close to the OECD average	55
Figure 1.31. Taxes and transfers do little to reduce high market income inequality	56
Figure 1.32. Minimum-income benefits are low	58
Figure 1.33. Corruption is perceived as high	60
Figure 2.1. Bulgaria's income growth has lagged behind other CEEC countries	68
Figure 2.2. Intangible capital needs to be boosted to increase growth	70
Figure 2.3. The working-age population is shrinking and ageing quickly	70
Figure 2.4. Informality and inadequate skills are the top two constraints for businesses	72
Figure 2.5. Bulgaria stands out for its high barriers to competition	74
Figure 2.6. Insolvency is relatively lengthy and results in a low recovery of assets for creditors	76
Figure 2.7. Activity related to confronting cartels and monopoly/dominant positions has declined	80
Figure 2.8. Too high a share of public procurement occurs without a call for bids	81
Figure 2.9. Shortages are for medium- and higher-skilled employees	82
Figure 2.10. Large shortages exist for complex and non-routine competencies	83
Figure 2.11. PISA education scores lag behind the OECD and CEEC	84
Figure 2.12. A growing share of 15-years olds lack basic proficiency and few perform at a high level	85
Figure 2.13. Participation in lifelong learning is low	87
Figure 2.14. R&D intensity is low and relies on the business sector	89
Figure 2.15. The ICT sector is responsible for a high share of value-added activity	91
Figure 2.16. A priority is to increase digital skills	92
Figure 2.17. Firms have a low share of e-sales	92
Figure 3.1. Unemployment rates vary much across regions, also after the COVID-19 outbreak	98
Figure 3.2. The population is moving to metro regions with higher output and growth	99
Figure 3.3. Regional disparities are larger than in most OECD countries	100
Figure 3.4. The Roma population is large and concentrated in some regions	101
Figure 3.5. Living conditions of Roma lag far behind	102
Figure 3.6. Municipalities collect little revenue and account for a low share of public spending	106
Figure 3.7. Access to general practitioners is unequal across regions	107
Figure 3.8. Demand for hospital services is high but supply of nurses is low	108
Figure 3.9. Motorway construction is improving but upgrading is far from complete	110
Figure 3.10. Roads are in bad condition and internet access is lagging in many regions	111
Figure 3.11. Housing supply is vast but poorly utilised	112
Figure 3.12. Regional differences in housing stock and housing prices have increased	112
Figure 3.13. Most Bulgarians are outright homeowners	113
Figure 3.14. Taxation of household savings differs across asset types and has no progressivity	114
Figure 3.15. Regions with high agricultural employment have the lowest incomes	115
Figure 3.16. The primary sector employs many workers and suffers from weak productivity growth	116
Figure 3.17. The farm structure has become extremely polarised	116
Figure 3.18. The coronavirus outbreak has hit the growing tourism industry hard	118
Figure 3.19. The tourism industry's direct contribution to the economy is moderate	119
Figure 3.20. Tourism was strongly concentrated in a few regions and during summer months	120
Boxes	
Box 1.1. Fiscal policy responses to the COVID-19 pandemic	20
Box 1.2. From the currency board to adopting the euro	22
Box 1.3. The informal economy is sizeable	30
Box 1.4. Composition of government revenues	33
Box 1.5. Quantifying the impact of selected policy recommendations	44
Box 2.1. Bulgaria's Insolvency Reform Roadmap, 2019-2022	78
Box 3.1. Subnational government organisation	104
Box 3.2. The 2019 Social Services Act	105
