Executive Summary	10
1 Key Policy Insights	14
Vaccine rollout is underway	15
The economy is recovering, but the pace has slowed and risks remain elevated	20
Risks and uncertainties are elevated	25
Challenges for monetary policy and financial-sector stability	27
Ultra-accommodative monetary policy can, and should, be maintained until the economy is on an even keel	27
So far the crisis has not triggered household-debt problems, but risks remain	30
The growth of financing via high-risk corporate bonds remains a concern	31
Supporting the recovery while preparing the groundwork for reducing the public debt burden	33
Fiscal support for households, businesses and green investment is needed	33
Getting ready to tackle the debt burden in the medium term	35
Strengthening carbon pricing and re-orienting the tax system	39
Exploiting opportunities for public-spending efficiency gains	40
Eventually raising revenues, if needed	41
Nurturing recovery in the business sector	42
Further help for businesses is needed, including through better insolvency processes	42
Longstanding issues in product-market regulation remain, in particular non-tariff barriers to domestic trade	44
Ensuring low-cost, high-quality telecommunications services	45
Combating corruption and money laundering	47
Giving greater profile to well-being in future policy-making	50
Reforming health care and welfare support	50
Health care: COVID-19 has underscored problems in long-term care homes	50
Addressing wage gaps and improving support for disadvantaged groups	52
Building environmental sustainability	55
Ensuring greenhouse-gas emissions reduction is on track	58
Main findings and recommendations	60
Bibliography	61
2 Improving the well-being of Canadians	63
How do we measure well-being, and what do we know about it?	65
The concept of well-being	65
The known drivers of individual-level subjective well-being	68
The determinants of country and neighbourhood well-being	67
The crucial role of social factors	68
Using well-being in the policymaking process	68
Canada's planned use of well-being in the policymaking process	73

Inequality and poverty as negative well-being markers	74
Canada ranks quite well in terms of equality of opportunity	74
Income inequality is close to the OECD average	75
Other dimensions of inequality: life satisfaction, wealth, gender and childcare	77
The pandemic has probably exacerbated inequality along various lines	80
What difference does a focus on poverty instead of inequality make?	81
The recent implementation of a national Poverty Reduction Strategy	82
Food insecurity as a manifestation of poverty	84
A basic income scheme is much discussed but would be expensive	85
Some less costly ways to confront poverty	86
The challenges relating to housing affordability and homelessness	88
Affordability problems are widespread and concentrated among those on low incomes	88
The federal government has implemented a National Housing Strategy	92
Options for improving housing affordability	92
Homelessness is a chronic problem with heavy well-being costs	93
Policies to deal with homelessness	95
The role of physical and mental health status in determining well-being	96
The relative importance of health outcomes in well-being determination	96
Waiting times have been a longstanding concern	98
The primacy of mental health in determining well-being	98
The role of health behaviours, especially problematic substance use	102
Policy options for improving the health and well-being of Canadians	104
The need to expand public insurance coverage to include pharmaceuticals	105
The lack of paid sick leave for most workers is unfair and risky	106
The quality of long-term care can be improved	106
The role of environmental factors in the quality of life	109
How does Canada rank according to these environmental indicators?	110
Government policies to deal with these major environmental challenges	110
The special case of Canada's Indigenous peoples and racialised populations	111
Indigenous peoples have long had poor well-being outcomes	111
Racialised populations are also severely disadvantaged in well-being terms	115
Main findings and recommendations	117
Bibliography	119

Executive summary	8
1 Key policy insights	13
Indonesia is confronting the most severe challenges since the 1997 crisis	13
Macroeconomic policy action has been stepped up in the face of the pandemic	19
Indonesia could gain more from globalisation	31
The fruits of growth should be shared	38
Regulatory barriers are high and State-owned enterprises ought to lead by example	42
A greener post-COVID-19 Indonesia?	48
Ambitious reforms are needed to sustain improvements in living standards	52
References	56
Annex 1.A. Evolution of budgetary allocations since 2019	61
2 Investing in competences and skills and reforming the labour market to create better jobs	62
Demographic transitions and skills	64
Improving education quality is crucial to boosting human capital	66
Labour market rigidities are holding back the potential of the economy	85
Policy recommendations	103
References	104

FIGURES

Figure 1. A sudden stop to a growth story	9
Figure 2. Poverty is on the rise again	10
Figure 1.1. The pandemic interrupted a long spell of sustained growth	13
Figure 1.2. Income and productivity convergence started decelerating around 2014	14
Figure 1.3. Consumer price inflation is low	17
Figure 1.4. A number of macroeconomic vulnerabilities have resurfaced	19
Figure 1.5. The sovereign risk premium has decreased since March 2020 but remains high	20
Figure 1.6. Debt will rise in the aftermath of COVID-19, but remain sustainable	21
Figure 1.7. The financial sector is profitable and the authorities consider it well capitalised	22
Figure 1.8. Credit growth to the real sector has weakened from very high levels	23
Figure 1.9. Fiscal and current account deficits	25
Figure 1.10. Composition of budgeted public spending	27
Figure 1.11. Tax revenue is low by OECD and G20 standards	28
Figure 1.12. Composition of tax revenue	28
Figure 1.13. Export performance has been rather modest	32
Figure 1.14. Northeast Asia is Indonesia's main trading partner	33
Figure 1.15. Mobility restrictions are hitting tourism hard	34
Figure 1.16. Pervasive statutory restrictions discourage foreign direct investment	38

Figure 1.17. Poverty and income inequality remain high	40
Figure 1.18. Regional disparities are high with pockets of deep poverty in the poorest provinces	41
Figure 1.19. Indonesia has very strict regulations on product markets	43
Figure 1.20. Indonesia's regulatory barriers to competition are very high	43
Figure 1.21. Corruption is still perceived as high	47
Figure 1.22. The transition to a greener economy could be quicker	49
Figure 2.1. The OECD measure of human capital puts Indonesia in the middle of peer countries	63
Figure 2.2. Indonesia is enjoying a demographic dividend	64
Figure 2.3. The dependency ratio is currently low but set to increase significantly	65
Figure 2.4. More than 20% of Indonesian youth are inactive	66
Figure 2.5. There is ample room to improve the quality of schooling	67
Figure 2.6. Indicators of government spending on education	68
Figure 2.7. Public funds are tilted towards primary education	69
Figure 2.8. Spending per student is lower than in peer countries	70
Figure 2.9. Only half of the population has completed secondary education	70
Figure 2.10. Indonesia is close to the average of peer countries in participation in upper secondary education	71
Figure 2.11. Indonesians' performance in reading, mathematics and science is lagging	73
Figure 2.12. Indicators of spending per pupil vary substantially across provinces	75
Figure 2.13. Lower secondary education enrolment varies considerably across provinces	77
Figure 2.14. A quarter of Indonesian primary school pupils have had no early childhood education	79
Figure 2.15. Enrolment in tertiary education is close to the average for middle-income countries	80
Figure 2.16. Few Indonesians study abroad	83
Figure 2.17. A third of upper-secondary Indonesian schools lack access to computers	84
Figure 2.18. Informality is pervasive in Indonesia	87
Figure 2.19. The importance of informality varies across provinces but is high everywhere	89
Figure 2.20. The correlation between the minimum wage and provincial GDP per capita is weak	94
Figure 2.21. Access to internet is increasing rapidly but remains elusive for more than half of Indonesia's population	95
Figure 2.22. Labour regulations are restrictive	99
Figure 2.23. At similar educational attainment, women's employment rate is lower	100
Figure 2.24. Female labour force participation is picking up after decades of stagnation	101
Figure 2.25. Indonesian women have received less education than men	102
