| Editorial No ordinary recovery                                       | 9   |
| 1. General Assessment of the Macroeconomic Situation                 | 11  |
| Introduction   | 12  |
| Recent developments  | 14  |
| The outlook is for a significant but uneven recovery                 | 22  |
| The outlook is subject to upside and downside risks                  | 35  |
| Policy requirements  | 48  |
| Bibliography   | 59  |
| Annex 1.A. Policy and other assumptions underlying the projections   | 63  |
| 2. Developments in individual OECD and selected non-member economies | 65  |
| Argentina  | 66  |
| Australia  | 69  |
| Austria  | 72  |
| Belgium  | 75  |
| Brazil   | 78  |
| Bulgaria   | 82  |
| Canada   | 85  |
| Chile  | 89  |
| China  | 92  |
| Colombia   | 96  |
| Costa Rica   | 99  |
| Czech Republic   | 102 |
| Denmark  | 105 |
| Estonia  | 108 |
| Euro area  | 111 |
| Finland  | 115 |
| France   | 118 |
| Germany  | 122 |
| Greece   | 126 |
| Hungary  | 129 |
| Iceland  | 132 |
| India  | 135 |
| Indonesia  | 139 |
| Ireland  | 143 |
| Israel   | 146 |
| Italy  | 149 |
| Japan  | 153 |

|                 |     |
|-----------------|-----|
| Korea           | 157 |
| Latvia          | 160 |
| Lithuania       | 163 |
| Luxembourg      | 166 |
| Mexico          | 169 |

| Turkey          | 208 |
| United Kingdom  | 211 |
| United States   | 215 |

## FIGURES

|  |    |
|--|----|
| Figure 1.1. The pace of the recovery has moderated in some countries and sectors   | 16 |
| Figure 1.2. The pandemic had a diverse impact on GDP across countries  | 17 |
| Figure 1.3. Differences in government consumption and non-market output account for only a small part of cross-country variation in GDP growth | 19 |
| Figure 1.4. Merchandise trade is above pre-pandemic levels, helped by a recovery in investment   | 20 |
| Figure 1.5. Labour market conditions remain weaker than prior to the pandemic  | 21 |
| Figure 1.6. Online job postings are now above pre-pandemic levels in some countries and sectors  | 21 |
| Figure 1.7. Equity prices and some currencies have strengthened since late-2020 in contrast to some bond prices                                | 22 |
| Figure 1.8. The pace of COVID-19 vaccinations differs substantially across countries   | 23 |
| Figure 1.9. Global economic prospects are improving, but continued divergence is expected across countries                                     | 26 |
| Figure 1.10. Labour market conditions are set to improve gradually   | 27 |
| Figure 1.11. The medium-term output loss from COVID-19 is estimated to vary significantly across countries                                     | 29 |
| Figure 1.12. Cost pressures are rising   | 31 |
| Figure 1.13. Monthly indices of containerised freight costs  | 32 |
| Figure 1.14. The effects of a change in shipping costs on OECD merchandise import price inflation and consumer price inflation                 | 33 |
| Figure 1.15. Inflation is projected to increase but to remain moderate   | 34 |
| Figure 1.16. Trade growth is set to strengthen and global imbalances are projected to increase   | 35 |
| Figure 1.17. Substantial uncertainty remains about the projections   | 37 |
| Figure 1.18. Households increased saving and bank deposits in 2020   | 38 |
| Figure 1.19. Survey evidence points to rising spending intentions  | 38 |
| Figure 1.20. The increase in US bank deposits was mostly driven by high-income, wealthy, older and well-educated households                    | 40 |
| Figure 1.21. Evolution of key performance indicators between FY2019 and FY2020   | 41 |
| Figure 1.22. Changes in revenues and profits between FY2019 and FY2020, by sector  | 42 |
| Figure 1.23. Corporate bankruptcies have declined so far in contrast to the previous crisis  | 42 |
| Figure 1.24. Change in capital expenditures by industry  | 44 |
| Figure 1.25. "Risky" debt and the median interest coverage ratio by industry   | 45 |
| Figure 1.26. Indicators of exposures to external shocks in emerging-market economies   | 47 |
| Figure 1.27. Central banks have purchased large amounts of assets and become key holders of government bonds                                   | 49 |

|  |    |
|--|----|
| Figure 1.28. Some emerging-market economies have already tightened monetary policy                       | 51 |
| Figure 1.29. Fiscal projections  | 52 |
| Figure 1.30. The discretionary fiscal stance is projected to be tightened in 2022 in many OECD countries | 54 |
| Figure 1.31. Use of digital technologies during the pandemic has been uneven                             | 57 |
| Figure 1.32. Most countries under-price their carbon emissions   | 59 |
| Figure 1.33. Uncertainty about regulations and taxes is an obstacle to climate-mitigating investment     | 59 |

## TABLES

|   |    |
