Executive Summary	9
1 Key Policy Insights	14
The pandemic has accentuated some persistent structural challenges	14
Mitigating the social and economic impact of the pandemic remains a priority	18
Spain has been hit hard by the pandemic	18
The economic recovery is fraught with high risks	19
The crisis has increased financial stability risks	23
Policy support should continue, but adapt to the evolution of the pandemic	26
Containing medium-term fiscal challenges and supporting employment for a sustainable recovery	29
Addressing medium-term fiscal vulnerabilities	29
Boosting employment and job quality	40
Making growth more inclusive and greener	48
Lowering inequalities	48
Making further progress in the fight against corruption	53
Making growth greener	56
References	62
Annex A. Progress on structural reforms	70
Annex B. Spanish Recovery, Transformation and Resilience Plan	71
2 Enhancing digital diffusion for higher productivity in Spain	72
Digitalisation offers new opportunities and challenges	73
Spanish firms still have significant scope to adopt and use digital technologies	73
Insufficient intangible capital and low skills impede taking full advantage of digitalisation	79
Policy reforms can boost productivity through digital diffusion	83
Ensuring communication infrastructure for all	84
The Spanish telecommunication sector performs well	86
The digital divide between urban and rural areas should be reduced	87
Digital public services are an integral part of the digital transformation	89
Cybersecurity underpins the digital transformation of the society	90
Enhancing capabilities to make full use of digital technologies	92
Intangible capital and innovation to foster digitalisation	93
Adapting skills of workers to digitalisation and changing nature of work	99
Sharpening incentives to take advantage of digital technologies	107
Market regulation should be revamped further to generate competitive pressures	108
Insolvency regimes could be reformed further to encourage risk taking activities	109
Access to capital is key to diffusion of technologies	111

Figures

Figure 1. The pandemic hit the Spanish economy hard	10
Figure 2. Inequality remains high	10
Figure 3. Job losses were concentrated on young and temporary workers	11
Figure 4. There is room to boost firms' adoption of digital technologies	12
Figure 1.1. The impact of the COVID-19 shock has been severe	14
Figure 1.2. Boosting potential output and lowering unemployment are key challenges	15
Figure 1.3. Income inequality and poverty rates were relatively high before the crisis	16
Figure 1.4. The uneven effects of the crisis on regions can exacerbate regional inequalities	17
Figure 1.5. The COVID-19 pandemic in Spain	18
Figure 1.6. Activity is recovering slowly	20
Figure 1.7. Tourism sector was badly hit	21
Figure 1.8. Macro-financial vulnerabilities have changed since 2007	23
Figure 1.9. Corporate debt and housing markets pose risks	24
Figure 1.10. The share of viable firms predicted to become distressed varies by firm characteristics	25
Figure 1.11. The impact on labour markets varies with sector and worker characteristics	27
Figure 1.12. Policies helped cushion some of the impact on firms	28
Figure 1.13. The average time needed to resolve civil and commercial cases is high	29
Figure 1.14. The impact of the crisis on fiscal sustainability is projected to be large	30
Figure 1.15. There is room to increase revenues from value-added and environmental taxes	33
Figure 1.16. Carbon pricing can be improved	34
Figure 1.17. Public investment has declined in the past decade	35
Figure 1.18. Pension reform is needed	38
Figure 1.19. There is room to improve active labour market policies	41
Figure 1.20. The use of internal adaptability measures by firms can help during crisis times	42
Figure 1.21. Non-standard work is prevalent for some sectors and groups	43
Figure 1.22. Temporary contracts do not translate into permanent jobs	45
Figure 1.23. Minimum wages have recently increased	46
Figure 1.24. There are gaps in childcare provision, despite high participation rates	47
Figure 1.25. The national minimum income guarantee will support the existing regional schemes	48
Figure 1.26. Rent affordability is a concern for some groups	50
Figure 1.27. There are regional differences in terms of health resources	51
Figure 1.28. Teachers can be supported further via mentoring and training	52
Figure 1.29. Efforts to fight corruption must be increased	54
Figure 1.30. Policy frameworks can be strengthened to prevent corruption	55
Figure 1.31. Environmental pressures remain in a number of areas	57
Figure 1.32. Investment in building renovation can be frontloaded	58
Figure 1.33. Sustainable transport can contribute to better air quality	59
Figure 2.1. The adoption of digital technologies has scope to increase	75
Figure 2.2. E-commerce sales are likely to accelerate further	76
Figure 2.3. Teleworking has scope to develop further	76
Figure 2.4. The adoption of digital technologies has not helped to change business models	78
Figure 2.5. Invention has been very limited	78
Figure 2.6. Spanish firms, especially small ones, have low productivity	79

Figure 2.7. Productivity effects of digital technologies vary by firm characteristics and skill shortages	80
Figure 2.8. Investment in intangible assets is low	82
Figure 2.9. There is room to develop digital skills	82
Figure 2.10. Determinants of digital diffusion and productivity effects	83
Figure 2.11. The share of fibre in total fixed broadband subscriptions is high	85
Figure 2.12. Mobile broadband subscriptions have increased	86
Figure 2.13. Internet usage is relatively widespread in Spain	86
Figure 2.14. High-speed broadband access is low in rural areas	88
Figure 2.15. Online services in public administration are advanced	89
Figure 2.16. Digital security measures can be strengthened further	92
Figure 2.17. The quality of management practices is low	93
Figure 2.18. Business R&D in Spain lags behind in a number of areas	94
Figure 2.19. Public financial support to business R&D is low	95
Figure 2.20. Partnerships between public research and firms can be developed further	97
Figure 2.21. Skill shortages in some segments are significant	100
Figure 2.22. Spain lags on the use of ICT tools in schools and teachers' preparedness	101
Figure 2.23. University graduates in STEM courses are relatively low	102
Figure 2.24. STEM-related VET programmes should be developed further	104
Figure 2.25. There are some important gaps in adult learning opportunities	106
Figure 2.26. Regulatory reforms matter for digital adoption and productivity gains	107
Figure 2.27. Product market regulations are stringent in some respects	108
Figure 2.28. Penalties for failed entrepreneurs remain strong	110
Figure 2.29. Spanish firms rely more frequently on bank loans than on capital markets	112
Figure 2.30. Debt bias in the Spanish corporate tax system is strong	113
Figure 2.31. Venture capital can be developed further	114
