Foreword	3
Executive summary	8
1 Key policy insights	13
The post-pandemic recovery needs to be more inclusive and sustainable	14
A strong economic recovery needs supportive macroeconomic policies	16
Monetary policy should remain accommodative	25
Financial stability has prevailed, but risks remain	26
Fiscal policy should remain supportive	28
Anti-corruption remains a priority	34
The pandemic-hit labour market calls for more social protection	36
Malaysia needs to lower carbon emissions	47
References	57
Annex 1.A. Follow-up to past recommendations	61
2 Unleashing business dynamism for the post-COVID19 recovery	63
Malaysia needs to re-boost its productivity growth once again	64
The pandemic has accelerated the transition to new forms of working	99
References	113
Annex 2.A. Demand fluctuation and productivity	119

FIGURES

Figure 1. Female employment has increased fast, but jobs are precarious	10
Figure 2. Malaysia needs to become greener	10
Figure 3. Barriers to competition are still high	11
Figure 4. Digitalisation boosts productivity	11
Figure 5. Digital infrastructure needs to be enhanced	11
Figure 1.1. Malaysia was hard hit by the COVID-19 outbreak, but it has recovered relatively fast	14
Figure 1.2. Recent macroeconomic developments	17
Figure 1.3. Malaysia has become a more domestic-demand-driven economy	18
Figure 1.4. Private consumption has become a key component in the economy	18
Figure 1.5. Exports by destination and products	19
Figure 1.6. Mobility has been severely restricted	19
Figure 1.7. Malaysia seeks to control the COVID-19 outbreak	21
Figure 1.8. Malaysia has imposed severe restrictions on economic activities	21
Figure 1.9. Malaysia's public health capacity is relatively high, and vaccination has picked up	23
Figure 1.10. Monetary policy has reacted promptly to the economic disruption	25
Figure 1.11. Recent developments in financial markets	27

Figure 1.12. The pandemic has rapidly worsened the fiscal position	28
Figure 1.13. Ageing-related spending will call for offsetting fiscal measures	30
Figure 1.14. Malaysia's social spending is low relative to total expenditure	30
Figure 1.15. Inequality has declined, but the tax and transfer system needs to be more efficient	31
Figure 1.16. Malaysia's tax revenue is low and has declined	32
Figure 1.17. Malaysia has stepped up its anti-corruption efforts	35
Figure 1.18. Malaysia's anti-money laundering has progressed	36
Figure 1.19. Malaysia's female labour participation rate has increased rapidly	37
Figure 1.20. The pandemic has affected females and young workers disproportionately	38
Figure 1.21. The job recovery of the self-employed has been weaker than for regular employees	39
Figure 1.22. Female self-employed workers increased, but social protection is weak	41
Figure 1.23. Poverty rates are high among elderly people	42
Figure 1.24. Many young workers have not yet come back to the labour market	43
Figure 1.25. Unemployment rates vary between different generations	45
Figure 1.26. Malaysia provides a significant number of jobs for non-Malaysian citizens	46
Figure 1.27. Malaysia's environment performance has improved, but more could be done	49
Figure 1.28. More liberalisation in the electricity market can be conducive to green growth	51
Figure 2.1. Malaysia needs to boost its labour productivity growth	64
Figure 2.2. Barriers to competition are high in Malaysia	65
Figure 2.3. Structural reforms are an ongoing process	66
Figure 2.4. Administrative burdens on start-ups are relatively high in Malaysia	67
Figure 2.5. Licences and permits to start a business are still burdensome in Malaysia	68
Figure 2.6. Lowering administrative burdens would stimulate new business creation	70
Figure 2.7. Improving insolvency regimes further could help stimulate business dynamism	71
Figure 2.8. Malaysia performs well in regulatory assessment	72
Figure 2.9. The share of services has increased rapidly	77
Figure 2.10. Several network sectors are strictly regulated in Malaysia	77
Figure 2.11. Malaysia's transport markets are more restrictive than those of OECD countries	79
Figure 2.12. Less restriction in professional services would foster productivity	81
Figure 2.13. Malaysia's retail services market is more restrictive than OECD countries	83
Figure 2.14. Online sales keep expanding during the pandemic	84
Figure 2.15. Digital uptake in Malaysia's businesses was evolving before the pandemic	86
Figure 2.16. In the services sector, SMEs adopting digital tools show higher labour productivity	87
Figure 2.17. Malaysia is open to digital trade, but could be more open to computer services	92
Figure 2.18. Malaysia is advanced in mobile broadband subscriptions, but less in fixed broadband	93
Figure 2.19. Malaysia's telecom market liberalisation has been progressing	94
Figure 2.20. Technology advance has changed the landscape of jobs	100
Figure 2.21. Demand for skilled jobs was robust during the pandemic	101
Figure 2.22. Demand for high digital skills would continue to increase	101
Figure 2.23. The pandemic has forced many workers to telework	103
Figure 2.24. Southeast Asian countries have experienced work from home during the pandemic	104
Figure 2.25. A number of managers and workers have positive views on teleworking	106
Figure 2.26. Managers find many obstacles to teleworking	107
Figure 2.27. Pandemic-induced teleworking will not continue in Malaysia, while other countries will	108
Figure 2.28. Digital infrastructure is a major obstacle to teleworking in Malaysia	109
Annex Figure 2.A.1. Productivity of the accommodation sector could be further improved	120

TABLES

Table 1. Growth is expected to rebound steadily	9
Table 1.1. Macroeconomic indicators and projections	15
Table 1.2. Stimulus packages have been large	22
Table 1.3. The pandemic is the present danger, but other lower-probability vulnerabilities exist	24
Table 1.4. Past recommendations on macroeconomic policies	32

Table 1.5. The fiscal cost of reforms is modest	33
Table 1.6. Past recommendations on public sector integrity	34
Table 1.7. Southeast Asian countries have pledged to reduce GHG emissions	47
Table 1.8. Past recommendations on green growth	47
Table 1.9. Table of Recommendations	55
Table 2.1. Digital uptake boosts firm-level productivity of services sectors	88
Table 2.2. Composition of respondents	105
Table 2.3. Table of Recommendations	111
Annex Table 1.A.1. Past recommendations on the other issues	61
Annex Table 2.A.1. Demand fluctuation affects the level of hotel occupancy rates	121
