MAR MENOR

Tres episodios graves de mortalidad de especies en el Mar Menor en seis años no presagian nada bueno y la pesquería tradicional de la laguna ve peligrar su modo de vida. A pesar de que hoy por hoy pueden garantizar al consumidor los controles sanitarios y la trazabilidad de todas sus capturas, los pescadores de la zona manifiestan su preocupación por algunas especies de interés en un futuro no muy lejano.

PÁGINA 6

INVESTIGACIÓN

Aplicaciones farmacológicas. El mar ofrece grandes posibilidades a la industria farmacéutica para descubrir principios activos que originen nuevos medicamentos.

PÁGINA 30

MARINA MERCANTE

Naves autónomas. La OMI explora cómo afrontar un reto aún en ciernes, pero cada vez más cercano: los buques sin tripulación a bordo.

PÁGINA 48

14 Tribuna. Repaso a las especies invasoras marinas por Juan Junoy, catedrático de Biología Marina.

16 Eólicas. Pescadores y ambientalistas piden consenso en los días previos a la ordenación del espacio marítimo.

20 Acuerdo con Mauritania. Tras varias prórrogas, la UE logra cerrar el acuerdo pesquero más importante para la flota comunitaria

24 Beligerancia noruega. El país escandinavo se salta los pactos alcanzados en materia pesquera con la UE.

26 X Conferencia Mundial. Los principales productores de atún del mundo se reunieron en Vigo convocados por Anfaco-Cecopesca

36 Delfines. Un equipo de científicos nos exponen su investigación para evitar que los delfines mulares depreden el copo.

46 Nuevo DIM. A principios de 2022 estará disponible el nuevo Documento de Identificación del Marino, formato carnet.

52 Salud mental. El ISM edita una guía de orientación para el cuidado de la salud emocional de los marineros.

Foreword	3
Executive Summary	9
1 Key policy insights	14
The initial pandemic response was well coordinated	16
The macroeconomy rebounded strongly, but has weakened amid new restrictions	18
Monetary and financial policies have provided a buffer against the shock	24
Achieving monetary policy objectives	27
Fiscal policy has responded with unprecedented force	28
Supporting the recovery while ensuring fiscal sustainability	31
Regulatory and institutional reforms are needed for a sustained recovery	46
Reforming regulatory and administrative procedures	50
Faster decarbonisation can bring significant economic benefits	59
Further reducing greenhouse gas emissions from high levels	59
2 The role of the financial sector in supporting a sustainable and inclusive recovery	74
Key trends in Australia's financial sector	75
The financial sector has played a critical role in the COVID-19 crisis response	79
Shoring up liquidity	82
Flattening the insolvencies curve	84
Maintaining financial stability	87
Channelling finance to viable and productive firms	92
Improving access to credit	94
Broadening sources of finance beyond banks	102
Supporting the green transition	108
Enhancing risk disclosure	109
Funding the green transition	112
Maintaining well-functioning insurance markets amid more frequent climate-related natural disasters	114
Strengthening households' resilience and mitigating inequality	115
Ensuring consumer credit protection is appropriate	115
Narrowing gaps in financial literacy and inclusion	118
References	125

Executive summary	9
1 Key policy insights	14
The euro area is facing new and unprecedented challenges	15
The euro area is recovering from a recession of unprecedented nature and magnitude	16
Maintaining monetary policy effectiveness after reviewing its framework	23
Monetary policy should remain accommodative	23
Possible negative side-effects should be kept in check	26
The review of the monetary policy framework	30
The EU needs to evaluate its fiscal governance framework to improve its functioning	36
The COVID-19 crisis will have profound impacts on fiscal balances, but support is still needed	36
Improving EU fiscal rules will make fiscal policies more effective	38
Making the best use of crisis-related common fiscal tools, and providing input for the future economic architecture of the EU	46
The European recovery package will support the international role of the euro	47
A more global euro would benefit the euro area economy	47
A temporarily larger supply of euro denominated EU assets will contribute to support the euro as a global reserve currency	48
Enhancing the euro area architecture would increase confidence in the euro and its international use	50
Higher cyclical convergence would buttress the euro area	51
Increasing fiscal integration is key to reduce cyclical divergence	51
More resilient labour markets would reduce dispersion in business cycles	52
A more effective single market for capital and stronger banks can reduce the risk of financial fragmentation	54
References	57
2 Fostering cyclical convergence in the euro area	60
Euro area cyclical divergence has deep roots	61
Different economic structures generate dispersion in business cycles	62
Limited labour mobility impedes labour market convergence	65
Financial markets fragmentation generated diverging economic cycles	66
The absence of a common fiscal capacity amplifies diverging business cycles	68
Making labour markets more resilient to the economic cycle	69
European tools to support policies for resilient national labour markets	69
Improving labour mobility	72
Avoiding financial fragmentation during downturns	75
Increasing the resilience of European banks	76
Improving cross-border lending	79
Strengthening market-based finance	81
Establishing a fiscal framework for cross-country business cycle stabilisation	87
References	91

Executive summary	9
1 Key policy insights	15
The COVID-19 crisis hit a weakening economy	16
The recovery will be gradual but subject to risks	23
The COVID-19 crisis has exacerbated some macro-financial vulnerabilities	25
A structural reform package for a sustained, green and inclusive recovery	32
Main findings and recommendations	69
References	70
2 Strengthening Italy's public sector effectiveness	79
A more effective public sector is essential to address Italy's challenges	80
Revisiting what interventions the public sector makes in the economy	84
Improving how the public sector delivers	95
Better leveraging who across the government delivers public services and investments	110
Policy recommendations	121
References	122

FIGURES

Figure 1. The economic contraction was severe	10
Figure 2. The government responded swiftly to the COVID-19 crisis	10
Figure 3. Faster growth is needed to improve the debt-to-GDP ratio	11
Figure 4. More physical and social capital is key to raise growth	12
Figure 5. Pension and debt costs leave little space for pro-growth and inclusive spending	13
Figure 1.1. Improving vaccination rollout has allowed a gradual easing of activity restrictions	16
Figure 1.2. The high share of severely restricted sectors amplified economic contraction	17
Figure 1.3. COVID impact has been broad – but the most vulnerable have suffered more	18
Figure 1.4. Italy has relied heavily on short-time work schemes and made provision for generous loan facilities	22
Figure 1.5. Exports by main destinations and main goods	23
Figure 1.6. Confidence has recovered, and investment is expected to lead the rebound	24
Figure 1.7. Swift policy responses have been a vital lifeline for access to finance given low cash holdings	26
Figure 1.8. Vulnerabilities remain in the banking sector	27
Figure 1.9. Non performing and bad loans have been progressively reduced	28
Figure 1.10. Public debt levels have risen sharply and will remain elevated	29
Figure 1.11. Spending on pensions is set to rise from already high levels – even with reforms	30
Figure 1.12. Older Italians are relatively well off compared to counterparts in Europe	30
Figure 1.13. Putting public debt on a downward path requires additional structural reforms	32
Figure 1.14. Per capita income has stagnated	33
Figure 1.15. Sluggish investment and productivity have weighed on growth	33
Figure 1.16. Investment dominates spending plans	34

Figure 1.17. There is room to improve utilisation of EU investment funds	39
Figure 1.18. Investment has recovered slowly from the global financial crisis and lags peers	41
Figure 1.19. Investments rose fastest in manufacturing sectors and intellectual property assets	42
Figure 1.20. R&D spending is particularly low by the government and higher education institutions	43
Figure 1.21. Non-financial corporates have reduced leverage but are still vulnerable	44
Figure 1.22. The generosity of ACE reduces the debt bias	45
Figure 1.23. Italy has progressed in reducing carbon emissions	46
Figure 1.24. Transport, electricity and domestic heating are the main sources of greenhouse gas emissions	47
Figure 1.25. Carbon pricing is not yet widely applied and exposure to particulate emissions remains high	48
Figure 1.26. Uncertainty about regulations and taxes is a major obstacle to green investment	49
Figure 1.27. Regulations can be better designed to achieve objectives	49
Figure 1.28. Italy's productivity growth has lagged its peers for the last two decades	50
Figure 1.29. A recovery in manufacturing productivity, but services sector productivity lags	51
Figure 1.30. Firms' entry and exit rates lag other countries	51
Figure 1.31. Product market regulation in Italy's services sector lags other areas	52
Figure 1.32. Professional services restrictions are very high	53
Figure 1.33. Access to high-speed broadband is low	54
Figure 1.34. There is scope to increase the use of government e-services	54
Figure 1.35. Low recovery rates can stymie firm creation and raise the costs of recessions	57
Figure 1.36. Italy's justice system in practice reduces the efficacy of its property rights framework	58
Figure 1.37. Perceptions of corruption are still high compared to other OECD countries	59
Figure 1.38. Italy has been effective in fighting money laundering	60
Figure 1.39. Access to employment is deeply unequal and unemployment is persistent	61
Figure 1.40. Workers benefiting from Italy's recent reforms now face income tax wedges near the EU average	62
Figure 1.41. Spending on ALMPs has risen, but high unemployment and skills gaps require more	63
Figure 1.42. Firms are not providing their employees enough digital training	64
Figure 1.43. Italy's tax mix has low reliance on VAT and a higher reliance on social security contributions than peer countries	66
Figure 1.44. Inheritance tax thresholds are low compared to OECD peers and average bequests	67
Figure 1.45. The marginal effective rates of property	67
Figure 2.1. Perceptions of the public sector's effectiveness lag behind other OECD countries	80
Figure 2.2. Italy's pension and debt servicing costs are higher than in most other OECD countries, while growth-enhancing spending is lower	85
Figure 2.3. Outcomes from Italy's public spending lag behind in some areas, such as building skills and reducing poverty rates among children and families	85
Figure 2.4. Italy has developed a large number of performance indicators, but they have little influence on what public goods and services the budget funds	88
Figure 2.5. Italy has substantially improved how it designs regulations, but still regulates some sectors heavily	92
Figure 2.6. Italy's public sector workforce has been reduced to among the smaller across the OECD	95
Figure 2.7. Italy's ageing public workforce will soon bring a loss of experience and an opportunity for renewal	97
Figure 2.8. Public service pay rates are compressed, with low skill and the top echelon of public servants earning relatively high wages	100
Figure 2.9. Smaller municipalities have thinner procurement capacity and use direct purchasing more often	104
Figure 2.10. Italy has made significant progress in transforming public services through digital technologies and data, but take-up lags	107
Figure 2.11. Local authorities that digitalise are more effective, but most only digitalise when compelled	108
Figure 2.12. Italy has room to shift resources to active labour market policies with a greater focus on serving jobseekers	109
Figure 2.13. Italy is moderately decentralised, and subnational governments have an important role delivering public investment	111
Figure 2.14. Most of Italy's 7900 municipalities are small	112
Figure 2.15. Improving the efficiency of childcare services would help raise access	115
Figure 2.16. Larger municipalities execute a lower share of their public investment projects	117
Figure 2.17. Public enterprises play a large role in Italy, and their governance can be improved	119
Figure 2.18. Most public enterprises are held by local governments and many have few employees	120
