|  |
| The second of an income the college has been also at the college of the college o |
| The governance of environmental policies has been strengthened in recent years 85  |
| The gap between the results and the objectives is widening 88  |
| Several factors explain France's deviation from its objectives 92  |
| The pace of transition must accelerate and reallocation costs minimised 96   |
| 2.2. Economic incentives must be reinforced to accelerate the pace of emissions reduction 99   |
| Private investment must increase 99  |
| Environmental taxation must be strengthened 102  |
| Support for households and firms must increase to improve social acceptability 107   |
| 2.3. The cost-effectiveness of some sectoral policies can still be improved  112   |
| Mobility-related measures can be better designed 112   |
| Buildings' energy performance must increase 116 The development of renewable energies must accelerate 120  |
| The development of renewable energies must accelerate 120 2.4. Land use must be more carefully considered to preserve biodiversity 125   |
| Biodiversity protection and economic development are compatible 126  |
| Farming must gradually shift to more sustainable practices 130   |
