Foreword	3
Executive Summary	10
1 Key Policy Insights	16
The economy is recovering, but negative risks predominate	18
Fiscal and tax policies need to focus on supporting both growth and inclusion	20
Fiscal policy has moved robustly to counter the pandemic	20
Fiscal policy could also do more to reduce poverty	25
The financial system is sound, but credit provision could be improved	27
Banks, especially the larger ones, are in good financial shape	27
Credit growth is modest	27
Progress is being made in the long battle against informality and corruption	30
Informality in the labour market is severe	30
Corruption and bribery are also still seen as longstanding problems	30
Labour market participation is high, while social protection is modest	33
Securing an adequate supply of labour	34
The ageing population calls for pension-system adjustments	37
The population is shrinking rapidly	37
The population has also aged	39
Depopulation has fallen most heavily on rural areas, resulting in big regional disparities	39
Adjusting the pension system is key to address these demographic pressures	41
Health-care performance has been improving, but more needs to be done	44
Overall health spending is low, contributing to short life expectancy and other ills	44
The low quality of care and substantial unmet needs also signal a need for improvement	47
A lack of resources has implied low numbers of medical personnel and long wait times	48
Health-care spending efficiency could be enhanced	49
Shifting towards more preventive measures	50
Lifestyle-related risk factors are heavy, calling for more aggressive policy actions	50
Much of the housing stock is crowded, old and in poor condition	52
Latvia needs to address some major environmental challenges	57
Recent progress in dealing with climate change has been limited, and air pollution is bad	57
Progress is being made in water treatment, but solid waste disposal and biodiversity remain challenges for the future	60
References	63
2 Boosting productivity and incomes through capitalising on export opportunities	67
Latvia could foster productivity and income growth by increasing exports	68
Export performance has been weak, but promising trends have emerged	70
Low-tech sectors still dominate Latvian manufacturing	72

Growth of services exports has been slow	73
Exports of goods have been resilient since the COVID-19 shock	74
Promising developments in the ICT sector	75
Promoting export growth and diversification	75
Expanding export product diversity and complexity	78
Expanding exports to new markets	82
Sustaining exports through increasing product complexity	83
Diversifying the supplier base to improve resilience	83
Improving the business environment and infrastructure	84
Maintaining efforts to improve market regulations for all firms	84
Strengthening SOEs governance to improve their effectiveness	86
Improving connectivity through better public transport	86
Improving skills to enhance export performance	88
Much is being done to overcome the shortcomings of the education system	88
A shortage in ICT and STEM skills has become an increasingly important constraint	89
Facilitating the immigration of skilled workers	93
Improving digital and management skills to increase uptake of digital technologies	94
Enhancing adult education by establishing a training fund	95
Increasing access to higher education	97
Increasing R&D and innovation from its low base	98
Latvia's innovation performance is poor	98
Increasing the level of public support to business R&D	101
Fostering knowledge transfer through stronger incentives	102
Attracting and retaining PhD students	105
